

Case AD0047

Certain Excavators Imported into the United Kingdom from the People's Republic of China

Notification of The Goods

As stated in the [Notice of Initiation](#) (NOI), the description of the goods subject to the investigation is:

- Self-propelled track-laying (i.e., tracked) excavators with a 360° revolving superstructure and with an operating weight of 11,000 kg (i.e., 11 tons) or more.

The units of measurement to be used in this investigation include kilogram (KG) and metric tonne (MT). For clarity any reference to a 'ton' in the goods description should not be read as a reference to the imperial measurement. For the purpose of this investigation ton should be read as a reference to 1000kg, or a metric tonne.
