

**Anti-dumping investigation
Case AD0075
Boom lifts originating in The People's Republic of China (PRC)**

**Notification of Sampling Decision – appropriate representative third
country benchmark producer**

5 May 2026

On 19 December 2025 the Trade Remedies Authority (TRA) initiated an anti-dumping investigation into boom lifts originating in the PRC (the goods concerned) as per our [Notice of Initiation \(NOI\)](#).¹

The TRA has received an allegation made by the applicant that there is a Particular Market Situation (PMS) in the market for the goods concerned in the PRC.

On 2 April 2026, the TRA published a [note to the public file](#) confirming that Mexico had been chosen as an appropriate representative third country benchmark.

The TRA invited producers in Mexico to complete a Registration Form to register to the case in order to provide data to the TRA to construct normal value should a PMS be determined to exist in the Boom Lifts Market in the PRC in accordance with Regulation 7(2)(b) of the Trade Remedies (Dumping and Subsidisation) (EU Exit) Regulations 2019 (“the Regulations”). It should be noted that the TRA is yet to make a determination on this point.

The TRA received completed Registration Forms from two Mexican producers:

- LGMG De Mexico Sa De Cv. (“LGMG Mexico”); and
- Oshkosh Equipment Manufacturing s. de r.l. de c.v. (“JLG Mexico”).

Given the number of responses in the registration period, the TRA is not limiting its examination of Mexican producers.

¹ This is the latest version of the Notice of Initiation, which was published on 27 February 2026 with an update to the commodity codes that the goods concerned are subject to.

Trade Remedies
Authority

The TRA will issue a questionnaire to both registered Mexican producers, namely LGMG Mexico and JLG Mexico.

Those Mexican producers will be expected to provide adequate responses to the questionnaire and allow the TRA to verify the data provided.
