Note to Public File

Note to public file regarding an addition to the PCN descriptions found in the questionnaires for TD0031.

The Trade Remedies Authority (TRA) is publishing a note to inform parties of an addition to the Product Control Number (PCN) table in the questionnaires.

The PCN description for the goods under review (the goods) includes an explanation for field description 'coating mass' with applicable codes being C13: less than 140g/m², C14: 140 – 200 g/m², C20: 201 – 275 g/m² and C27: greater than 275 g/m². These four codes encompass the different coating masses available for the goods.

The TRA has decided to add the coating mass code 'C00: coating mass unknown' to the PCN description to account for situations where the uncertainty of coating mass may arise.

Should you have any questions or comments in relation to this clarification or any other aspect of the transition review, please contact us at TD0031@traderemedies.gov.uk.
