

# "National Logistics Hub Network Construction Implementation Plan (2021-2025)" Released

| People's Daily Online 2021-07-13

People's Daily Online, Beijing, July 10th. Recently, in order to promote the construction of national logistics hubs during the "14th Five-Year Plan" period with high quality, promote the formation of a backbone logistics infrastructure network and a backbone multimodal transport system with the national logistics hub as the core, and support the construction of the following The National Development and Reform Commission has issued the "National Logistics Hub Network Construction Implementation Plan (2021-2025)" (hereinafter referred to as the "Plan").

The "Plan" pointed out that during the "14th Five-Year Plan" period, we will focus on building a modern logistics operation system of "channel + hub + network". On the one hand, focus on promoting the high-quality development of existing national logistics hubs, integrate and optimize existing logistics facilities, strengthen multimodal transport organization capabilities, promote the interconnection of national logistics hubs, and promote the improvement of "hub-and-spoke" logistics services supported by national logistics hubs system; cultivate and develop the hub economic channel economy, and create economic and industrial development corridors. On the other hand, focusing on accelerating the improvement of the national logistics hub network, in accordance with the principle of "one mature, one in place", steadily promote the layout and construction of about 120 national logistics hubs; support the joint construction, sharing and integration of national logistics hubs in urban agglomerations, strengthen the The metropolitan logistics network system is organically connected and coordinated with the national logistics hub network.

The "Plan" requires that the development and reform commissions of all provinces, autonomous regions, municipalities directly under the

Xinjiang Production and Construction Corps, in conjunction with relevant departments, guide the people's governments of cities carrying national logistics hubs to increase national logistics in accordance with the requirements of the "National Logistics Hub Layout and Construction Plan". Focus on hub cultivation, scientifically formulate the national logistics hub construction plan, and timely select the best logistics hubs with more mature conditions to participate in the declaration (submit to the National Development and Reform Commission before May 31 each year, and the deadline for 2021 declaration is August 20) . At the same time, coordinate and promote the implementation of relevant policies for national logistics hubs, continuously optimize the development environment for hub construction, and increase policy support.

The "Plan" clearly states that the National Development and Reform Commission will work with relevant parties to strengthen the dynamic monitoring and evaluation of the construction and operation of the national logistics hubs that have been included in the annual construction list, promote the improvement of the hub cultivation and development coordination mechanism, and coordinate the promotion of hub layout construction. At the same time, adjust and optimize the layout of the national logistics hub carrying cities in a timely manner based on the actual situation, focus on making up for the shortcomings of hubs in inland areas, optimize the layout of hubs in coastal areas, and promote a balanced regional distribution of the national logistics hub network.
