II - Like goods

‘Like goods’ are goods produced in the UK which are like the goods subject to review in all respects, or with characteristics closely resembling them.

III - Directly competitive goods

‘Directly competitive goods’ are goods produced in the UK which are directly competitive with the goods subject to this transition review.

This can include goods that are not only similar to the goods subject to review, such as a different type or variety, but also includes goods that occupy a position of direct competition with the goods subject to review. A directly competitive good may be one that is substitutable with the goods subject to review.

Please follow the instructions for each question to provide the appropriate information regarding the goods subject to review.

Instructions

The Trade Remedies Investigations Directorate (TRID) of the United Kingdom's Department for International Trade is carrying out a transition review of safeguard measures active under the EU system that the United Kingdom (UK) decided to transition after EU exit. This transition review will assess whether the safeguard measures on certain steel products should be maintained, varied or discontinued in the UK. It will also consider whether the current safeguard measure should be extended.

IV - Why you are being asked to complete this pre-limited examination questionnaire

We are seeking your cooperation as a **UK importer** of the goods subject to review to the UK, to inform our review of whether the current safeguard measure should be maintained, varied, discontinued and/or extended.

This pre-limited examination questionnaire allows us to collect basic information and data about your company. If a large number of UK importers complete this pre-limited examination questionnaire, we will use the information each one provides to help us decide which companies we want to sample for further investigation.

V - Who should complete this form

You should complete this form if you are a UK importer of the goods subject to review.

If you are not a UK importer, please complete either the relevant Pre-Limited Examination Questionnaire or the relevant Registration Form.

VI - Deadline for response

Please submit your completed questionnaire to us via the Trade Remedies Service no later than **15 October 2020**. If you can't provide a completed submission by the given due date and you wish to request an extension, please contact the Case Team ahead of the deadline using the contact details on the cover of this questionnaire.

VII - Note about confidentiality

You will need to submit one confidential version and one non-confidential version of your pre-limited examination questionnaire by the due date. Please ensure that each page of

information you provide is clearly marked either “Confidential” or “Non-Confidential” in the header. It is your responsibility to ensure that the non-confidential version does not contain any confidential information.

Please see <https://www.gov.uk/government/publications/the-uk-trade-remedies-investigations-process/an-introduction-to-our-investigations-process#how-we-handle-confidential-information> for further information on what can be considered confidential and how to prepare a non-confidential version of this questionnaire.

All information provided to TRID in confidence will be treated accordingly, only used for this investigation (excepted in limited circumstance as permitted by regulation 17 of the Trade Remedies (Increase in Imports Causing Serious Injury to UK Producers) (EU Exit) Regulations 2019) and kept in protected systems. The non-confidential version of your submission will be placed on our public file, which is available on <https://www.trade-remedies.service.gov.uk/public/cases/>.

VIII - Period of Investigation

The period of investigation is **1 January 2013 to 31 December 2017** reflecting the period of the original EU investigation.² During the investigation, TRID will use data provided for the period of investigation to assess whether the safeguard measure on certain steel products should be maintained, varied or discontinued in the UK.

In the questions below, you will be asked about data for the POI. Where figures are required, please provide totals of the data for this 5-year-period.

IX - Most recent period

The most recent period is **1 January 2018 to 30 June 2020**. During the investigation, TRID will use data provided for the most recent period to assess whether the safeguard measure on certain steel products should be reduced or extended in the UK.³

² This is the period of investigation set out in the EU Regulation.

³ The MRP is the period which begins immediately after the end of the POI (as specifically defined under reg. 49(4) of the SG Regs. (as amended)) and runs up to the end of the most recent TRQ quarter before initiation of the review. Data for this period is needed to help us consider whether it is appropriate to reduce or extend the period for which the safeguarding measure applies to the goods concerned in the review.

Section A – Activities of your company and any associated parties

A1 – Your company's activities

1. To determine your company's role as an interested party for the purpose of this review, please select the activity/activities of your company below.

- ☒ importer of the goods subject to review into the UK.
- ☐ other (please give details below)

If you have selected 'other', please describe the role of your company in relation to the goods subject to review, like goods or directly competitive goods:

Please answer here

2. Please detail your company's activities.

REBAR:

We believe that the safeguard quotas under Category 13 Rebar should be reassessed by TRID. In particular the individual country quotas allocated to Belarus, Turkey and Ukraine are too low in terms of the regular import volumes needed in the UK market based on average import statistics since 2016. At the same time the 'other countries' quota has been set too high. TRID have included a

total of 691,000mt of Chinese rebar imports in their calculations of average imports from 'Other Countries' between 2013-2017. Chinese rebar was given a tariff of 20pc in January 2016 after an 'anti dumping' case. There have been no Chinese rebar imports since 2016 to UK. Yet China is by far the largest single origin in the 'Other Countries' section on the cumulative average import figures between 2013-2017. So this way TRID have assigned a large part of the 2021 UK import quota for rebar based upon imports between 2013-2015 from a country which still has 20% anti dumping duty on its rebar today. It would be fairer to assess the needs of the UK market for 2021 based upon import volumes since 2016 when the playing field was levelled for other import countries by placing tariffs on China. After which traditional import origins were able to re enter the UK market competitively

A2 – Associated parties and operational links

Please give details of your company and all associated parties involved in the production, import, and/or sales (export and/or domestic) of the goods subject to review during the POI. Both natural persons (individuals) and legal persons (e.g. companies) are considered to be associated where they meet the definition of 'Related Persons' in [regulation 128 of the Customs \(Import Duty\) \(EU Exit\) Regulations 2018](#).

Examples of activities could include manufacturing, exporting, purchasing, warehousing, sales (domestic), sales (export), further processing of the goods subject to review.

	Company name	Location (city, country)	Activities	Relationship
Associated Party 1				
Associated Party 2				

+ Add additional rows as required

Section B – Goods subject to review

In the tables below, please specify each product category of the good(s) subject to review that you imported during the POI by indicating the corresponding product category number. For a definition of the product categories, please refer to the section above on *I - Goods subject to review*.

B1 – Imports

In the table below, please fill in your total import volume and total import value during the POI for each product category you imported.

Product category number	Total import volume (t)	Total import value (GBP)
13 (REBAR)	240,000 to 295,000 MT	£97m to £112m

+ Add additional rows as required

B2 – Sales volume and value

In the table below, please fill in your total UK sales volume and total UK sales value during the POI for each product category you imported.

Product category number	Total sales volume (t)	Total sales value (GBP)
13 (REBAR)	240,000 to 295,000 MT	£96m to £118m

+ Add additional rows as required

B3 – UK upstream and downstream supply chain

As part of this review, we will conduct an Economic Interest Test to assess whether our preliminary decision is in the economic interest of the UK. Therefore, we ask you to help us identify upstream and downstream contributors to our review. Please provide the names

and contact information for any UK-based companies operating upstream or downstream of you in the supply chain for your goods subject to review.

Please answer here

Section C – Additional information

Provide any other relevant information your company considers useful to assist TRID, in the box below.

This may include:

- other companies which you think should receive a questionnaire;
- scope of the investigation, including product categories and/or custom codes you think should be added or removed; and reasons and reasons why substantiated with evidence

REBAR:

For reasons stated we believe that TRID have inaccurately assessed the needs of the UK market for imported rebar by using historical data from 2013-15 including huge volumes of imports from China. In 2015 alone 400,000mt of Chinese rebar came into the UK. China was selling rebar into UK at that time at prices that other traditional importers could not compete with, so these import volumes greatly reduced over that period (Belarus/Turkey in particular). Taking China out of the 'other countries' import figure between 2013-2017 would result in a much lower average for quota calculation. As there will be no imports coming from China as it still has a 20pc duty tariff surely it is inequitable to include its volumes in a calculation of the 'other countries' quota for 2021? And surely it would be fairer to assess the needs of the UK market for imports based on regular annual volumes AFTER China was dumped in January 2016? We have no issue with the total of all import quotas that TRID have designated under category 13 and have been set overall at average import levels for UK. But we believe that TRID should re-examine how the individual country quotas have been set and either allow open access to all non EU origin countries to a bigger 'Other Countries' quota. Or assign individual country quotas based on average imports by country of origin into UK since January 2016. Either way there should be no outcome where the domestic producer is caused injury as imports overall would not increase. There is also a solid economic interest to ensure that a regular flow of imports of rebar are available to independent steel fabricators. The UK domestic producer already has a very large share of the downstream sales market through its own fabricators. Independent fabricators depend on regular import supplies to keep their factories and machines busy and to keep a flow of material to construction sites up and down the UK. There are many businesses involved in the chain of steel rebar imports. Trading companies, fabricators, discharge ports, agents, hauliers, together employing thousands of people and together contributing much larger tax revenues to HMRC than it derives from a single UK manufacturer of this product.
