The new channel for tire delivery, the first shipment to overseas!

Release time: 2023-05-12 Source: China Rubber Net Author: Xu Yiming

On May 9, 4,520 tires produced by Shaanxi Yanchang Petroleum Group Rubber Co., Ltd. departed from Xi'an International Land Port Station on a sea-rail intermodal train and were sold overseas.

This is the concentrated shipment after the company has successfully tested and shipped several times this year, and it is also the first time that Shaanxi rubber tires have been exported to Indonesia through the new channel train.

The value of this batch of tires is about 3.2 million yuan, and will enjoy the tax refund policy of the port of departure.

The entire sea-rail combined transportation takes about 10 days, and will be sold to Jakarta, Indonesia and other places in the future.

"China Rubber" magazine learned that this extended rubber shipment adopted a customized "one box to the end" logistics solution directly from the factory.

In the first quarter of this year, the sales volume of Yanchang rubber increased by 49% year-on-year (the same below), and the operating income increased by 45.67%.

Foreign trade sales accounted for 45.69%, and the export delivery value was 200 million yuan, an increase of 55.49%.

The scale of the foreign trade market continues to expand, which has become a highlight in the company's production and operation.
