Introduction

Discover our Hankook Truck and Bus Premium Tyre Range

At Hankook we offer you a broad range of premium performance tyres. Using the latest technologies and high quality materials, we produce tyres that are specifically designed for the individual needs of fleets.

With our 'no compromise' approach we make sure that our tyres deliver top performance in all areas without compromising any significant features. Our constant investments into R&D and state-of-the-art technologies provide you with a high driving performance that is kept from the first to last millimetre of wear.

Extra strong carcasses and additional built in rubber make the tyres suitable for multiple regrooving and retreading, benefitting your budget as well as the environment.

We at Hankook strive to closely work with all our partners in order to offer the most suitable tyre packages, give advice on potential cost savings and establish a long-lasting partnership. For more information, please get in touch with your local Hankook sales representative.

- Hankook is a **PREMIUM** Tier 1 brand with high performance products
- We are a future oriented technology company, with an industry **VISION** and a plan to make it happen
- Our products and services deliver value to you, we want to be your **PARTNER** of choice

Safety
Robust structure

Mileage
Cover more distance

Anti-chip & cut
Sturdy compound

Retreadability
Saving costs

Traction
Enhanced safety

From research to development throughout production, all Hankook commercial tyres are based on the SmartTec technology system and aim to provide all partners with the best and safest driving experiences.

Hankook SmartLife Solutions

Up to 250% Mileage Life from 1 new tyre

Cost competitiveness, safety and respect for the environment are all major issues faced by European Transport professionals.

The Hankook SmartLife Solutions helps:

- Save fleets money
- Reduce emissions
- Improve safety

1st Life		2nd Life		3rd Life		4th Life
New tyre		Regrooved tyre		Retreaded tyre		Regrooved tyre
100%	0%	25%	100%	0%	25%	

1 tyre = 1 casing = 250% tyre life

Take advantage of the value Hankook built into its premium TBR tyres through regrooving and retreading.

Hankook tyre segmentation

SMART FLEX AH51

PRODUCT BRAND POSITION CIRCUMSTANCE SEQUENCE NO.

Usage Type					
					
Position	Long haul	Regional haul	Urban	Mixed service, off-road	Winter
A All-Position	AL	AH	AU	AM	AW
D Drive	DL	DH		DM	DW
T Trailer	TL	TH		TM	TW

L	Long haul	Designed for long distance and high average speed on motorways and truck roads.
H	Regional haul	Medium distance for local road conditions, optimised tread life
U	Urban	Designed for driving in urban areas with frequent stops and city buses.
M	Mixed service, off-road	For rough surface, need for off-road grip and damage resistance.
W	Winter	Winter road conditions

Truck tyre markings

Tyre size markings

All truck tyres are marked representing their structure, construction type, dimensions, manufacturer/brand. In addition they should carry the U.S. Department of Transport code and/or ISO symbols. Below is a typical Hankook tyre that illustrates the International Organisation for Standardisation (ISO) markings.

Safety Warning
Serious injury may result from: Tyre failure due to under inflation or overloading - follow the tyre placard instructions on the vehicle and check inflation pressures frequently. Only specially trained people should mount tyres. Follow all safety procedures and inflate using a safety cage and a remote clip-on extension hose.

EU tyre labelling system

What is the EU tyre labelling regulation?

What is the aim of the tyre labelling regulations?

- Reduce CO² emissions
- Reduce external vehicle noise
- Improve safety
- Improve customer awareness

It supports customers to make better informed choices taking into consideration their type of driving, the climate and road conditions they are likely to encounter.

When was the labelling system introduced?

The original label was introduced on the 1st November 2012. From the 1st of May 2021, the 2nd version of the label will be implemented.

What are the changes on the new label?

It is now also mandatory to use the label for commercial tyres. In addition to information about the rolling resistance, wet grip and tyre noise, the 3PMSF marking will be added. The noise system will be changed from a (-classification to an A/B/C system.

A QR code is added to provide easy access to additional tyre info.

Are all tyres included in the scope of the new tyre labelling?

The rules apply to passenger car tyres (C1), light truck tyres (C2) and heavy-duty vehicle tyres (C3).

The following categories are excluded from the scope:

- Retreaded tyres
- Professional off-road tyres
- Racing tyres
- Studded tyres (studdable tyres if supplied without studs are covered)
- Temporary use spare tyres

Can tyres with the old label still be used or sold after the 1st May 2021?

Yes, if the DOT code for your tyres is before the 1st May 2021 then old labels can be used.

Who has to give the label information?

Tyre manufacturer: All tyres within the scope must provide the information in technical promotional literature and on the manufacturers website.

Tyre retailers: Must ensure tyres which are visible to consumers at the point of sale carry a sticker or have a label in their close proximity which is shown to the end user before the sale. They also must give the information during the purchase process when the tyres are offered for sale and are not visible to the end user.

What is Hankook's positioning on the label?

We fully support the labelling system and also the amends in 2021. However, we think that the current label does not give a complete image to the end user as the label only focusses on the new tyre's performance and it does not feature any information on the mileage, longevity or worn tyre performance.

EU tyre labelling system

The EU Tyre Labelling System - Overview

Reduce CO₂ emissions

Reduce external noise

Improve safety

Increase customer awareness

Tyres account for 20-30% of the fuel consumption of vehicles. A reduction of the rolling resistance of tyres may therefore contribute significantly to the energy efficiency of road transport and thus to the reduction of emissions.

A

B

C

D

E

Low fuel consumption

High fuel consumption

Difference between A and E label grades can lead to savings of up to €20K/year in fuel*

*Based on a tractor unit and trailer at 44T weight covering 130k km per year at 27,5l/100km and fuel cost of 1,25€ per litre.

Wet grip indicates the braking performance of tyres on wet road surfaces and is related to the safety performance of vehicles.

A

B

C

D

E

Short braking distance

Long braking distance

An A-labelled and an E-labelled tyre can make a braking distance difference of up to 18m, severely impacting the driving safety.

The exterior noise levels are measured in decibels (dB) and are indicated in three categories

A

Low tyre noise

B

Average tyre noise

C

Higher tyre noise

Truck and bus tyre range

Truck and bus tyre range

This chart will help you choose the most appropriate tyre for your driving conditions and the region. If you have any questions, please contact your nearest Hankook representative.

EU : Europe

Driving conditions/axle	All-position	Drive	Trailer
Long distance transport (above 500km)	AL50	DL50	TL20
Coach	AL22	DL22	
Long & regional haul (Hybrid)	Smart FLeX AL51	Smart FLeX DL51	
National and regional transport (below 500km)	AH51 / AH31 AH35	DH51 / DH31 DH35	TH31
Mixed service (Below 10% Off-road)	AM09 / AM15(+) AM11	DM09 / DM11	TM15 / TM11
Off-road		DM04	
Urban, multi-stop, transport (in the city)	AU04(+)/ AU06		
Snowy and icy roads	AW02(+)	DW07	TW01

Note : The tyres for front axle can be used for all-position. However, if you want to use them on drive or trailer axles, please contact your nearest Hankook representative.

Tyre Labelling:

M + S Mud and snow:

The tread and the material are designed in a way that the driving performance on mud, snow and ice is superior to standard tyres.

3PMSF (Three Peak Mountain Snowflake):

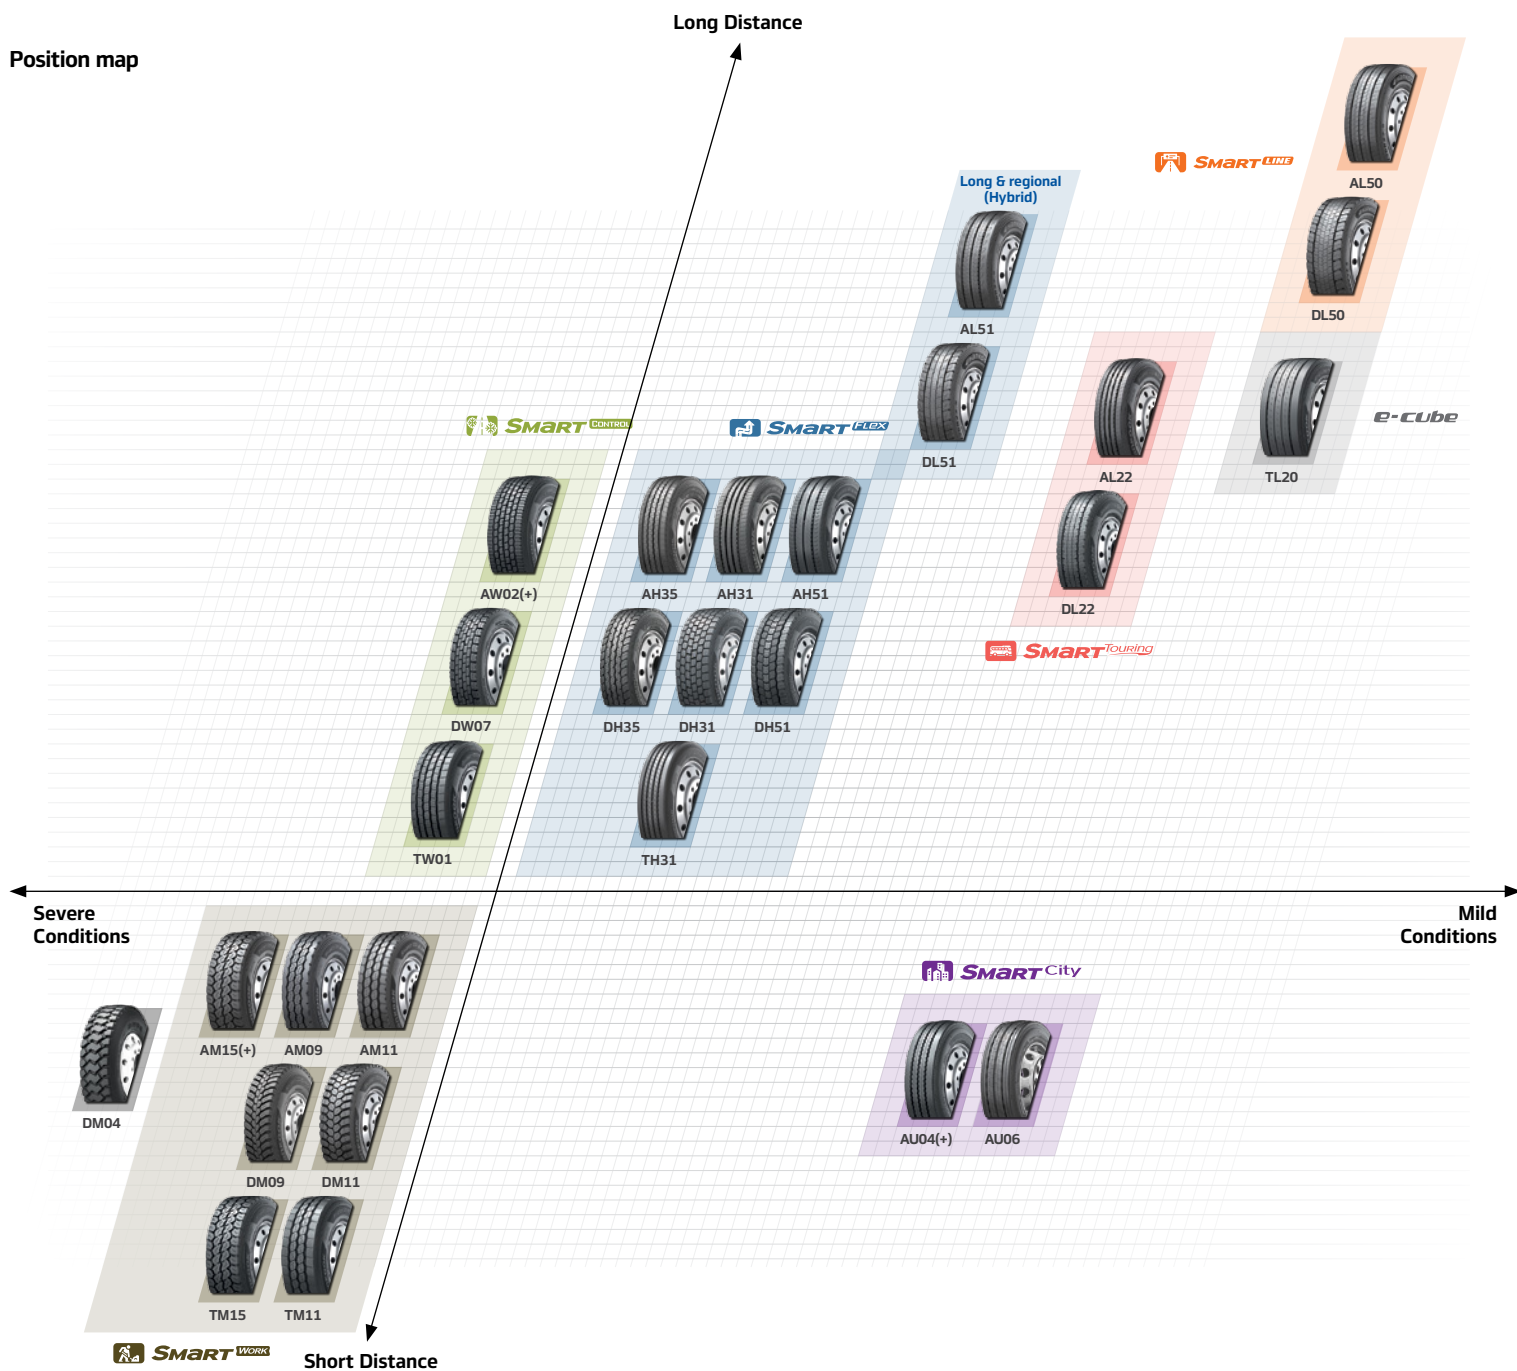

UNECE Regulation 117, to be implemented in the EU through Regulation (EC) 661/2009, requires for snow tyres a minimum level of performance threshold on snow (braking and traction). If the tyre meets the criteria, it can be marked with the three-peak snowflake symbol.

Data can be changed by manufacturer without prior notice.

No matter how far you drive,
Hankook Tire has the solution

Hankook Premium Tyre Technologies

LONG HAUL INNOVATIONS

- Low rolling resistance technology
- Wear resistant tread compound

BENEFITS FOR FLEETS

- Fuel saving
- Long tyre life

Long haul

SMART LINE AL50

Excellent fuel efficiency with optimised grip performance for long haul use

Hankook Premium Tyre Technologies

Groove wall step features prevent block deformation and gives reinforcement between tread blocks.

The wide tread block enhances the rigidity and improves grip, mileage and reduces the tyre's rolling resistance.

At 70% wear, hidden grooves appear. These grooves improve wet grip and traction when the tyre wears.

Regional haul

SMART FLEX AH 35

All-season steer axle tyre for variable road conditions

Hankook Premium Tyre Technologies

Wide tread width offers high pattern volume which results in a high mileage performance.

A combination of 4 wavy and straight grooves provide outstanding traction and drainage performance on long and regional haul applications.

Multi 3 dimensional sipes provide excellent traction leading to an enhanced driving performance. Tread stability means reduced rolling resistance and fuel saving.
