## Section B – Additional information

Use the box below to provide any other relevant information which you think would be useful to help our review.

This may include:

- other parties which you think should be invited to register an interest in the case;
- scope of the review, including product categories and/or custom codes you think should be added or removed, and reasons why; or
- anything else you consider relevant.

**In our opinion, the UK producers can't manufacture the same wider range of steel products as all EU industry. Thus the scope of the review has to be reduced to only those local products, which the UK industry are able to produce at the consumption level or in large quantities.**
