AUTOMATIC PATH PLANNING

Using U-shaped path, it is more efficient than non path lawn mowers.

REAL-TIME MAPPING

Through C-TOF tech, it provides real -time precise location data.

Meet Anthbot Pion: Your New Lawn Care Best Friend!

· C-TOF Positioning

Provides real-time precise location data based on acquired map data.

· One-Button Mapping

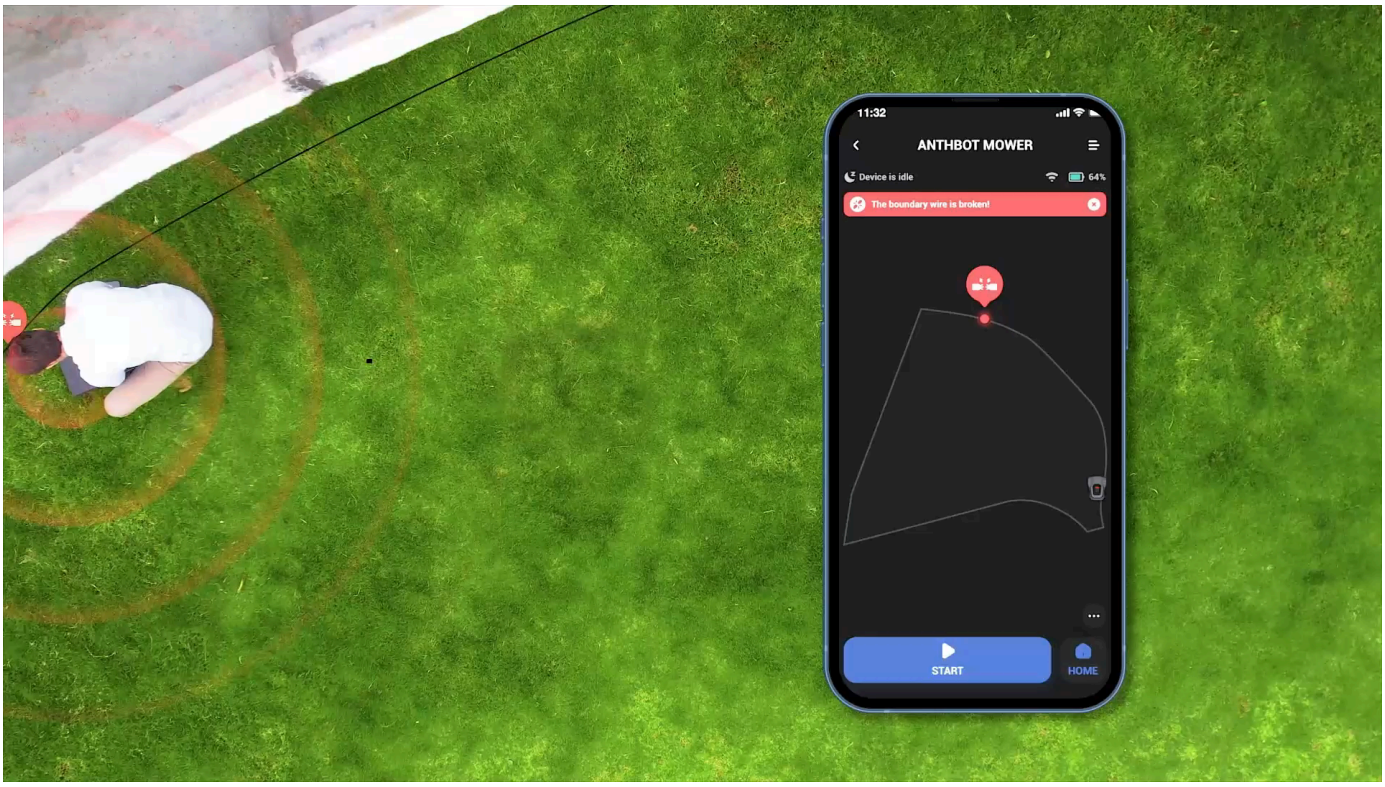

Achieves one-click automatic map construction via the app.

· Efficient Mowing

Programmed parallel mowing routes enable fast mowing, mowing area max optional: 300/500/1000㎡.

Detecting Broken Wires Automatically

Anthbot's revolutionary cable fault detection makes repairs simple and effective, ensuring uninterrupted mowing.

Excellent Outdoor Survivability Without Any Manual Intervention

· Precise Obstacle Avoidance

Structured light sensor has a wide view field and high scanning accuracy.

· Obstacle Height of 30-70mm

Motor will automatically lift to avoid being trapped on uneven ground or encounter obstacles.

· Climbs up to 45% Slope

Able to handle even complex terrain with ease.
