

## **A unique supply capability**

With our own import infrastructure in key demand locations and lifting rights at inland locations, we have unique national supply capability.

We understand that supply resilience is of paramount importance to our customers, and our priority is to deliver.

- Our national footprint minimises transport distances between our storage terminals and our customers' sites, so we can ensure cost effective and reliable supply.
- Our 24/7 in-house logistics operation, supported by a UK based customer care and scheduling team, ensures that our haulage operations match our exacting standards of reliability and service.

## Why buy from us?

We work to earn the long-term loyalty of each and every customer. We are determined to outperform our competitors on both cost and service.

## We offer:

- Competitive pricing
- An extensive range of fuel products including petrol, diesel, biodiesel as B100 and also as B20 and B30 blends, bioethanol, ultra-low sulphur gasoil, marine gasoil and kerosene.

- Proven supply resilience and reliable delivery
- Our own managed supply locations across the UK and Ireland - we're not at risk of supply disruption by other providers
- A 24/7 haulage operation with real-time scheduling and a UK based customer service team, to resolve issues promptly

- Online ordering and auto-invoicing providing error-free back-office processes
- Wetstock management, allowing us to remotely monitor and manage fuel stocks at customers sites and ensure our customers never stock out
- Independence. We don't own or operate any forecourts, so we're able to put the interests of our customers first - 100% of the time.
