

**AD0086: Anti-dumping investigation regarding imports of rutile titanium dioxide from the People's Republic of China**

**Note to the public file: Cooperation and facts available**

**Non-cooperation**

The TRA may consider an interested party to be non-cooperative if they fail to cooperate with an investigation, for example by not providing sufficient questionnaire responses or not meeting set time limits, or otherwise significantly impeding the progress of the investigation.

Where we have determined that an interested party has failed to cooperate with the investigation, we may disregard any information they have supplied. We will not find a party to be non-cooperative if we determine they have demonstrably acted to the best of their ability to cooperate with us.

If requested information is incomplete, unverifiable, inappropriately submitted or not supplied within a reasonable time, or is disregarded due to non-cooperation, we may be in a position of having to make determinations on the basis of the facts available, including those available from third party sources and/or those contained in the application for the initiation of the investigation by the domestic industry.

This could in turn lead to a result which is less favourable to the party in question – for instance, it may affect the duty rate that applies to them.

Further information regarding the investigation process is available here:
