Summary

Sinochem Holdings Corporation Ltd. (Sinochem Holdings) was established through the joint venture of Sinochem Co., Ltd. and China National Chemical Corporation Ltd. on May 8, 2021. Sinochem Holdings is a state-owned enterprises under the supervision of the SASAC (State-owned Assets Supervision and Administration Commission of the State Council). It boasts over 220,000 employees.

With operations in eight business sectors covering life science, materials science, petrochemicals, rubber & tire, machinery & equipment, city operation, and industrial finance, Sinochem Holdings is one of the world's leading chemical conglomerates. It has 17 listed domestic and overseas companies including Sinochem (600486.SH), Adama (000553.SZ), Adisseo (600299.SH), Sinochem International (600509.SH), Haohua Technology (600378.SH), Elkem (ELK.OL), Pirelli (PIRC.MI), and China Jinrong. Sinochem Holdings owns production bases and R&D facilities in more than 150 countries and regions around the world, and has a global marketing network. With total assets amounting to RMB 1.5 trillion and annual revenue of RMB 1.2 trillion in 2021, Sinochem Holdings ranks 31st in the 2022 Fortune 500 list, and 1st in the chemical industry.

In the area of life science, Sinochem Holdings is leading the world in agrochemicals. Sinochem's agrochemical business covers seeds, plant protection, crop nutrition, modern agricultural machinery, and chain of digital agriculture. Syngenta Group, a subsidiary of Sinochem Holdings, is the world's leading agrochemical technology innovation. With animal nutrition business that encompasses methionine, vitamin, and other feed additives, Sinochem Holdings is a comprehensive provider of animal feed additives and nutritional products.

Sinochem Holdings reached the top-tier level in materials research globally, enjoying core competencies in fluorine and silicon-based materials, engineering plastics, polymer additives, electronic special fibers, etc. Sinochem Holdings provides material solutions for key areas of people's livelihoods, such as electronics, automobiles, construction, next-generation communication, projects, and medical care.

The petrochemical business boasts a development model that features upstream and downstream integration, including petroleum trading, petroleum refining, warehousing and logistics, and petrochemical products. Sinochem Holdings has become one of the most competitive petrochemical players in China.

Environmental science is an emerging business that is strategically important to Sinochem Holdings. The company focuses on industrial environmental protection, covering treatment of polluted soil, solid, liquid, and gas waste, and safeguard the green development of the chemical industry, making it a key player in the industry.

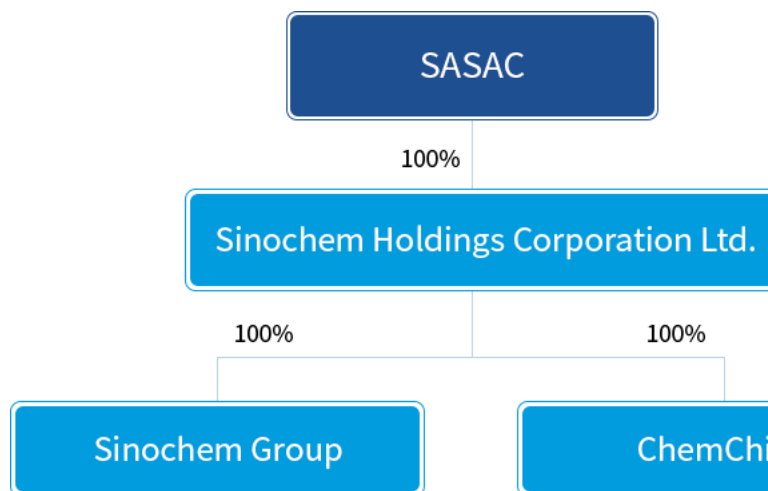

Its rubber and tire business is leading the world in high-end/ultra-high-end passenger car tires. Sinochem Holdings is the preferred partner of world's renowned automakers such as Volkswagen, Ford, and Aeolus.

The mechanical equipment business of Sinochem Holdings encompasses plastic machinery, mechanical equipment and modern manufacturing services. It provides world-leading holistic chemical equipment and modern manufacturing services.

Its urban operation business leads the industry within China. Sinochem Holdings is one of the leading companies with real estate as a main business that has been approved by the SASAC and also serves as a comprehensive service provider in China.

The company's industrial finance business possesses multiple financial business licenses in the industry and finance and serves the industry with finance and technology.

Looking ahead, Sinochem Holdings will uphold the company's value of "In Science We Innovate" and continue to be a leading chemical conglomerate led by life science and materials science, supporting environmental science, and driven by technology. Sinochem Holdings will constantly improve its core competitiveness and sustainability to create maximum value for clients and also aims to contribute to social progress and the development of the chemical industry.
