Introduction

We invite interested parties and contributors to register their interest in this review by submitting a completed registration form.

This registration form is for **UK producers** of goods that are like the goods subject to review (the UK like goods). If you are not a UK producer, please download and complete the relevant registration form from the public file (public-file.trade-remedies.service.gov.uk/case/ir0093) if you wish to provide information as part of this review. If your company both produces the like goods, and imports the goods subject to review from the PRC, you should complete this UK producer registration form (and not the importer registration form).

To register to this case, you need to provide both a confidential and a non-confidential version of this form. Your non-confidential version should be as similar as possible to your confidential version except for the redaction of the confidential information.

Both copies must be returned to the TRA by **04 August 2026** via the Trade Remedies Service (portal.trade-remedies.service.gov.uk). It is your responsibility to ensure the non-confidential version – which may be placed on the public file – does not contain any confidential information, which includes personal contact information, names and signatures.¹

All information provided to the TRA in confidence will be treated as confidential in accordance with regulation 45 of the Trade Remedies (Dumping and Subsidisation) (EU Exit) Regulations 2019 (the Regulations) and will not be disclosed (except in limited circumstance as permitted by regulation 46 of the Regulations) and will be stored in protected systems.

This form allows us to collect basic information about your company. If a large number of producers complete this form, we may only ask a sample of producers to complete a detailed questionnaire. By submitting this completed registration form, you agree that you may be included in any such sample. If your company is included in the sample, you will be asked to respond to the questions in the detailed questionnaire and to support the TRA in verifying your responses. This may involve the TRA carrying out a verification visit to your premises. If you indicate that you do not agree to possible inclusion in a sample, your company may be deemed not to have cooperated in the review.

Section B: Additional information

11. Please provide contact details of any other known exporters and importers of the goods subject to review and UK producers of the goods that are like the goods subject to review (the UK like goods) in the table below.

Activities (exporter / importer / UK producer)	Company name	Contact details (website/email/telephone)	Location(s) (if info is available)

Add additional rows as required

12. Please provide any comments that you have in relation to the goods subject to review and the goods produced in the UK that are like the goods subject to review (the UK like goods). This may include, for example, the interchangeability of different types or brands.

--

13. The TRA uses product control numbers (PCNs) to define and distinguish the different types or subcategories of goods that fall under the goods description of the goods subject to review. Subcategories are developed on the basis of differences in the physical and/or commercial characteristics which may impact the price at which each subcategory is sold.

The TRA's proposed PCN structure is set out in Annex 1. Please review this and provide any comment on whether the PCN structure is adequate and appropriate to categorise your company's goods. If the PCN structure is not assessed to be appropriate, please suggest any changes you would like us to consider.

--

14. The TRA's previous transition review on ceramic tableware and kitchenware from the PRC identified the likely existence of a Particular Market Situation (PMS) in the market for the goods subject to review in the PRC.² The TRA will therefore assess the existence of a PMS within this review.

If you consider that a PMS exists in the market for the goods subject to review in the PRC, please provide reasons and relevant information. This can include examples such as prices being artificially low, significant barter trade, prices reflecting non-commercial factors, or anything else. Please also provide any other comment you wish to make in respect of PMS.

² [Transition Review TD0056 - Final Determination](#)

GOODS IMPORTED FROM CHINA DO NOT REFLECT
THE TRUE PRICE OF MANUFACTURE

15. If the TRA determines that a PMS exists and the effect of the PMS is such that it is not possible to make a proper comparison between the domestic sales price and the export sales price, it may not use the domestic sales price for the purpose of determining normal value. In such circumstances, the TRA may determine normal value using the costs of production plus a reasonable amount for administrative, selling, and general costs and for profits. The TRA may make adjustments to those costs and profits using data from an appropriate representative third country, if it determines that any relevant costs or profits of the overseas exporter are unrepresentative of what these costs or profits would be in a market where these were substantially determined by market forces.

We invite you to suggest an appropriate representative third country, should the TRA need to make such adjustments. Please provide supporting explanation or evidence to justify why you assess your proposed country to be appropriate. If you have contact details for a producer in your proposed country who may be willing to participate in the review, please also provide this information here.

16. Please suggest any official data sources of which you are aware, that publish market data on ceramic tableware and kitchenware in the UK.

17. Please provide any comments you have on ceramic tableware and kitchenware consumption across the different sectors in the UK (e.g. hospitality and household). In particular, where possible, please comment on:

- **sector-specific commodity codes** – which codes describe the goods that fall under each sector in the UK
- **sector consumption split** – your estimate of the relative proportions of consumption across different sectors in the UK
- **premium vs lower-priced goods** – your estimate of the proportion of consumption of premium vs lower-priced goods within each sector.
