

**SUBSIDY INVESTIGATION
CASE No. AS0088
Glass containers originating in the Republic of Türkiye (Türkiye)
Notification of amended sample**

12 June 2026

The Trade Remedies Authority (TRA) has decided to limit the issuing of questionnaires to a sample of certain interested parties in accordance with regulations 54(4) and 57 of the Trade Remedies (Dumping and Subsidisation) (EU Exit) Regulations 2019 (the Regulations) to determine whether imports of the goods concerned are subsidised, whether the subsidised imports have caused or are causing injury to a UK industry, and the amount necessary to remove injury.

On 10 April 2026 the TRA published a notice of a [proposed sample](#) of UK producers, importers, and overseas exporters. The TRA received one [submission](#) in response from AEGG LTD to confirm that it is content to be a sampled importer, and included a suggestion that Encirc should be sampled as a UK producer.

On 21 April 2026 the TRA published its [notification of final sample](#).

Since then, following the analysis of questionnaire responses from interested parties, the TRA determined that it was appropriate to amend its sampling decision by adding “SISECAM UK PLC” as a sampled UK importer due to its association with Şişecam Group.

This notification details the TRA’s amended sampling approach following the notice of a proposed and final sample. It is not intended to preclude the TRA from limiting its examination further at a later stage.

UK producer sampling

Based on the information available to the TRA, the sample is composed of the following UK producers:

1. BEATSON CLARK LIMITED;
2. VERALLIA UK LIMITED; and
3. ARDAGH GLASS LIMITED.

In accordance with regulation 57(3) of the Regulations, the sample is based on a reasonable method of three UK producers of varying sizes which produce a wide variety of glass containers. This will enable an accurate representation of the wider UK industry and will assist with PCN matching if required later in the investigation.

In accordance with regulation 54(4) of the Regulations, the TRA is limiting the issuing of a questionnaire to those UK producers included in the sample.

Sampled UK producers will be expected to provide adequate responses to the questionnaire and allow the TRA to verify the data provided.

Other UK producers have registered to the case but will not be included in the sample. They are still able to make submissions to the investigation.

Importer sampling

Based on the information available to the TRA, the sample is composed of the following importers:

1. AEGG LTD;
2. PATTESONS GLASS LIMITED; and
3. SISECAM UK PLC.*

In accordance with Regulation 57(3) of the Regulations, the sample is based on a reasonable method of the two importers (without associations to overseas exporters) with the largest volume of imports of the goods concerned originating in Türkiye to the UK during the POI that the TRA is reasonably able to investigate.

*SISECAM UK PLC was added on 12 June 2026 for the reasons detailed on page 1.

In accordance with regulation 54(4) of the Regulations, the TRA is limiting the issuing of a questionnaire to those importers included in the sample.

Sampled importers will be expected to provide adequate responses to the questionnaire and allow the TRA to verify the data provided.

Other importers have registered to the case but will not be included in the sample. They are still able to make submissions to the investigation.

Overseas exporter sampling

Based on the information available to the TRA, the sample is composed of the following overseas exporters:

1. Şişecam Group, comprising of:
 - a. Türkiye Şişe ve Cam Fabrikaları A.Ş.; and
 - b. Şişecam Dış Ticaret A.Ş..

2. Gürok Group, comprising of:
 - a. Gürok Pazarlama ve Ticaret A.S.; and
 - b. Gurok Turizm ve Madencilik A.Ş.

Each of the companies mentioned above, within a group, will be sent a questionnaire.

In accordance with regulation 57(3) of the Regulations, the sample is based on a reasonable method of the largest volume of exports of the goods concerned originating in Türkiye to the UK during the POI that the TRA is reasonably able to investigate.

In accordance with regulation 54(4) of the Regulations, the TRA is limiting the issuing of a questionnaire to those overseas exporters included in the sample.

Sampled overseas exporters will be expected to provide adequate responses to the questionnaire and allow the TRA to verify the data provided.

Other overseas exporters have registered to the case but will not be included in the sample. They are still able to make submissions to the investigation.

Requesting individual treatment

An overseas exporter who is not included in the sample may request that the TRA calculate an individual countervailing duty provided that the overseas exporter supplies the necessary information in time for that information to be considered during the course of the investigation. A request must be made via the [Trade Remedies Service](#) (TRS).

The TRA will accept such a request unless the number of overseas exporters is so large that individual examination would prevent the timely completion of the investigation.
