Installed Production Capacity

In 2022, the installed production capacity for passenger car radial tires (PCR), TBR tires, Bias tires and Motorcycle tires remained unchanged at 55,000, 2,500 14,500 and 95,000 tires per day respectively. Compared to the installed production capacity, the available production capacity is lower for the tire segments, to account for routine maintenance and product changes. In 2022 the available production capacity for passenger car radial (PCR) tires, TBR tires, Bias tires and motorcycle tires stood at 45,500, 2,300, 13,000 and 83,000 tires per day respectively.

The production capacity for non-tire products was unchanged at 75,000 tons for synthetic rubber, 40,000 tons for tire cords and 20,000 tons for nylon filament yarn.

Jenis Produk / Type of Products	Kapasitas yang Terpasang / Year-end Installed Capacity		Kapasitas yang Tersedia / Available Production Capacity		Kapasitas utilisasi / Capacity Utilization *)	
	2022	2021	2022	2021	2022	2021
PCR Tire (pcs/day)	55.000	55.000	45.500	45.500	71%	78%
TBR Tire (pcs/day)	2.500	2.500	2.300	2.300	95%	84%
Bias Tire (pcs/day)	14.500	14.500	13.000	13.000	75%	79%
Motorcycle Tire (pcs/day)	95.000	95.000	83.000	83.000	83%	79%
SBR (Ton/year)	75.000	75.000	75.000	75.000	66%	68%
Tire Cord (Ton/year)	40.000	40.000	40.000	40.000	54%	56%
Nylon Filament Yarn (Ton/year)	20.000	20.000	20.000	20.000	67%	73%
