Western Region (2025 edition) are as follows:

Guizhou Province

16. Stone processing and production

in Yunnan Province

8. Tractors, cultivators, Research and development and manufacture of micro-tillers, rice, corn, potato, sugarcane harvesters and other modern agricultural machinery, and research and development and manufacture of agricultural products storage, preservation, drying and processing equipment. Xizang Autonomous
on R & D, application and equipment manufacturing

of agricultural product quality and safety testing technology 12. Research, development and application of new building materials and assembly building materials, R & D and production of new wall materials. Development and production

of new materials for highway engineering maintenance in Shaanxi Province

17. Comprehensive utilization of bulk solid waste from coal-fired power plants and production of building materials with high content of fly ash. Including 70% or more of fly ash to produce sintered bricks, 85% or more of fly ash to produce ceramsite products, 25% or more of fly ash to produce concrete, 30% or more of fly ash to produce other building materials (except cement)

22. It mainly includes research and development and production of concrete prefabricated parts (PC), steel structure assembly building parts, research and promotion of intelligent construction and construction industrialization coordinated development technology, construction waste reduction, new construction technology and other processes. R & D and promotion

of new environmental protection materials such as new wall materials, new waterproof sealing materials, new thermal insulation materials and decoration materials. Production

of green building materials and assembly building parts included in the catalogue of graded certification of green building materials and certified Ningxia Hui Autonomous Region

7. Comprises 70% or more of fly ash for producing sintered bricks, 85% or more of fly ash for producing ceramsite products, 25% or more of fly ash for producing concrete,

Xinjiang Uygur Autonomous Region (including Sinkiang Production and Construction Corps)

22. Manufacturing

of building materials machinery and key components 27. Production

of new walls, components and road building materials by waste sintering Inner Mongolia Autonomous Region

25. Energy-saving, carbon-reducing and water-saving technological transformation

in key areas such as iron and steel, non-ferrous metals and building materials
