In April this year, Guizhou Tire Co., Ltd. Vietnam's annual production of 1.2 million all-steel radial tires project successfully rolled off the production line in Tien Giang Province, Vietnam, marking the completion of the first phase of the project and Guizhou Tire's dual bases at home and abroad. production mode.

The Vietnam project of Guizhou Tire Co., Ltd. is located in Longjiang Industrial Park, Xinfu County, Tien Giang Province, Vietnam, and will officially start construction in 2020. After nearly a year of intensive construction, the construction of 178,000 square meters of factory buildings and the installation and commissioning of 338 sets (sets) of main process and power equipment have been completed. On April 1st, the first batch of tires rolled off the production line successfully, realizing the full run-through of the production line.

**Wang Kun, executive deputy general manager of Guizhou Tire Co., Ltd.:** The tires of the Vietnam factory have rolled off the production line, marking that the entire production line of 1.2 million sets in the first phase of Vietnam has been opened up. The company's globalization strategy has taken a solid step forward.

It is understood that this project with an annual output of 1.2 million all-steel radial tires, which has the first tire off the production line, is the first phase of the project planned by Guizhou Tire Vietnam Production Base, with a total investment of 214 million US dollars. Tire design and manufacturing technology.

Guizhou Tire invested and built a factory in Vietnam, one of the world's natural rubber production bases, which not only fundamentally solves the disadvantage of Guizhou Tire being far away from the raw material supply market and product export market, but also deeply implements the "going out" strategy for municipal state-owned enterprises , The realization of high-quality development has played a demonstration effect.

**Wang Kun, executive deputy general manager of Guizhou Tire Co., Ltd.:**The company designs according to the production capacity of 3 million sets per year. The entire third phase adopts the combination of intelligence and information technology to realize the automation of factories, production and logistics. The entire production system is in full production in the first quarter.
