NON-CONFIDENTIAL

Dear Case Team,

Subject: **AD0091 (Linear Low-Density Polyethylene from the United States of America) – Update**

Our client: **Equistar Chemicals, LP (*'Equistar'*)**

We regret to inform you that our client will not be submitting a questionnaire response in this investigation.

At the outset of the investigation, our client sought to register as an interested party as soon as possible in order to actively participate and support the work of the TRA in conducting the investigation. However, it has now become clear in recent weeks that providing a questionnaire response will simply not be feasible for the company due to current constraints and other pressing priorities that require the company's attention and prioritisation in the period ahead.

Our client nonetheless remains committed to following the investigation closely and reserves the right to submit written comments to the TRA on any issues that may be raised — either by other interested parties or in the findings of the TRA — during the course of the investigation.

Best regards,

Benoit Servais, Victor Crochet & Eamonn Arbuckle
