Systems

L Long Distance

Long distance driving on highways and smooth-riding roads, striving to achieve longer journeys.

H Mid-long Distance

Mid-long distance driving on highways, national highways, and ordinary highways, with a long driving life.

U Urban

City buses, driving in urban areas.

M Unpaved Road

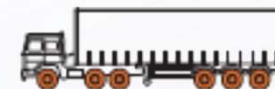

Driving on unpaved roads such as industrial, mining, and construction sites.

About Us Market Trends

Products

Tire Management
Systems

Distribution
Systems

- DL10 is an energy-saving, economical, and environment-friendly product developed by Hankook for long-distance transportation, used in drive position;
- Pattern structure design of reinforced tread, maintaining good driving force, and preventing irregular wear of tire shoulders.

● Suitable ● Able

Introduction

- Long distance, used in drive position
- Energy-saving x economical x environment-friendly
- Special rubber formula for long-distance high-speed driving
- Balancing long-distance driving performance and driving power

Operating Specifications

• Durability

• Long mileage

AH31 SMaRT FLeX

About Us Market Trends

Products

Tire Management Systems

Distribution Systems

- AH31 is a product developed by Hankook for middle and long distances, suitable for guide wheel and used in all position;
- The application of 3D pattern incision design provides good traction performance, improves driving mileage and reduces irregular wear, thus earning the iF Design Award.

Introduction

- Mid-long distance, suitable for guide wheel and used in all position
- Application of new 3D incision technology, improving traction performance and preventing eccentric wear
- New rubber formula and pattern design, excellent performance and cost advantages

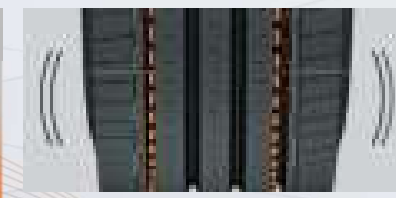

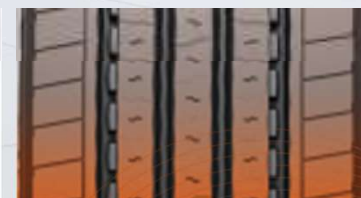

Operating Specifications

Specifications	Level
11R22.5	16
12R22.5	16
275/70R22.5	16
275/80R22.5	16
295/80R22.5	18
315/60R22.5	16
315/70R22.5	20
385/55R22.5	18

Design Features • Traction performance • Stability

• Long mileage & wear resistance

● Suitable ● Able

Comparison of Basic Product Information

- Hankook selected three products for performance analysis and vehicle field test;
- HK products have average pattern depth and weight, and there is no significant difference between products over other basic information.

Brand		Hankook	A	B	C
Pattern		AH31	A***	B***	C***
Image					
Specifications		12R22.5	12R22.5	12R22.5	12R22.5
Level		18	18	18	18
Size Information	Outer Diameter (mm)	1086	1085	1087	1085
	Section Width (mm)	296	296.5	298	303.4
	Tread Width (mm)	222	234	231	235
	Pattern Depth (mm)	16	16.3	15.7	16
	Weight (kg)	61.4	62.6	62.8	63.6
Load (kg)	Single Tire (kg)	3550	3550	3550	3550
	Double Tire (kg)	3250	3250	3250	3250
Load Index/Speed Level		152/149L	152/149L	152/149L	152/149L

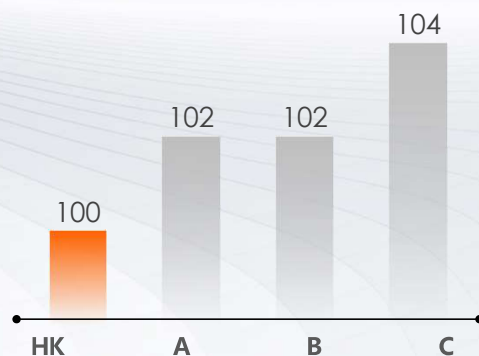

Product Performance Comparison Results

- In terms of weight, HK AH31 is a low fuel consumption product compared to its competitors' lightweight products;
- Compared to competitors, the wear resistance index of Hankook has improved by an average of **5%**, and the rolling index has reached 5.5, making it more **fuel-efficient** and improve fuel consumption by **3-6%**.

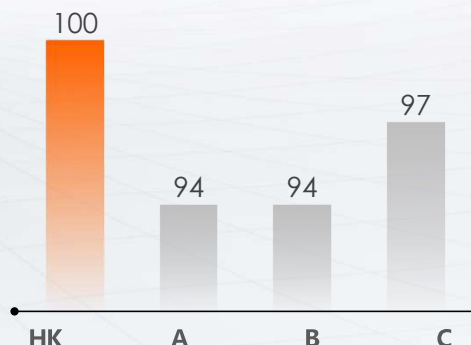

Weight Index

HK weight is at average level

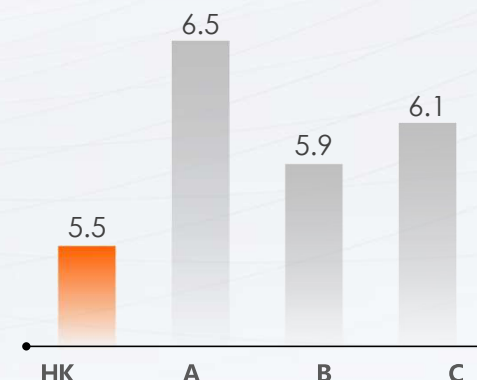

Wear Resistance Index (Mileage)

HK is 5% higher than competitors

Rolling Index

HK rolling index is 5.5, fuel consumption improved by 3-6%

*The wear resistance index book calculates the theoretical mileage index based on the tire structure and formula; the rolling index is an important indicator that affects fuel consumption, and the smaller the value, the more fuel-efficient it is. For every 10% improvement, the fuel saving effect is improved by about 3%.

*All tests on the above pages have been conducted internally by Hankook, using specific testing tools and standards in specific environments to obtain results. Due to the influence of various factors such as vehicles, operating environments, and drivers on the effectiveness of tire use, the test results do not necessarily indicate that they are present under any operating conditions and environment. The test results are only for reference in explaining tire performance.

DM80D

About Us Market Trends

Products

Tire Management
Systems

Distribution
Systems

- DM80D is a special drive wheel product designed by Hankook for middle and short distance hybrid roads;
- Tread formula for block falling resistance, deep groove horizontal pattern block design, strong driving force on hybrid roads.

● Suitable ● Able

Introduction

- Middle and short distance hybrid roads, dedicated to driving wheels
- Special rubber formula for middle and short distance hybrid roads, with good wear resistance and cutting resistance
- Large horizontal pattern design, preventing stone inclusion and tread falling

Operating Specifications

Specifications	Level
1000R20	16
1100R20	18
1200R20	20

Design Features

- Block falling resistance
- Anti-pinch stone
- Durability

About Us Market Trends

Products

Tire Management Systems

Distribution Systems

- AM81 is a product designed by Hankook for middle and short distance hybrid roads, used in all position;
- The deep shoulder flange and asymmetric shoulder incision design enhance traction and grip performance, and improve heat dissipation and durability.

● Suitable ● Able

Introduction

- Middle and short distance hybrid roads, used in all position
- Durable structure design of tire body, improving the tire service life
- Increasing the spacing between pattern blocks to ensure pattern strength
