Shandong Jinhai Titanium Resources Technology Co., Ltd.

Release time: 2020-08-05

Shandong Jinhai Titanium Industry Resources Technology Co., Ltd. is a state-owned holding company and one of the subsidiaries of Shandong Lubei Enterprise Group Corporation. The company is located in Lubei High-tech Development Zone, the northernmost tip of Shandong Province. It is located in the superimposed belt of the Yellow River Delta High-efficiency Ecological Economic Zone and the Shandong Peninsula Blue Economic Zone. It is adjacent to Huanghua Port and 120km away from Tianjin Port. It is connected to Changshen Expressway and Jinshan Expressway. . The geographical environment is superior and the water and land transportation is convenient.

Lubei Group has started to develop the titanium industry since 2002. Over the years, the group has always been adhering to the concept of science and technology, innovation and development. Starting from the 15Kt/a anatase titanium dioxide of Lubei Titanium Industry, it has reached 60Kt/a after more than ten years of development. On this basis, it continues to expand the scale and build a new rutile titanium dioxide project, namely Shandong Jinhai Titanium Industry Resources Technology Co., Ltd. . The total investment of the project is 800 million yuan, and the production capacity of the device is 150Kt/a rutile titanium

dioxide. Now it has more than 800 employees, including 200 engineers and technicians. The main products are nano titanium dioxide, chemical fiber titanium dioxide, paint titanium dioxide, plastic titanium dioxide, paper titanium dioxide and other products.

The device adopts the top technology at home and abroad, introduces advanced equipment, adopts DCS control, and is at the domestic leading level in terms of production technology, equipment and automation control. Sulfuric acid co-production of cement" and "comprehensive utilization of waste denitrification agent" and other patented technologies, except for the 20% waste acid produced in the company's hydrolysis workshop for self-reuse in the acid hydrolysis workshop, the remaining part is used for sulfur and phosphorus after preparing 68% acid The technology ammonium phosphate plant, the second is to make polyferric sulfate with ferrous sulfate and use it as a water purifier; in addition, the company's new white gypsum plant treated titanium gypsum is used as raw material for sulfuric acid technology gypsum co-production cement plant. It has completely solved the problem of titanium gypsum utilization produced by sulfuric acid titanium dioxide production, achieved the co-production of titanium, sulfur, chlorine,

phosphorus, and calcium, and realized the effective recycling and comprehensive utilization of resources.

The company has passed the ISO9001:2008 quality management system, ISO14001:2004 environmental management system, OHSAS18001:2007 occupational health and safety management system certification, and the "Jinhai" trademark has obtained the Madrid International Trademark Certificate. It has successively won industry honors such as "China Titanium Wonderful 60th Anniversary Excellent Enterprise Award", "Enterprise Contributing to the Development of China's Coatings Industry in the Forty Years of Reform and Opening Up". It was rated as "the most competitive enterprise brand in the new era", "provincial health promotion" enterprise, "municipal contract-abiding and credit-worthy" enterprise, "municipal technology center", "green factory" in the petroleum and chemical industry, and national "Green Factory", the first prize of the 12th National Petroleum and Chemical Enterprise Management Innovation Achievement Award, and the second prize of the National Enterprise Management Modernization Innovation Achievement Award. The Jinhai brand trademark was identified as "China's Famous

Brand” by the Trademark Office of the State Intellectual Property Office.

The company always adheres to the service tenet of “quality first, reputation first”. Its products have excellent high whiteness, gloss, high hiding power, easy dispersibility, decolorization power, blue background phase and weather resistance, and are widely used in paints, coatings, plastics, masterbatch, rubber and other application fields, not only sold all over the country, but also exported to the United States, South Korea, India, Thailand, Canada, the United Arab Emirates, Pakistan, Turkey, Malaysia and other countries and regions, deeply trusted by customers .

At the end of the “Thirteenth Five-Year Plan” period, the company’s annual output of 100,000 tons of rutile titanium dioxide has been moved into the park and the comprehensive technical transformation project has started construction. At that time, it will form an annual production capacity of 250,000 tons of titanium dioxide, and rely on location advantages and technological advantages to help Lubei Group rank among China’s titanium industry bases.
