**TQ0030: Tariff rate quota (TRQ) review – review of Developing Country
Exceptions**

Note on countries in receipt of Developing Country Exception and import calculations

On 12 May 2023 the TRA published its [final determination](#) for TQ0030 to the public file. Annex 2 of the final determination report provided a list of developing country members of the WTO. Due to an administrative error during drafting, this list did not include Albania or Moldova, both of whom are developing country members of the WTO.

This note confirms imports from both Albania and Moldova were assessed as developing country members of the WTO as part of the TRA's analysis during the period of investigation and helped form the basis of the TRA's final determination for TQ0030.

In publishing this note, we intend to clarify the record and ensure alignment with the taxation notices that have been issued today (30 June 2023).
