Section B – Additional information

Use the box below to provide any other relevant information which you think would be useful to help our review.

This may include:

- other parties which you think should be invited to register an interest in the case;
- scope of the review, including product categories and/or custom codes you think should be added or removed, and reasons why; or
- anything else you consider relevant.

Yücel Boru wishes to draw the attention of the TRID to the fact that the UK production of products falling into Product Categories 20, 21 and 26 is insufficient to meet the demand of UK users. Therefore, users must rely on imports from third countries.

As a result, the maintenance of safeguard measures on imports into the UK of the above-mentioned products would have a detrimental effect on the economic situation of UK users and importers.

In light of the above, Yücel Boru is of the opinion that safeguard measures applicable to Product Categories 20, 21 and 26 should be terminated. Should the TRID decide to maintain safeguard measures against imports of products falling into Products Categories 20, 21 and 26, Yücel Boru respectfully requests the TRID to re-determine the applicable tariff-rate quotas applicable to Products Categories 20, 21 and 26 in order to reflect the current flow of imports and thus satisfy the needs of UK users.
