In order to solve the problems that restrict China's socio-economic development and national defense construction such as large but not strong manufacturing industry, weak independent innovation capability, high dependence on key core technologies and high-end equipment, the State Council issued on May 8, 2015

The Made in China 2025, which strives to achieve the strategic goal of manufacturing power through "three steps", proposes to "strengthen industrial foundation capacity" and "lay a solid foundation", and On April 12, 2016, the Ministry of Industry and Information Technology, the Development and Reform Commission, the Ministry of Science and Technology, and the Ministry of Finance jointly released the "Implementation Guide for Industrial Foundation Project (2016-2020)", which further proposed to "carry out a 'package' of key areas ' breakthrough action, implement a 'one-stop' application plan for key products, build a number of industrial technology foundation platforms, cultivate a number of specialized and special new 'small giant' enterprises, and promote the 'four basic ' field of military-civilian integration development" and other key tasks to form an industrial pattern of coordinated development of the whole machine traction and basic support.

In order to indicate the development focus and direction of industrial basic fields, guide the reasonable layout of industrial basic fields in each region, and lead social capital investment, the National Advisory Committee for the Construction of a Strong Manufacturing Country (hereinafter referred to as the "Strategic Advisory Committee") has organized relevant experts to compile a development catalogue of industrial "four basic The National Advisory Committee for the Construction of a Strong Manufacturing Country (hereinafter referred to as the "Strategic Advisory Committee") has organized relevant experts to compile a catalogue of the development of the "four bases" of industry and summarized it into an advisory report called "Catalogue of the Development of the Four Bases of Industry (2016 Edition)" (hereinafter referred to as the "Four Bases" Catalogue).

After nearly one and a half years of hard work by academicians and experts, the "four bases" catalogue has been completed and approved by the Strategic Advisory Committee, and was publicly released to the whole society on November 18, 2016.

Throughout the development of industrialization, the industrial base of developed countries is gradually accumulated and developed in the process of industrialization, and this gradual accumulation makes the developed countries in the development of the whole machine, the simultaneous development of the "four bases", with a strong industrial

base, so as to be able to maintain a long-term technological advantage in industrial competition. For a long time, China's industrial base pay insufficient attention to the "obvious light potential", resulting in a weak industrial base is very prominent, especially in the new economic development situation, has become a manufacturing power construction of the "lame" link. In order to achieve manufacturing strength

China's "three steps" strategic goals, in 2025 into the ranks of manufacturing power, must strengthen the industrial base, around the manufacturing power of the ten key areas to focus on breakthroughs, and strive to 2025 to establish a complete traction and basic support the coordinated development of the industrial pattern. The release of the "four bases" directory can guide each region according to the region's industrial base now In addition, the Government should guide enterprises and research institutes to determine the direction and objectives of development on the basis of prudent consideration of their own conditions and characteristics; guide financial institutions, the credit guarantee industry and the insurance industry to make full use of a variety

of financial instruments to support enterprises engaged in research and development, production and use of Enterprises rises using the products and technologies listed in the "Four Bases" catalogue are guided to gradually gather social capital in the industrial base sector.

The "Four Foundations" catalogue was launched in mid-March 2015, mobilizing more

than 40 academicians, 200 experts and senior management of relevant enterprises to participate, and extensively collecting opinions from enterprises, universities, research institutions, industry associations and relevant government departments. The "Four Foundations" catalogue is the culmination of the collective wisdom of the academicians and experts involved in the preparation work, and is the core of China's industrial foundation development, which has a very important strategic value.

By organizing the compilation and publication of the "Four Foundations" catalogue, it forms an atmosphere in which the whole society attaches importance to the foundations, guides localities in rational industrial layout, directs enterprises and research institutes to carry out innovative activities, attracts social resources to the industrial foundations, and promotes the construction of a strong manufacturing country, which is an innovative model for promoting China's economic construction.
