CNNC HUA YUAN Titanium Dioxide

Overview

CNNC HUA YUAN Titanium Dioxide Solutions for Coatings and Inks

CNNC Hua Yuan Titanium Dioxide was established in 2002 and is headquartered in Xinjiang, China. It is a subsidiary of China National Nuclear Corporation (CNNC), specializing in the production of high-grade rutile titanium dioxide pigments. Its coatings portfolio are widely used in architectural paints, industrial coatings, inks, and plastics for opacity, brightness, and UV resistance. CNNC Hua Yuan promotes sustainability through CNY 300 million investments in environmental protection, waste heat power generation, and ISO 14001-certified systems. It emphasizes clean manufacturing, R&D for low-waste processes, and compliance with EU market standards.
