Anti-dumping investigation

Case AD0075

Boom lifts originating in The People's Republic of China (PRC)

Note to the public file –decision regarding individual rate request

On 24 February 2026, the TRA received a request ("the Request") made on behalf of the JLG group for individual examination in respect of the ongoing dumping (AD0075) investigation. In its request, the party cited the reasons why the TRA should calculate company-specific dumping margins.

Under Regulations 56(7) and 57(5) of the Trade Remedies (Dumping and Subsidy) (EU Exit) Regulations 2019 The TRA must accept the request of a non-sampled overseas exporter and calculate an individual margin of dumping (Reg 56(7)) or individual anti-dumping amount or countervailing amount (Reg 57(5)) unless the *"number of exporters is so large that individual examinations are unduly burdensome and would prevent the timely completion of the investigation"*.

The TRA has continued to review and assess the Request and has now reached the decision that it will not accede to the Request.
