Founded in 1970, Holley Group is a private enterprise group based on Holley Group Co., Ltd., with medicine as its core business and diversified investment development. , China's top 500 private

GOV

The Thailand-China Rayong Industrial Park has been developed since 2005. The park is located on the east coast of Thailand, close to the Thai capital Bangkok and the Laem Chabang Deep-water Port. It has become one of the industrial cluster centers and manufacturing export bases of China's traditional advantageous industries in Thailand.

2. Park planning and construction progress

The overall planning area of the park is 12 square kilometers, the first phase is 1.5 square kilometers, the second phase is 2.5 square kilometers, and the third phase is 8 square kilometers. At present, the development and investment attraction of the first and second phases have been completed, and the development and investment attraction of the third phase of 8 square kilometers is in progress. At present, the infrastructure construction of the park is progressing smoothly, and the supporting facilities such as water, electricity, natural gas and roads are complete.

3. Industrial positioning and supporting services in the park

Among the ASEAN countries, Thailand's economy has grown steadily every year, and its market potential is huge. At the same time, Thailand is located in the center of Southeast Asia, and has good relations with major trading economies such as Europe, America, Japan, and India, and its products can radiate to other ASEAN members and countries that have established free trade zones with Thailand.

Since the establishment of diplomatic relations between China and Thailand, the bilateral relations have developed steadily, the political mutual trust between the two countries has deepened day by day, and the economic and trade cooperation has achieved remarkable results. The main industrial positioning of the park involves auto and motorcycle parts and their parts, new energy, new materials, machinery, electronics, hardware and other Chinese enterprises entering the park to set up factories, including general industrial areas, bonded areas, logistics storage areas, and commercial and living areas. Chinese-funded enterprises entering the park enjoy full exemption of corporate income tax for up to eight years, exemption from paying tariffs on imported machinery for eight years and exemption from paying tariffs on imported raw materials for export for five years. They can bring in foreign technicians or experts and their spouses, and foreigners can own Land ownership and other preferential policies. The Thailand-China Rayong Industrial Park puts forward the investment promotion concept of "touching customer" and implements a 24-hour "one-stop" Chinese service. The Thai-Chinese Rayong Industrial Park has set up a professional team composed of Chinese and Thai employees to provide one-stop investment services for enterprises entering the park.

4. Comprehensive benefits of the park

After more than 10 years of construction and investment promotion, the Thai-Chinese Rayong Industrial Park has developed 8 square kilometers and currently has 150 Chinese companies settled in. The industry involves automobile and motorcycle parts and their parts, new energy, new materials, machinery, electronics, hardware, etc. Enterprises, driving Chinese enterprises to invest more than 3.5 billion US dollars in Thailand, with a cumulative total output value of 17.3 billion US dollars.

From the very beginning of the construction of the park, it has taken Thailand as its home, positioned itself as a local Thai enterprise, and integrated into the local culture. Paying attention to fulfilling social responsibilities, integrating into the cultural atmosphere of charity, taking benevolence and doing good deeds as our own responsibility, we have been actively participating in charity and public welfare undertakings in Thailand for many

donations and other public welfare activities in Rayong, Kanchanaburi and other places.

V. Summary of the development model and experience of the park construction

With the strong support of the Chinese and Thai governments, the Thai-Chinese Rayong Industrial Park has only achieved remarkable social benefits, but also achieved relatively good economic benefits in the park itself. T healthy fast track to sustainable development.

Allowing Chinese-funded enterprises to settle in the park is only the first step. Enabling enterprises to take rc in Thailand for a long time is the direction of the park's efforts. Therefore, in addition to improving infrastructure ar living facilities, the park must also provide high-quality services for the park enterprises. Create a good entrepreneurial environment for Chinese-funded enterprises. Through the Rayong Chamber of Commerce of the Chinese Enterprises General Chamber of Commerce in Thailand, the park carries out a series of activities around four aspects: "Compliant Enterprise", "Caring for Employees", "Social Exchange", and "Embassy Activities" to provide personal services for enterprises entering the park. At the same time, it signed a memorandum of cooperation with financial institutions (Industrial and Commercial Bank of China, Bank of China) to solve the capi bottleneck in corporate investment.

6. Countermeasures and services for the prevention and control of the new crown epidemic

The Thai-Chinese Rayong Industrial Park responded to the fight against the epidemic immediately. Many companies in the park have established leading groups to fight the virus infection. More companies are directly organized by members of the general manager team. Every company has solid measures to prevent the spread of the virus. There is no slack in controlling the epidemic. The park purchased masks and other anti-epidemic mater through various channels, and provided them to enterprises entering the park free of charge. At the same time, it also donated anti-epidemic materials to local governments, hospitals and other institutions in Thailand. In terms of anti-epidemic, the park has formulated several effective measures, requiring all those who return to Thailand to s in TCTOWN to register and record, and self-isolate for 14 days. A thermometer is placed on the first floor of each building, and the occupants are required to measure their body temperature at any time. Wear masks in public places, clean up the environment, please come to the national epidemic prevention department for disinfection, require restaurants, shops, car rental companies and small hotels to attach great importance to cleanliness, repo any violations immediately, and send people who feel unwell to the hospital immediately.
