

## **Anti-dumping Investigation No. AD0021**

Anti-dumping investigation in respect of optical fibre cables imported into the United Kingdom originating in the People's Republic of China.

### **Note to the file**

#### **Request for assistance in UK inquiry**

The TRA would like to invite overseas producers and sellers of optical fibre cables in the Republic of Türkiye to assist in providing information for use in this case.

The TRA is undertaking an anti-dumping investigation into optical fibre cables exported to the United Kingdom from the People's Republic of China (PRC). To assist in calculating dumping margins, it may need to use cost of production data for similar goods produced and sold in another country.

The TRA will ask overseas producers and sellers of optical fibre cables in the Republic of Türkiye for certain cost of production data, in particular around the cost of raw fibre.

Any Turkish producers who would like to assist, should contact [AD0021@traderemedies.gov.uk](mailto:AD0021@traderemedies.gov.uk) by 09 January 2023. Let us know if you would like to assist and are unable to meet that deadline. We are happy to discuss any level of involvement.

Further guidance in respect of the TRA's investigations process can be found [here](#).
