Transition Review No.TS0044

Countervailing duties on Biodiesel originating in Argentina

Notice of update to commodity codes

On 19 October 2023, commodity codes relating to imports of biodiesel were updated to more accurately reflect the current UK tariff system. The updated [Taxation Notice 2020/26](#), published on 25 October 2023, gave effect to that change and lists the updated commodity codes.

The updated commodity codes do not alter the scope or description of the goods that are the subject of this measure.
