

World's tallest scissor lift coming to UK

June 20, 2024

@Hire Safe Solutions; Dingli

Hire Safe Solutions has partnered with Chinese manufacturer **Dingli** to build the **Dingli 3730HRT** - the world's tallest scissor lift at 37 metres

With a working height of 37 metres, the Dingli 3730HRT is the world's tallest scissor lift.

The first units of the custom-built machine are expected to arrive in Europe at the end of the summer, with more than 20 units already scheduled for the following year.

The Dingli 3730HRT is suitable for indoor and outdoor application

The world's tallest scissor lift boasts a full **working height** of 37 metres and a four-person 750kg.

The automatic platform extension deck has a range of 2.25m, with a platform size measuring 7.46m x 2.80m (9.71m x 2.80m with deck extended).

Four-wheel steering offers enhance manoeuvrability, as well as rough terrain non-marking tyres making it adaptable to interior and exterior works.

HSS's CEO praised those involved in the design process

Hire Safe Solutions CEO, Gerard Jennings said: "Having worked on the idea for the past three years, it is incredible to see the machine in person for the first time.

"Our great relationship with Dingli has allowed us to bring to the market a machine that is not only the tallest scissor currently on the market but also tailored specifically to meet the needs of our clients. Huge respect and thanks to Dingli, delivering with the quality and efficiency we have come to expect."
