PTG investing to increase capacity in Egypt

Date: 9th January 2023 Author: Stephen Goodchild

Comments: 0

Prometeon Tyre Group has shared details of the planned investment in its factory in Alexandria, Egypt. The tyre maker announced in 2022 that it would invest approximately 30 million euros to lift production capacity and to upgrade the plant's technology. Post investment, the facility in Egypt will be capable of making 1.1 million tyres annually, with production of Pirelli Serie 02 tyres increasing.
