About Our Robotic Lawn Mowers

Our robotic lawn mowers are the ultimate robot mowers that make lawn care smarter and simpler across all types of lawns. With advanced path planning powered by Dual-LiDAR technology, an AI camera for visual recognition, and intelligent obstacle avoidance, they navigate narrow paths, fences, and no-go zones like pools and flower beds for precise edge-to-edge cutting.

Even on steep slopes, their strong climbing and barrier crossing system adapts in real time. To ensure a serene atmosphere in your home, their low-noise operation preserves peace. Plus, they react promptly to obstacles like your furry friends or playful toddlers for added safety. Their wire-free portable design with IPX6 waterproof rating also makes them easy to manage and store.

Shop GOAT robotic lawn mowers so you can sit back and enjoy the beautiful landscape while setting automatic schedules and customising zones, cutting height, and speed directly from the ECOVACS HOME app.

Q&A

PD – Subscription Draw

Are robotic lawn mowers worth it?

Yes, robotic lawn mowers like the GOAT are worth the investment. Lawn care has long been one of the least favourite chores for UK homeowners; if you're searching for a smart and convenient solution, these mowing robots are well-equipped with intelligent navigation, obstacle avoidance, and path planning, delivering consistent results while saving you hours every week.

How to choose the best robotic lawn mower?

What features should you look for in a robotic lawn mower?

Who should buy a robotic lawn mower?

Is a robotic lawn mower better than a traditional mower?

How often should you mow your lawn with a robot mower?

How long do robotic lawn mowers last?

Can robotic lawn mowers handle sloped or uneven yards?
