Annex 1 contains a detailed calculation worksheet for the steel PMS adjustment ratios. The calculations therein are based on Dingli's cost of production data, which constitutes information that is confidential by nature and not susceptible of meaningful non-confidential summarisation, as well as Platts price data, which is subject to copyright and licensing restrictions and therefore cannot be reproduced in the non-confidential version of these comments. The underlying Platts data is, however, publicly available and any interested party may obtain it through a subscription to Platts.

Annex 1 cannot be disclosed because it contains information that is confidential by nature within the meaning of regulation 45 of the Trade Remedies (Dumping and Subsidisation) (EU Exit) Regulations 2019. Disclosure would provide a significant competitive advantage to competitors and have an adverse effect on the company supplying the information. Confidentiality is therefore requested.
