

Extension - Note to the Public File

Note to the public file summarising an extension request, granted for a submission of a questionnaire to AD0091 – LLDPE from the US

The Trade Remedies Authority (TRA) received applications for extensions of time to complete and submit a full questionnaire from the below three interested parties.

Having considered the applications, the TRA has determined that granting extensions as detailed below would not significantly impede the progress of the investigation and has therefore granted the extensions as detailed, to the following interested parties:

Party Name	Extension request duration	Reasons for extension	Extension granted
Axia Plastics Europe	28 day extension	Due to holiday season and the information required, the process might take slightly longer than the deadline as information is required from various entities across time zones.	12:00 Noon (UK) 05 October 2026
Plastribution Limited	28 day extension	Due to availability of staff over a popular period for annual leave, the level of information required, the process might take longer than the deadline as information is required from various entities across different time zones.	12:00 Noon (UK) 05 October 2026
Chevron Phillips Chemical Company	11 day extension	Three affiliated companies are involved in preparing the responses to different sections/annexes of the questionnaire for overseas exporters and they are based in different jurisdictions (the US, the UK, and Belgium respectively). Their responses need to be consistent, which requires	23:59 (UK) 22 September 2026

		additional coordination across the group, further complicated by the time zone differences between the teams involved. • The period to respond to the questionnaire also includes labour day (Monday 7 September), which – like the 1 May festivity in Europe – is an important public holiday in the US. • Important staff members tasked with different sections of the questionnaire response are currently involved in other important time-consuming activities, such as month-end closing, important forecast updates for the company's owners and preparing for an upcoming board meeting. All these activities are placing significant additional demands on the same personnel needed for the questionnaire response. • Additional quality control required on the data submitted.	
Exxon Mobile	10 working days extension	• ExxonMobil group's corporate and sales structures are highly complex bringing together a large number of production entities and related trading companies, both in the US and overseas. • ExxonMobil group's entities and related entities are not solely involved in the sale and manufacture of the product under investigation and their financial accounts are consolidated at a group level, the disaggregation and reconciliation of the data requested, and as agreed, has added to the complexity of the reporting requirements and the time needed to prepare a	12:00 Noon (UK) 21 September 2026

		response to each section of the questionnaire. • Annual leave of key personnel over the summer break as well as two holidays, Labour Day and Lyndon Baines Johnson day, has limited staff availability to complete the questionnaire.
