

**NON-CONFIDENTIAL VERSION**

This document is a non-confidential version of the submission to the UK Trade Remedies Authority.

Certain information has been redacted to protect confidential business information, including commercially sensitive data relating to pricing, costs, production processes, proprietary formulas, technical know-how, and supply chain arrangements. Where possible, such information has been replaced with non-confidential summaries or indicative ranges in accordance with the Authority's requirements. This version is suitable for inclusion on the public file.

# Registration form for third country producers

Case No: AD0086:

## Anti-dumping investigation into rutile titanium dioxide exported from the People's Republic of China

Completed on behalf of (provide the name of your business or organisation):	The Chemours Company México, S. de R.L. de C.V.
Location(s) of production facility/facilities (country):	Altamira, Tamaulipas, Mexico

Note:

Please provide **two copies of your response to this form**: a **confidential** and a **non-confidential** version. Both copies must be returned to the TRA using the Trade Remedies Service ([www.trade-remedies.service.gov.uk](http://www.trade-remedies.service.gov.uk)).

When you have completed each form, indicate the **confidentiality** status of the document by placing an  in the relevant box below and in the header of the form. We strongly recommend this questionnaire be completed on a computer, so this step is easy to complete.

- Confidential
- Non-confidential (will be made available on the public file: <https://www.trade-remedies.service.gov.uk/public/cases/>)

Deadline for response:	23:59 UK time on 16 April 2026
------------------------	--------------------------------

Case team contact:	<a href="mailto:AD0086@traderemedies.gov.uk">AD0086@traderemedies.gov.uk</a>

## The scope of this investigation

### Like goods

This investigation covers **rutile titanium dioxide** exported from **the People's Republic of China (PRC)**, described as:

Rutile titanium oxides in pigments and preparations based on rutile titanium dioxide, containing a minimum of 80% by weight of titanium dioxide calculated on the dry matter and having all types of particle sizes, classified under Chemical Abstracts Service Registry Numbers 12065-65-5 and 13463-67-7.

These **goods** are currently classifiable within the following commodity codes

- 2823 0000 10
- 2823 0000 30
- 2823 0000 80
- 2823 0000 83
- 3206 1100 10
- 3206 1100 30
- 3206 1100 80
- 3206 1100 85

These codes are given for information only.

This registration form will ask about your production and sales of like goods. Any reference to '**like goods**' in this questionnaire refers to goods which are like the goods concerned in all respects, or with characteristics closely resembling them.

Where this questionnaire refers to 'all goods', this means all goods that are produced by you.

## Who should complete this form

Following registration, a number of countries have been recommended to us to use as an appropriate representative third country:

- Brazil
- India
- Malaysia
- Mexico
- Morocco
- South Korea

You should complete this form if you are a producer of the like goods in any of the above countries and you are able and willing to provide information to this investigation.

### Why you are being asked to complete this registration form

The TRA has received an allegation that a Particular Market Situation (PMS) may exist in the rutile titanium dioxide industry in the PRC.

The TRA has yet to make a determination in relation to this allegation. However where it is determined that a PMS exists and the effect of the PMS is that sales in the domestic market of the exporting country or territory do not permit a proper comparison between the like goods destined for consumption in the exporting country or territory and the goods concerned in our investigation, we would not consider the comparable price (the price of the goods, in the ordinary course of trade, destined for consumption in the exporting country or territory) appropriate to use for the purpose of determining their normal value.

In such circumstances, the TRA may determine the normal value by determining the costs of production plus a reasonable amount for administrative, selling, and general costs and for profits. Adjustments may then be made to these figures using data from an appropriate representative third country

We are considering the above listed countries as potentially appropriate representative third country in this investigation, should it be required.

We are therefore inviting producers in these countries (Brazil, India, Malaysia, Mexico, Morocco and South Korea) to participate in the investigation and to provide certain sales and cost data which will help us:

- Understand costs, manufacturing and sales for the like goods; and,
- Compare the data against figures from the PRC.

If a large number of producers of the like goods complete registration, we will use the information each one provides to help us decide which companies we want to sample for further involvement. If you are sampled, we will send you a more detailed questionnaire to complete.

### **Deadline for response**

A completed registration form must be submitted to the TRA by no later than 23:59 UK time on 16 April 2026. If you are unable to provide a completed submission by the given deadline and you wish to request an extension, please contact [AD0086@traderemedies.gov.uk](mailto:AD0086@traderemedies.gov.uk) and see the TRA's guidance on extension requests for further information.

### **Note about confidentiality**

You will need to submit one confidential version and one non-confidential version of your registration form by the deadline. Please ensure that each page of information you provide is clearly marked either "Confidential" or "Non-confidential" in the header.

It is your responsibility to ensure that the non-confidential version does not contain any confidential information, which includes personal contact information, names and signatures. Please see the TRA's [public guidance](#) for further information on what can be considered confidential and how to prepare a non-confidential version of this questionnaire.

All information provided to the TRA in confidence will be treated accordingly and only used for this investigation (except in limited circumstance as permitted by regulation 46 of the Trade Remedies (Dumping and Subsidisation) (EU Exit) Regulations 2019) and will be stored in protected systems.

The non-confidential version of your submission will be placed on the public file, which is available on [www.trade-remedies.service.gov.uk/public/cases/AD0058/](http://www.trade-remedies.service.gov.uk/public/cases/AD0058/).

## Section A – Activities of your company and any associated parties

### A1 – Your company’s activities

To determine your company’s role for the purpose of this investigation, please select the activity/activities of your company below. For a definition of like goods please refer to above section [‘the scope of this investigation’](#).

- overseas producer of the like goods
- other (please give details below)

If you have selected ‘other’, please describe the role of your company with regards to the like goods:

Click or tap here to enter text.

### A2 – Associated parties and operational links

Please give details of all associated parties involved with the company in the production and sales (export and/or domestic) of the like goods during the POI. Both natural persons (individuals) and legal persons (e.g. companies) are considered to be associated where they meet the definition of ‘Related Persons’ in [regulation 128 of the Customs \(Import Duty\) \(EU Exit\) Regulations 2018](#).

Examples of activities could include manufacturing, exporting, purchasing, warehousing, sales (domestic), sales (export), further processing of the like goods.

	Company name	Company location (city, country)	Activities	Relationship
Associated party 1	The Chemours Company México, S. de R.L. de C.V.	Carretera Tampico – Mante Km 14.5, Altamira, Tamaulipas C.P. 89603, Mexico	Producer	Affiliate

Associated party 2	Chemours International Operations Sàrl	Chemin de Blandonnet 8, 1214 Vernier, Geneva, Switzerland	Sales	Affiliate
Associated party 3	The Chemours Company UK Ltd.	1 <sup>st</sup> Floor, 1 <sup>st</sup> St James Market, London SW1Y 4AH United Kingdom	Sales, distribution, [•]	Affiliate
Associated party 4	[•]	[•]	[•]	Affiliate

+ Add additional rows as required

## Section B – Production and sales volumes

### B1 – Production

Please fill in your company's total production volume and capacity for the like goods in the table below.

POI: 01-01-2025 to 31-12-2025	Volume (kilo ton)
Total production of the like goods during the POI	250 - 300
Total production capacity of the like goods during the POI	330

### B2 – Sales volume and value

Please provide the total sales volumes and sales price values in the table below.

POI: 01-01-2025 to 31-12-2025	Volume (kilo ton)	Value in invoice currency (USD Millions)	Value in GBP (£ Million)	Conversion Rate (GBP/USD)
Total export sales of the like goods to all countries during the POI manufactured by your company	250 – 300	715 – 990	542 – 750	1.3188
Total export sales of the like goods to all countries during the POI not manufactured by your company	0	0	0	1.3188
Total export sales, <u>to the PRC</u> of the like goods during the POI manufactured by your company	20 - 30	63 – 103	48 – 78	1.3188
Total export sales, <u>to the PRC</u> of the like goods during the POI not manufactured by your company	0	0	0	1.3188
Total export sales, <u>to the UK</u> of the like goods during the POI manufactured by your company	10 - 20	32 – 67	24 – 51	1.3188
Total export sales, <u>to the UK</u> of the like goods during the POI not manufactured by your company	0	0	0	1.3188
Total <u>domestic sales</u> of the like goods during the POI manufactured by your company	25 - 35	75 – 112	57 - 85	1.3188
Total <u>domestic sales</u> of the like goods during the POI not manufactured by your company	0	0	0	1.3188

### B3 – Commodity codes

Please provide details of the commodity code(s) under which you export the like goods in the box below:

3206 1100 10

## Section C – Raw materials

### C1- Raw materials used in production

Please describe your production process(es) for rutile titanium dioxide and provide details of the raw materials used to produce your like goods in the box below. For example, titanium feedstock, chloride, sulphate, caustic soda.

Chemours Mexico produces rutile titanium dioxide pigment exclusively using the chloride process. In the chloride process, titanium-bearing feedstock (such as [•]) is reacted with chlorine gas in the presence of a carbon source (e.g., [•]) at a high temperature to produce titanium tetrachloride (TiCl<sub>4</sub>). The crude TiCl<sub>4</sub> is then purified through condensation and distillation to remove impurities. The purified TiCl<sub>4</sub> is subsequently oxidized at elevated temperatures in the presence of oxygen to titanium dioxide (TiO<sub>2</sub>) particles and chlorine gas. The resulting TiO<sub>2</sub> is then subjected to finishing steps, including surface treatment ([•]), followed by washing, filtration, drying, and micronization, to achieve the desired pigment properties.

The principal raw materials used in the chloride process include:

- Titanium-bearing feedstock (such as [•]);
- Chlorine gas;
- Petroleum coke;
- Oxygen;
- Surface treatment agents (e.g., [•]); and
- Process chemicals such as caustic soda and acids used in purification and finishing stages.

Utilities such as electricity, natural gas, and water are also used throughout the production process.

### C2 – Sources of titanium feedstock / chloride / sulphate

Please provide details of the suppliers and/or sources of the main raw materials that you use.

## Section D – Additional information

### D1 – Other interested parties

If you believe there are other interested parties that should receive a registration form, please provide their organisation name and website details below.

Organisation name	Website

### D2 – Anything else

Please use the box below to provide information about anything else you consider relevant to this investigation.

Chemours Mexico submits that Mexico is not an appropriate benchmark for this ADD case and respectfully requests that the Trade Remedies Authority instead consider Brazil as the more suitable benchmark jurisdiction.

[•]

Now you have reached the end of this registration form please ensure that you have prepared a confidential and non-confidential version and indicated the status of each within the header. The non-confidential version must not include personal contact information, names, signatures, and exact sales quotes. Redacted figures should be replaced with a range where possible. Please return both versions to the TRA using the Trade Remedies Service ([trade-remedies.service.gov.uk](https://trade-remedies.service.gov.uk)).
