Hire Safe Solutions Take the First Sinoboom 17m Articulated Booms in GB.

10 Feb 2022 in [News](#)

Hire Safe Solutions the specialist national hirer and leading provider of access hire solutions, has become the first rental company in Great Britain to take delivery of the Sinoboom AB520EJ.

The order for an initial five units demonstrates further investment in and expansion of the Hire Safe Solutions fleet. The new to market machine offers customers throughout Great Britain, the opportunity to be the first to experience the new 17.7m max working height machine.

Hire Safe Solutions Director Gerard Jennings said, "The owners of Pinnacle Platforms are well known to me, I have monitored their progress since they started the new venture back in 2020. So it was a pleasure to get reacquainted and to discuss the options Sinoboom offer. We run a mixed fleet of market leading brands where quality counts. I was really pleased with the build quality and finish, so much so that I placed an order for Five machines, the perfect fit for the fleet my business and my customers".

The AB520EJ is an all-electric, full battery powered, silent, zero emission, long battery life unit that is especially suitable for indoor work. Its narrow body of just 1.9m allows for an almost zero tail sweep and gives an impressive tilt angle up to 5 degrees.

(unrestricted / 2 persons) is 230kg with a weight of 7,300kg and a stowed drive speed of 5.2km/h (3.2mph).

Pinnacle Platforms MD Tim White said, "We were delighted to conclude our negotiations with a positive outcome. Gerard is well known within the industry; it was a pleasure to do business with him. When we advised that we had immediate availability and delivery would be within 10 working days Gerard it's fair to say was pleasantly surprised".

Pinnacle Platforms will be exhibiting at both the 2022 Executive Hire Show (Feb 9-10th) and Vertikal Days (May 11-12th).
