

Appendix 4

NON-CONFIDENTIAL

ICIS report on US PVC production

This information is subject to a copyright. By way of non-confidential summary, the report highlights that there was a temporary plant closure of US VCM producer, Olin. Olin supplies about half of the Shintech PVC plant production requirements. This caused a decline in Shintech's output, therefore affecting the export capacity. ICIS has reported that Olin's plant is now operational, and that PVC production will soon ramp up.
