

BIODIESEL

Clean and renewable energy that drives sustainable development.

5th BIGGEST BIODIESEL PRODUCER
IN BRAZIL.

3 BIODIESEL PRODUCTION UNITS.

550 MILLION LITERS OF BIODIESEL
PRODUCED PER YEAR.

With two production units in Goiás (Ipameri and São Simão) and one in Mato Grosso (Sorriso), Caramuru reached 550 million liters produced in the year, becoming the fifth largest biodiesel producer in Brazil. A 100% clean and renewable biofuel produced from organic vegetable or animal matter, replacing fossil sources, providing environmental gains for the entire planet as it reduces greenhouse gas emissions in the atmosphere. This has a positive impact on human health and also contributes to social inclusion by increasing the income of family farmers and the communities where the plants are located.

FAMILY FARMING

TECHNICAL ASSISTANCE, GENERATION OF INCOME, AND SOCIAL INCLUSION

Caramuru contributes to the generation of income and provides technical assistance to family producers through the National Program for the Production and Use of Biodiesel – PNPB (Social Seal). By involving a specialized team of agronomists, it provides training to soybean producers in raw materials used in the production of biodiesel, in planting techniques, management, and sustainability concepts.

SOCIAL FUEL SEAL

SOCIAL RESPONSIBILITY FEATURE

Aligned with the Brazilian government's National Program for the Production and Use of Biodiesel (PNPB), the Social Fuel Seal is granted by the Ministry of Agricultural Development (MDA) to biodiesel producers that comply with the requirements of the National Program for Strengthening Family Farming (PRONAF).

Caramuru Alimentos, in addition to receiving the seal, stands out for exceeding the goal required by the program and acquiring more than 10% of raw materials from family farming.
