GB/T 43902-2024 Green manufacturing - Implementation guidelines for green supply chain management of
manufacturing enterprises

This document provides guidance and suggestions for manufacturing enterprises to implement green supply c
hain management, including research, analysis, decision-making, implementation preparation, implementatio
n and control, information management, monitoring, measurement and performance evaluation, and continu
ous improvement.

This document is applicable to the green supply chain management of manufacturing enterprises (hereinafter
referred to as "enterprises"), and other types of enterprises can refer to and implement it.
