TRANSITION REVIEW No. TS0036

Countervailing duties on certain pneumatic tyres used for buses or lorries originating in the People's Republic of China

Public notice

On 20 December 2023 the Trade Remedies Authority (TRA) published a [notice to public file](#) indicating that we did not expect to undertake detailed recalculations of the countervailing amount.

After conducting verification activities and analysing the information available, the TRA now does expect to recalculate the countervailing amount. We are carefully considering our approach to this, and the analysis will be conducted alongside our determinations on whether:

- the importation of the subsidised goods subject to review would be likely to continue or recur if the countervailing amount were no longer applied to those goods; and
- injury to the UK industry would be likely to continue or recur if the countervailing amount were no longer applied to those goods.

The TRA will outline the facts which form the basis for our decisions in the Statement of Essential Facts. This will give parties the opportunity to comment on the information and any calculations before the final determination.
