The first LGMG Global Customer Festival grandly opened

On September 26, 2025, the first LGMG Global Customer Festival, themed “Technology-Driven, Intelligence Wins the Future,” grandly opened in Jinan, China. The event specially invited leaders from the Jinan municipal government, partners, domestic and international customers, media representatives, and leaders from the financial sector to attend. More than a thousand guests visited LGMG, experiencing up close the powerful charm of China’s intelligent manufacturing!

Industry Chain Collaboration for a Win-Win Ecosystem

Gathering global wisdom to jointly shape the blueprint for the future. On the morning of September 26, the LGMG Global Customer Conference kicked off at the Donghe Gymnasium of the Jinan Olympic Sports Center. At the conference, numerous ecosystem partners, including Huawei, CATL, and Sandvik, shared their deep cooperation with LGMG in areas such as autonomous driving, green and intelligent mine construction, and the development and promotion of large-tonnage new energy mining products, as well as the achievements they have made together.

Customer representatives from multiple countries and regions took the stage to share their experiences of collaborating with LGMG, reaffirming their deep trust in continuing the partnership. During the strategic signing session, the strong recognition of LGMG’s intelligent products and global services by its customers was highlighted, providing a powerful boost to LGMG’s international expansion.

At the conference, LGMG President Zhang Shanrui delivered a keynote titled “Building a Sustainable Future on the Foundation of Trust.” He thanked customers for 13 years of support and highlighted LGMG’s

commitment to innovation and sustainable development. Emphasizing the pl local action,” he underscored that LGMG aims to not only deliver produ becoming a trusted global partner. President Zhang also unveiled the LGMG company’s dedication to sustainability.

At the conclusion of the conference, LGMG Chairman Yu Mengsheng made a major announcement of the **LGMG 2030+ Strategy**, outlining an ambitious blueprint and clear roadmap for global expansion. He stated that, with the vision of “becoming an international industry leader and a global leading manufacturer of mining equipment, aerial work, and material handling solutions,” LGMG will accelerate the development of global business and services, strengthen the cultivation of new energy and automated products and technologies, drive strategic transformation, and enhance production efficiency through optimized processes and structures—sending a powerful message of Chinese intelligent manufacturing reaching the pinnacle of the world!

Up-Close Experience, Feeling the Power of Technology

After the Global Customer Conference, LGMG hosted an interactive showcase at its factory. Visitors toured the digital factory, where robotic arms performed precise welding, AGVs transported components smoothly, and real-time production data was displayed, highlighting the power of smart manufacturing.

In the product experience area, three launches—the full range of forklifts, integrated smart mine storage and charging solutions, and new high-capacity rice milling machines—allowed customers to witness LGMG's craftsmanship and technical expertise firsthand.

Interactive Fun and Human-Machine Collaboration. During breaks, visitors explored the experience area, test-driving equipment and engaging in mini-games to experience the reliability and performance of LGMG products firsthand.

New Product Launches and Intelligent Manufacturing Showcase

In the evening, the LGMG & Huawei Autonomous Driving Test Base was unveiled, along with the launch of the autonomous mining truck series and a large-scale equipment demonstration. Jinan government leaders toured the digital factory and exhibition area.

Sun Bin, Jinan High-Tech Zone Party Secretary, praised LGMG’s 13 years of growth, pledged continued support, and encouraged the company to accelerate its transformation, work with global partners, and become an international industry leader.

The LGMG & Huawei Autonomous Driving Test Base was officially unveiled in the presence of global customers and partners. Attendees included Liu Qiang, Sun Bin, Han Wei, Su Zimeng, Han Shuo, LGMG Chairman Yu Mengsheng, and President Zhang Shanrui.

Welcome Address by LGMG Chairman Yu Mengsheng

Report by Wang Yinshu, Director of LGMG Technical Research Institute

Autonomous Driving Technology Report by Han Shuo, Vice President of Huawei and CEO of Huawei Oil, Gas & Mining Division

Observing Autonomous Driving and Experiencing Technological Empowerment. Following this, LGMG's Super-Charge **Autonomous Mining Truck** series was officially launched. Through application scenario demonstrations, the event clearly showcased the technological breakthroughs and practical value of the

new products, allowing attendees to deeply appreciate LGMG’s outstanding manufacturing.

LGMG proudly introduces the AT45 articulated dump truck. Its articulated design, combined with a high-strength chassis, delivers exceptional load capacity and outstanding maneuverability. With excellent climbing ability, it maintains stable operation and efficient transport even on steep slopes, muddy terrain, or challenging mining conditions, ensuring uninterrupted workflow.

Enjoying Spectacular Performances and Cherishing Wonderful Moments. A thrilling and dazzling equipment show transformed the event venue into a sea of joy. Autonomous mining trucks, forklifts, and other equipment took the stage, showcasing a combination of strength and agility in their “dance moves,” complemented by colorful lighting, delivering a breathtaking and unforgettable performance.

This is a high-caliber technology feast, a gathering of friends across the globe, and above all, a rallying event boldly stepping toward the future! Today, LGMG has built a comprehensive product lineup covering mining equipment, aerial work platforms, and material handling machinery, meeting the needs of diverse applications—from heavy-duty operations to high-altitude work, from mines to industrial parks. With “technology-driven” innovation at its core and an “open and win-win” approach, LGMG is partnering with global collaborators to jointly write a new international chapter of “Intelligent Wins the Future”!
