Today on International Women in Engineering Day, we're celebrating the talented women helping to shape the future of Tioxide.

From engineering leadership through to operational and technical roles, women across our business are solving complex challenges, driving innovation and playing a key role in bringing our operations forward.

Our Managing Director, Karen Askwith, started her career as an engineer and understands the opportunities that engineering can provide. Her journey is a reminder that engineering careers can lead in many different directions.

The women featured here represent just a few of the many talented individuals across Tioxide making a difference every day.

We're continuing to grow our engineering team and are actively recruiting for a number of engineering roles. If you're looking for an opportunity to make a real impact in a manufacturing environment, we'd love to hear from you. Visit www.tioxide.com to find out more.

Happy International Women in Engineering Day!

When you work for Tioxide you're part of a global team. You have autonomy and control, but you're also strongly supported. The opportunity to stand on your own with the knowledge that someone has your back is the best of both worlds.

So why not join us? We are currently recruiting for several positions across site operations, engineering and support functions.

Find your next role with us, email recruitment@tioxide.com or check out www.tioxide.com for full role details.

The image shows a LinkedIn post from Tioxide. The post includes the Tioxide logo, the company name "Tioxide", and the text "1,202 followers" and "1mo • [REDACTED]". The main text of the post reads: "Behind our high-performance products is a high-performing team. At Tioxide, we bring together technical expertise, collaboration and pride in what we do. Interested in being part of it? Discover the roles we have available at <https://tioxide.com/>". Below the text is a large image with a blue diagonal banner that says "Where your strength becomes our strength". The Tioxide logo is also visible in the top right corner of the image. At the bottom of the post, it says "[REDACTED] and 35 others" and "1 repost".

The LB Group has officially acquired the former Venator sites at Greatham and Wynyard in Teesside. Operating under the name Tioxide, this acquisition immediately secures 132 existing jobs and paves the way for over 70 new positions in engineering and operations.

The move marks a fresh start for titanium dioxide production on the site, with recruitment starting immediately to support a full restart later this year.
