

**NOTE TO FILE**

**Review No. SC0039**

**Countervailing duties on imports of continuous filament glass fibre products  
originating in Egypt**

**Request for information**

**OPPORTUNITY TO COMMENT**

As part of this scope review into continuous filament glass fibre products (GFR) originating in Egypt, the Trade Remedies Authority (TRA) requests further submissions regarding any areas of interchangeability between mats and GFR goods produced in the UK.

In our final recommendation in transition review no. TS0009, we stated that “there is evidence that the UK GFR industry produces single-end rovings and wet-chopped strands”. We also “determined that mats are not substitutable for chopped strands or rovings”.

Please provide a response to the following question together with supporting evidence:

- Are there any areas of interchangeability between mats and the GFR goods produced in the UK?

Please provide any other information that you consider relevant to this request.

All responses should be uploaded to the [Trade Remedies Service](#) by 23 August 2023. Please remember to upload responses to this request in both confidential and non-confidential versions according to our external guidance for [submitting and summarising confidential information](#).

Should you have any questions or comments, please do not hesitate to contact us at [SC0039@traderemedies.gov.uk](mailto:SC0039@traderemedies.gov.uk).
