rent land, buy equipment, Fengshen production accelerates again

2018-12-26 18:06

On December 12, Fengshen Tire Co., Ltd. released the latest news that through negotiations with two related parties, it has obtained the ownership of a number of engineering radial tire production equipment, as well as a large area of industrial land use rights located in Jiaozuo City, insiders said that **Fengshen** production will be accelerated again after the completion of the transaction.

According to the company, Fengshen has purchased the necessary equipment for the engineering radial tire technical transformation project from Guilin Rubber, including a steel wire cord cutting machine with bundle layer and carcass combination, an all-steel radial giant tire two-method forming machine and a supporting extrusion winding line, etc., with an equipment assessment price of 2581.13 million yuan.

The relevant person in charge added that the equipment purchased this time is in line with the production requirements of the technical transformation project, buying equipment directly from Guilin Rubber can shorten the procurement cycle, and the mature engineering tire equipment owned by Guilin Rubber can also accelerate the project process, and after the completion of the technical transformation project, Fengshen Tire can further strengthen and optimize the engineering radial tire business and improve the profitability of the enterprise.

In addition, Fengshen Tire also signed the "State-owned Land Use Right Lease Contract" with Henan Tire Group on the same day, leasing 215,88 square meters of land owned by the latter at an annual price of 48,62,7000 yuan, which is located on the east side of Jiaozuo South Road and the south side of Industrial Road in Jiaozuo City, with a total contract amount of about <> million yuan.

According to the content of the agreement, because the chairman of Henan Tire Group is Jiao Mengyuan, a director of Fengshen Tire, the two parties constitute a related party transaction, and this part of the land will be used as a place for Fengshen production and operation and daily office, and continue to lease to ensure the normal development of its
