Section III.

Management discussion and analysis

I. Discussion and analysis of operations

In 2022, the international environment will become more complicated and severe, and the overlap of factors such as global counter-globalisation and persistently high shipping costs will accelerate the re-layout of the global supply chain; the domestic "carbon peak, carbon neutral" dual carbon policy and the continuous promotion of energy and environmental control measures; the upstream raw materials of the tyre industry, such as soaring prices of carbon black, will increase the operating cost of enterprises, which has always been at a historically high level with limited transmission to the downstream market. The price of upstream raw materials in the tyre industry, such as carbon black, soared, and the operating costs of the Company remained at a historically high level, with limited transmission to the downstream market. In the face of severe external challenges, during the reporting period, the Company further increased the adjustment of product structure and market structure, actively promoted marketing innovation, technological innovation and management innovation, and the proportion of products and markets with better profitability was significantly increased, which contributed to the improvement of the Company's profitability.

In 2022, the Company achieved operating revenue of RMB4,988 million, a year-on-year decrease of 10.25%, and net profit of RMB85 million, turning losses into profits for the year. The main work carried out by the Company is as follows:

1. Implementation of market restructuring and promotion of fleet digital systems²⁰²²

In the domestic radial tyre repair market, in 2022, we will focus on promoting the sales volume of the "9+1" region and the implementation of branded product channel combination strategy. 2022, the "9+1" region is expected to achieve a sales share of 58%, a year-on-year increase of 5%. Increase strategic investment in fleet business, push forward the construction of customer service force with "Feng Zhihui" smart tyre and fleet service system as the core, and actively promote the platform of car-free carrier and TCO business, so that the KA business of large fleet will achieve sales growth of more than 20% in 2022.

Domestic radial load tyre supporting market, and actively adjust the supporting product structure, resources to key customers to focus on the transition to high-end products. At the same time, we focus on the development of all-terrain crane customers and special tyre business, and actively develop the international top-tier host supporting plant, to enter the world-class circle of friends.

In the domestic hydropower mining market, the share of non-mounted sales increased substantially. The share of non-mounted sales in the domestic engineering tyre repair market for the whole year in 2022 was 65%, with sales increasing by 16% year-on-year.

To set up localised sales teams in overseas markets, to transform from simple export mode to localised sales mode, and from single-channel to multi-channel strategy. Continuing to improve the sales proportion of high-end products. 2022, the sales of high-end radial load tyre series will increase by 10% year-on-year; the proportion of high-end products will increase by 7% year-on-year to 21%; and sales of radial engineering tyres of more than 49 inches will increase by 105.7% year-on-year.

2、Promote information technology and digitalisation to optimise business management details

In terms of smart business, we promoted the smart tyre fleet management system (radial load tyre) of the Wind Smart project; in the hydropower mine market, we put on-line the smart tyre mine management system (engineering tyre) and the smart tyre market testing system, and provided corresponding WeChat applets for different systems, which is convenient for the promotion and application of engineering tyres and jumbo tyres under the scenarios of hydropower mines. For the integration of sales, marketing channels, logistics delivery, inventory, demand and other whole chain management data, develop multi-dimensional intelligent analysis charts, build a successful unified standard comprehensive domestic marketing data analysis platform, digital means to support the work of the sales line in all aspects of the company's marketing decision-making at all levels of the data support (company level, marketing business units, sales regions), for wholesalers to provide sales Data analysis service for wholesalers.

In terms of intelligent manufacturing, we have established the giant tyre production control system, and in promoting the localisation of the PTG 4.0 PRO digitalisation project Fengshen, we have realised the automatic cleaning, sorting, uploading, statistical analysis, visualisation of business functions and other functional modules of the historical data of the production control system, which have now been applied in the semi-finished products laboratory, the daily work of the quality control profession and so on. Data-oriented application development: By leveraging the completeness of Python software in the field of data science and the convenience of application development, WEB applications such as data sharing, data collection, office automation, etc., have been developed, which not only empowers the business to improve management efficiency, but also promotes the application of digital transformation in front-line basic work.

3, in-depth promotion of comprehensive benchmarking, to grasp the quality and efficiency gains

In 2022, the benchmarking work took "6+X" as the direction, the benchmarking topic as the platform and the management salon activity as the powerful grasp, and achieved the benchmarking improvement in product quality, production management, health and environmental protection, and equipment efficiency, etc. The manufacturing system used "matrix benchmarking" to output 32 indicators at the factory level and 157 indicators at the process level, covering the whole process of tyre manufacturing. The manufacturing system uses "matrix benchmarking" to output 32 indicators at the factory level and 157 indicators at the process level, covering the whole process of tyre manufacturing, which strongly supports the achievement of the company's indicators.

Improving quality and lowering costs were effective. By optimising the market, customer and product structure and strengthening cost control, the company cut costs by more than 100 million yuan. The company has set up a special purchasing team, formulated more than 60 raw material supplier development plans, and ensured that each specification of the main raw materials has no less than three or more qualified suppliers.

4、Implementation of talent programmes to enhance staff skills

In 2022, the company set up a special class for human resources change and promoted it in accordance with the mode of "special class + project cluster", with a total output of job descriptions. The company has implemented 12 key projects, including the preparation and application of the book, the HR digital platform, the construction of the grade system, the talent pool, and the succession plan. Starting from the structural problems faced by the company's HR department,

the company will improve the management of various HR modules and organisations, enhance organisational efficiency, improve the company's organisational capability and support the implementation of the company's strategy.

Overall, in 2022, in the face of unfavourable situations such as high raw material prices, energy prices and shipping costs, the Company actively adjusted its market structure, did a good job in reducing costs and increasing efficiency, continuously promoted technological innovation and endeavoured to improve the level of operations, ensuring stable and orderly operations.

II. Situation of the industry in which the Company operated during the reporting period 1.

Operating costs remained high

In 2022, affected by the domestic energy consumption double control, power coal prices and other factors, tyre industry enterprise production costs continue to go

High. Although both domestic and foreign tyre companies had price increases of different magnitudes under cost pressures, market demand was lower as a result of the downstream automotive and construction machinery industry market downturn conditions, and market wholesale and retail prices could not be increased, leading to lower profits in the channel.

2, the overall sea freight rates in a downward trend

In 2021, the domestic tyre industry exports have experienced container shortage, Los Angeles port congestion, Suez Canal blockage of ships and other domestic and international maritime unfavourable factors, sea freight rates appeared to surge. 2022 began, the gradual liberalisation of control measures by a number of countries, the rate of ship punctuality and turnover efficiency rebounded sharply, the freight rate than the last year's high level of a general decline.

3, green and smart into the industry development direction

Increasing market competition, upgraded technology applications and people's attention to environmental protection are driving the tyre industry towards green and intelligent tyres. Green and intelligent tyres are bound to become the mainstream tyres in the tyre industry. Therefore, lower noise, better reduction of automobile fuel consumption, and intelligent services that take into account the tracking, analysis and management of the whole life cycle of tyres will be the focus of competition in the tyre industry in the future.

4. Accelerated internationalisation

With the gradual expansion of the scope of anti-dumping in world trade, coupled with the Sino-US trade war and other international trade barriers, the export situation of domestic tyre enterprises is grim, the export of domestic tyre enterprises has posed a greater challenge to the tyre industry, internationalisation has been an important direction of expansion of the tyre industry. Many domestic tyre enterprises by grasping the national "Belt and Road" policy opportunities, overseas production capacity layout, to avoid trade barriers, and further enhance the influence and competitiveness of Chinese tyres in the global market.

III. Businesses in which the Company was engaged during the reporting period

(i) Principal activities in which the Company is engaged

Founded in 1965, the company is a large-scale tyre listed company held by Sinochem Holding Corporation, **one of the** world's top 500 companies. The company is an advanced Lean Six Sigma enterprise in the domestic tyre industry: it won the title of "Advanced Unit of Environmental Protection in the National Petroleum and Chemical Industry" **in the** 12th Five-Year Plan, and participated in the Third Green Industry Conference of the United Nations and made a typical speech on behalf of Chinese enterprises; it won the titles of "Green Factory" and "Green Supply Chain Management Enterprise" in the chemical industry in 2020; it won the title of "Green Factory" and "Green Supply Chain Management Enterprise" in 2022. In 2020, it won the titles of "Green Factory" and "Green Supply Chain Management Enterprise" **in China's chemical industry**; in 2022, it won the two awards of "Best Supplier in 2022" and "Excellent Supplier of After-sales Service in 2022" of Dongfeng Commercial Vehicle. In 2022, the company was awarded the "2022 Best Supplier" and "2022 Excellent Supplier of After-sales Service" **of Dongfeng Commercial Vehicle**.

The company mainly produces "Fengshen", "wind power", "card force", "Henan" and other brands. The company mainly produces more than 1,000 specifications and varieties of truck tyres, construction machinery tyres and other tyres, and is the strategic supplier of XCMG, Lonking and other domestic construction machinery and vehicle production giants, the main tyre supplier of Dongfeng Commercial Vehicle Company, the tyre supplier of Mercedes-Benz Daimler, the world-famous medium- and heavy-duty truck manufacturer, and the supplier of VOLVO and other construction equipment enterprises around the globe. The company's tyre products sell well in more than 140 countries and regions around the world, and the price level of its products in overseas markets, especially in the high-end markets of many European and American countries, ranks the forefront of Chinese products.

The Company owns 100% equity interests in Fengshen Tire (Taiyuan) Co., Ltd, Fengshen Tire (Hong Kong) Co., Ltd, Aeolus Tire (Canada) Inc. and Aeolus Tire (Russia) LLC, 20% equity interests in Pirelli Tire (Jiaozuo) Co., Ltd. and 10% equity interests in PTG, and has signed equity trusteeship agreement and supplemental agreement with Rubber Co. A supplemental agreement was also signed with Rubber Company to entrust the management of a total of 90% equity interest in PTG. By carrying out a series of business integration, the Company accelerated the pace of transformation and upgrading, accelerated the internal development of the Company, and continued to provide domestic and foreign customers with high-quality products and efficient services.

(ii) Company's business model 1.

Procurement model

The company's procurement adopts two modes: centralised and unified centralised management and independent procurement, with procurement categories including raw and

auxiliary materials such as natural rubber, synthetic rubber, steel cord, carbon black, etc. Meanwhile, the company implements a strict supplier management system (including supplier access, withdrawal and process control, etc.) The main bulk raw materials are purchased through the Great Wall e-commerce platform with unified price comparison, traceable historical data and controllable process, which is conducive to the company's reduction of purchasing costs and improvement of economic efficiency. Synthetic rubber is mainly procured through long-term strategic partners such as PetroChina and Sinopec; natural rubber is mainly procured from high-quality rubber-producing areas such as Thailand by means of the e-commerce platform, implementing flexible procurement methods combining forward and spot according to changes in the market, and implementing unbalanced procurement strategies. The company's domestic and international supply channels for raw materials are stable, and the procurement cost is controllable.

2. Production model

Combining the production capacity, product process and product structure, the company adopts the production mode of "production based on sales, promotion based on production, and production and sales balance" according to the demand of downstream customers in the tyre market and the forecast of the market. The company has advanced industrial tyre production equipment, imported Pirelli tyre manufacturing process technology, benchmarked against the industry, played to its advantage, implemented continuous improvement, optimized the core equipment, formed a complete high-end production capacity of industrial tyres; at the same time, the company adopts lean production tools and information management means to dynamically monitor, deploy and collaborate with production resources to improve production and operation efficiency; increase the application of advanced technology in production, improve the company's production efficiency and improve the company's production performance, and improve the company's production efficiency. production, and improve the company's digital and intelligent level.

3. Sales model

The company uses different sales models for different market segments, including:

(1) Direct sales sales model:

Domestic direct sales customers are mainly trucks and buses, construction machinery vehicles host supporting plant. Relying on the domestic leading technology and service strength, the company has been occupying an advantageous supporting position in the production enterprises of trucks, buses and construction machinery vehicles for many years. The company has a professional supporting marketing team, focusing on the downstream supporting market, to provide a full range of products and services to key OEMs, long-term recognition by OEMs.

(2) Dealer sales model:

Export Markets: The company is divided into six major overseas marketing regions, targeting North America, Latin America, Europe, the Middle East and Africa, Asia-Pacific and the United States.

CIS and other markets. At present, the company has more than 300 overseas first-class distributors, and the product sales scope covers most of the countries and regions in the world.

Replacement market: Domestic regions are sold in accordance with the distribution network, and currently more than 200 first-class dealers have been developed in each province across the country, realising the overall layout of domestic sales channels and service network. The company carries out centralised and synergistic management to maximise the advantages of each brand in different market segments, and develops new products in a customised and targeted manner through research and judgement of market demand, so as to quickly strive for more market share.

IV. Analysis of core competencies during the reporting period

√Applicable □Not applicable

The company seizes the opportunity of market development, continuous innovation and development, the products sell well in many countries and regions around the world. After years of accumulation and precipitation, the company has formed the following core competitive advantages:

(i) Have a tyre brand with high global recognition

The company attaches great importance to brand building and increasingly consolidates market channels. Through the construction of brand image shops, advertising, self-media platform operation and maintenance and other measures, the company actively promotes brand building. 2020 won the titles of "Green Factory" and "Green Supply Chain Management Enterprise" in China's chemical industry; 2022 won the "2022 Best Supplier" and "2022 Excellent Supplier in After-sales Service" awards of Dongfeng Commercial Vehicle. In 2020, the Company was awarded the titles of "Green Factory" and "Green Supply Chain Management Enterprise" in China's chemical industry; in 2022, the Company was awarded the "Best Supplier in 2022" and "Excellent Supplier of After-sales Service in 2022" **by Dongfeng** Motor. The business synergy between the Company and PTG has formed the advantage of multi-level and multi-brand promotion, with clear positioning and complementary advantages of its brands, covering various industrial tyre segments, meeting the needs of different markets for products with different price points and functions, and providing integrated value-added services for customers.

(ii) Good R&D platform and technological innovation capability

The company is a national high-tech enterprise, national technology innovation demonstration enterprise, with a national enterprise technology centre, postdoctoral research station and other scientific research platforms, through independent innovation, technology introduction and "production, learning and research" combination of various ways to continuously improve the company's scientific and technological innovation capacity and technology research and development level.

The Company signed a Patent and Know-how Licence Agreement with Pirelli and a Technical Assistance Agreement with PTG. At present, Pirelli's industrial tyre technology is being transferred to the ground in an orderly manner, accelerating the Company's pace towards a world-class tyre

enterprise.

The company owns a large number of core technologies, such as the R&D and manufacturing technology of giant engineering radial tyres, the design and manufacturing technology of wide base ultra-low profile tubeless radial tyres, the design and manufacturing technology of ultra-low rolling resistance green tyres, and the design and manufacturing technology of intelligent tyres. The total number of patents owned by the enterprise is 347, and it has presided over and participated in 1 international standard, 89 national standards and 16 industrial standards.

(iii) Product manufacturing and service capabilities for a full range of industrial tyres

The company has the ability to manufacture medium and high-end tyres. In addition to producing its own brands, it also processes high-end industrial tyres under the Pirelli brand on behalf of Pirelli.

The Company has formulated a long-term product enhancement plan based on a multi-level branding strategy to provide high-end and cost-effective industrial tyres for different market segments. Through the integration and upgrading of Pirelli's tyre manufacturing technology, we have successively launched the new third-generation "Neo" series, new lightweight and fuel-efficient tyres, green fuel-efficient tyres and the "Kali" series, which have become a strong support for the growth of the Company's business in the export, ancillary and replacement markets. These new products have become the strong support for the company's export, matching and replacement markets. In terms of radial engineering tyres, the company is also trying to develop various new products, and in 2022, the 59/80R63 "Jumbo" radial engineering tyre will be successfully rolled out of the Jiaozuo base, a milestone that marks the company's direction towards "being a global leader in industrial tyre quality". This milestone event marks an important step towards "being a global leader in industrial tyre quality".

(iv) Advanced quality management system and product performance certification

The company takes quality as the centre, insists on green manufacturing and sustainable development, and implements comprehensive quality management. The company has successively passed ISO9001 quality system, IATF16949 system, ISO14001 environmental management system, OHSAS18001, GB/T23331-2012 energy management system, and has passed the ISO9001 quality management system.

Our products have been certified with 16 certificates, including ISO10012:2003, ISO/IEC17025, DOT, ECE, etc. We are guided by the technical standards of the global high-end market, and our products have passed the SMARTWAY certification of the United States. The company is guided by the technical standards of the global high-end market, and its products have passed the SMARTWAY certification of the United States.

In the EU labelling law test achieved B/C grade, noise to meet the requirements of the EU labelling law limit value of the second phase, is one of the few companies in the industry to achieve and pass the above international certification standards.

(v) Omni-directional market channels and network layout

The company has established a "three-in-one" market channel and sales network of export market, supporting market and replacement market to achieve complementary advantages and business synergy. The export market covers North America, Latin America, Europe, the Middle East and Africa, Asia-Pacific and the CIS, and the products are sold to more than 140 countries and regions. Supporting market, directly supplying for more than 20 leading automobile and construction machinery OEMs, such as Dongfeng Motor and Xugong. In the maintenance market, we have formed a marketing system mainly based on wholesale by dealers and retail by listed shops, and our sales network covers the whole country.

V. Main operations during the reporting period

During the reporting period, the Company achieved a cumulative operating income of RMB 4,988 million, a year-on-year decrease of 10.25 per cent, and a net profit of RMB 85 million, a year-on-year decrease of 10.25 per cent.

Year-on-year growth of 194 million yuan, achieving a reversal of losses. (I) Main business analysis

1. Analysis of changes in the income statement and related accounts in the cash flow statement

Unit: Yuan Currency: RMB

subjects	Curren t period	Same period last year	Percentage change (%)
revenue	4,987,894,009.26	5,557,572,578.05	-10.25
business costs	4,294,447,521.09	4,989,614,733.24	-13.93
sales expense	136,514,972.56	151,238,294.72	-9.74
overheads	152,844,070.14	176,042,759.95	-13.18
financial cost	4,642,999.09	33,775,153.99	-86.25
R&D costs	232,343,270.09	256,167,139.32	-9.30
Net cash flows from operating activities	450,624,239.68	247,019,864.32	82.42
Net cash flows from investing activities	-30,082,569.55	-79,161,740.48	inapplicable
Net cash flows from financing activities	120,259,900.64	99,926,742.62	20.23

During the reporting period, the Company took the initiative to adjust its market structure and comprehensively sorted out the profitability of its products. Compared with 2021, the Company took the initiative to reduce sales in the ancillary market, which accounted for a relatively high proportion of the total but with lower profitability, while seizing the opportunity to expand sales in the export market thanks to the recovery of the export market brought about by the decline in shipping costs and exchange rate changes. Although sales revenue decreased by 10.25% year-on-year, the Company's gross profit margin increased by 4.04% and the absolute amount of gross profit increased by 23.55%. Coupled with the further strengthening of cost control, the results thus improved significantly, achieving a turnaround. Specific analyses are as follows:

Trend of gross profit margin of main business in the company's

2022
consolidated statements of operations

Unit: million yuan

sport s even t	2022	2021	Amount of change	Percentage change
Revenue from main operations	475,719.75	537,381.07	-61,661.32	-11.47 per cent
Main operating costs	407,996.76	482,566.69	-74,569.93	-15.45 per cent
Gross profit from main operations	67,722.99	54,814.38	12,908.61	23.55 per cent
Gross margin from main operations	14.24 per cent	10.20 per cent	4.04 per cent	

- (1) **Comprehensively sort out the profitability of products in each market and enhance the gross profit level of the advantageous markets**
- Gross margins of the Company's products by market**

market (also in abstract)	Gross margin 2022	2021 Gross margin	flux
interchangeability	7.23 per cent	11.13 per cent	-3.90 per cent
form a complete set	2.86 per cent	3.90 per cent	-1.04 per cent
exit	22.02 per cent	17.05 per cent	4.97 per cent
add up the total	14.24 per cent	10.20 per cent	4.04 per cent

During the reporting period, in the face of the severe competitive situation of the domestic tyre industry, the company comprehensively sorted out and analysed the profitability level of the products in each market, seized the opportunity and strengthened the gross profit margin level of the export market. 2022, with the liberalisation of the control measures of various countries around the globe, the punctual rate of the ships and the turnaround efficiency rebounded significantly, the shipping price generally dropped compared with the high level of the last year, and the pressure on the logistic cost of the export market decreased compared with that of 2021, and the exchange gain increased significantly. At the same time, due to the impact of RMB exchange rate depreciation, the exchange gain increased significantly, the gross profit margin of export market increased from 17.05% in 2021 to 22.02% in 2022, and the overall gross profit margin level also increased from 10.20% to 14.24%, an increase of 4.04 percentage points year-on-year.

(2) Optimising market structure and expanding the proportion of sales in export markets

Unit: million yuan

mark et (also in abstra ct)	2022 Revenue	2022 Collection percentag e of income	2021 Revenue	2021 Revenue percentage	Year-on-year change in revenue	Change in revenue share
interc hange ability	112,753.65	24 per cent	112,145.98	21 per cent	0.54 per cent	3 per cent
form a compl ete set	106,287.04	22 per cent	229,457.69	43 per cent	-53.68 per cent	-21 per cent
exit	256,679.06	54 per cent	195,777.40	36 per cent	31.11 per cent	18 per cent
add up the total	475,719.75	100%	537,381.07	100%	-11.47 per cent	/

During the reporting period, according to the different profitability levels of products in various markets, the Company took the initiative to seek changes, optimised the market structure, actively expanded the channels for overseas customers, and boosted the overall profitability by increasing the proportion of revenue from the export market, which has a higher level of gross profit margin. The revenue share of export market will increase from 36% in 2021 to 54% in 2022.

(3) Raw material prices eased

Changes in the company's purchasing entry price index for major raw materials over the past three years

kind	2022	2021	2020
natural rubber	110	117	100
synthetic rubber	126	129	100
soot	161	136	100
cord fabric	112	127	100
used in Cost as a percentage of revenue	2022	2021	2021 VS 2020
raw materials	101 61.10%	65.45 per cent	-4.35 per cent
mainly	6.29 per cent	5.89 per cent	0.40 per cent
energy costs	7.72 per cent	6.67 per cent	1.05 per cent
Manufacturing costs and others	10.65 per cent	11.79 per cent	-1.14 per cent
add up the total	85.76 per cent	89.80 per cent	-4.04 per cent

During the reporting period, except for carbon black, the purchase and storage prices of the Company's major raw materials dropped to a certain extent as compared with that of 2021, accounting for a year-on-year decrease of 4.35%.

(4) Operational excellence, strengthened budgetary control

Company's expenses during the period Unit: Yuan

sports event	Current period's incidence	Prior period's incidence	Percentage of change
--------------	----------------------------	--------------------------	----------------------

sales expense	136,514,972.56	151,238,294.72	-9.74 per cent
overheads	152,844,070.14	176,042,759.95	-13.18 per cent
R&D costs	232,343,270.09	256,167,139.32	-9.30 per cent
financial cost	4,642,999.09	33,775,153.99	-86.25 per cent
sports event	2022	2021	
Cost of sales as a percentage of revenue	2.74 per cent	2.72 per cent	
Administrative expenses as a percentage of revenue	3.06 per cent	3.17 per cent	
R&D expenses as a percentage of revenue	4.66 per cent	4.61 per cent	

During the reporting period, the Company continued to actively promote various innovative measures, improve quality and reduce costs, strengthen budgetary control, and effectively optimise management expenses and selling expenses. For finance costs, due to the impact of RMB depreciation, exchange gains increased significantly during the reporting period, and finance costs decreased significantly year-on-year.

2022

(iv) Analysis of industry business information

√Applicable Not applicable

In 2022, the downward pressure on the economic operation of the tyre industry continued to increase, manifesting itself as a serious contraction of the domestic market, a sharp decline in industry efficiency, a continuous rise in factory inventory, and a continuation of the low start rate.

The tyre industry upstream rubber, carbon black, additives, cord fabric, steel cord and other raw materials, as well as energy prices rose sharply, pushing the cost of rubber products enterprises soared, seriously eroding corporate profits.

According to the statistics of China Rubber Association, the annual output of rubber tyres in China in 2022 will be 856.003 million, down by 5% year-on-year. Due to the severe contraction of the domestic market, the capacity utilisation rate of domestic all-steel tyres in 2022 will be approximately 60.8%, a decrease of 17.7 percentage points, while the capacity utilisation rate of semi-steel tyres will be approximately 70.2%, a decrease of 6.3 percentage points.

2022 domestic auto market new energy vehicle production and sales of a branch, to China's own brand tyres bring opportunities, tyre companies seize the opportunity to actively adjust the product structure, from the contour, pattern, formula, structure, materials, technology and other multi-dimensional technological innovation, new energy vehicle tyre new products have been listed. Truck and bus production and sales continue to be sluggish, some foreign companies to adjust the operating strategy, exit China's truck and bus tyre market. Off-highway tyres have become an investment hotspot, and a number of projects have been started.

The "double reverse" response has achieved certain results. As the trade friction against China intensifies, domestic tyre enterprises have to defend their own rights and interests through judicial procedures, and positive progress has been made. 4 May, the General Court of the European Union made a first-instance ruling on the case of China Rubber Industry Association and China Chamber of Commerce for Import and Export of Mineral Mining and Chemical Industry (CCCMC) on behalf of 27 Chinese exporters suing the European Commission for "double reverse" duty order on China's truck tyres, and decided to revoke all the "double reverse" orders on Chinese suing enterprises. The General Court of the European Union (GCJEU) issued a first instance judgement on the case of 27 Chinese exporters represented by China Rubber Industry Association (CRIA) and China Minmetals and Chemical Importers and Exporters Association (CMIEA) against the European Commission's "double reverse" duty order on Chinese truck tyres. On the one hand, the first-instance victory in this case made the Chinese enterprises involved in the litigation expected to return to the European market; on the other hand, it provided the Chinese tyre enterprises with a new way of thinking to oppose the unfair trade remedy measures through judicial remedies. 8 July, the European Commission issued the "Re-investigation Announcement" and the "Opening of Imported Products Registration Procedure" announcement, announcing that the EC gave up the appeal, and the Chinese side locked in the first-instance victory; at the same time, the EC decided to conduct a re-investigation on the Chinese enterprises that won the case. At the same time, the EC decided to re-investigate the Chinese enterprises that won the case. During the period of reinvestigation, the EU Customs will not impose "double reverse" duty on the litigating enterprises, and may only pay the new level of measures after the results of the reinvestigation are announced; after the conclusion of the reinvestigation, the litigating enterprises may not be subject to the implementation of the "double reverse" measures or may be subject to the implementation of a lower level of

In 2022, export became the bright spot to drive the growth of tyre industry. In the first half of 2022, the export volume of tyre accounted for 51.65% of the total output, exceeding 50% for the first time, the highest ratio ever. In the case of the decline in total tyre production, the export volume accounted for more than 50%, indicating that the export sales support the operation of the industry. 2022 year, China's rubber tyre cumulative export volume of 7.65 million tons, an increase of 4.7%; the export value of 131,418,000,000 yuan, an increase of 16%.

Analysis of operating information in the chemical industry

information about the industry (1).

Industry policies and their changes

√Applicable □Not applicable

September 19, 2022, the Ministry of Industry and Information Technology and other four departments jointly issued the "raw materials industry" three products "implementation plan", the programme explains that the tyre industry to focus on the development of green and low-carbon products, enrich the varieties of new materials, optimize the means of product design, strengthen the quality of the target management, improve the effectiveness of the quality system, the establishment of innovative evaluation system, build brand globalization development strategy, strengthen upstream and downstream linkage and other seven aspects to accelerate the industry's "increase varieties, improve quality, create brand" strategy implementation and landing, in order to effectively promote the industry development model from the scale and speed type. System, build brand global development strategy, strengthen upstream and downstream linkage and other seven aspects, to accelerate the industry to "increase variety, improve quality, brand" strategy implementation and landing, in order to effectively promote the industry's development model from the scale of speed to quality and efficiency of the transformation.

The National Standard Committee will "tyres unit product energy consumption limit" (GB 29449-2012) and "carbon black unit product energy consumption limit

(The two standards (GB 29440-2012) were included in the integration and revision plan, and CRRC was responsible for organising and implementing the integration and revision of the standards. Through a large amount of data research, as well as analysis and processing of research data from enterprises, the boundaries of the standards were redefined; the first to propose separating raw material oil and fuel oil, and not to include raw material oil in the calculation of energy consumption of carbon black, so that the limit of energy consumption per unit of product of carbon black was significantly reduced; the two products of tyre and carbon black were integrated into a single standard of energy consumption, and the final completion of the "Rubber Industry (Tyre and Carbon Black) Energy Consumption Limit per Unit of Product" was made. Limit" draft for comments.

The revision of mandatory national standards such as the "Load Car Tyre" (GB 9744) incorporates rolling resistance and wet road grip limits into the standard in accordance with the China Green Tyre Roadmap developed by CRRC.

The Ministry of Industry and Information Technology (MIIT) has issued two industry standards, "Green Factory Evaluation Requirements for the Tyre Industry" (HG/T 6061-2022) and "Green Supply Chain Management Requirements for Tyre Manufacturing" (HG/T 6062-2022), which were formulated by the industry and organised by the China National Rubber Association (CNRA), with an implementation timeframe of April 2023

1 The release and implementation of these two industry standards on Sunday provides a basis for the green transformation and upgrading of the tyre industry.

(2). Basic information of major industry segments and the Company's industry position

√Applicable □Not applicable

The company's main products are industrial tyres for trucks and buses and construction machinery vehicles. Truck and bus tyres are mainly used in various working conditions of trucks (heavy-duty trucks, light trucks, dump trucks, tractors), buses, buses and other transport vehicles in different functional parts (guide wheels, drive wheels, trailer wheels, etc.) of the vehicle tyres. Construction machinery tyres are mainly used for vehicle tyres of wheeled vehicles and all kinds of construction machinery (loaders, excavators, bulldozers, road rollers, cranes, etc.) under various operating conditions such as mines, coal, construction sites, tunnels and other harsh operating environments.

The company is one of the few enterprises in China that specialises in the research, development and manufacturing of industrial tyre products, and has rich operational experience in the field of industrial tyres. The company is committed to providing green, safe, energy-saving and environmentally friendly tyre products with higher performance and cost-effectiveness to a wide range of customers, including domestic and foreign OEM supporting customers, large logistics fleets, retailers and other customer groups.

tyres	Rubber and plastic products	Natural Rubber, Synthetic Rubber, Carbon Black, Skeleton Materials fertiliser	Trucks, buses, construction machinery vehicles	Changes in raw material prices and market conditions

(3). Research and Development Innovation

√Applicable Not applicable

(i) Three core breakthroughs

Breakthrough I: 63" giant engineering radial tyre breakthrough.

In order to complete the national rubber industry's "14th Five-Year Plan" development plan to vigorously develop the goal of giant engineering tyres, Fengshen tyres from the structure, formula, process, raw materials and other aspects of innovation and research, to solve the neck of the giant tyre technology; the output of the core technology from R & D to the process of manufacturing the world-class giant tyres; the performance of the product to reach the international leading level; Constructing Fengshen's own patent barriers for key performance technologies of giant tyres, breaking the monopoly of international giants in the giant tyre industry, enhancing Fengshen's brand image, and bringing sales and profit growth to the company.

Breakthrough II: Breakthrough in the development of ABA products with European labelling methods.

Responding to the implementation of policies related to the national dual-carbon strategy in the tyre industry, reducing energy consumption in vehicles, and at the same time enhancing product competitiveness and separating from the industrial price war competition. Fengshen tyres conduct research on formulations, tread patterns, processes, etc., and develop ABA label-grade products, with the current rolling resistance and noise levels reaching the European Labeling Act Class A level, and the wet-slip level reaching the Class B level.

Breakthrough III: Breakthrough in the development of green sustainable tyres.

The implementation of policies related to the national dual-carbon strategy in the tyre industry requires enterprises to develop in the direction of the target. Fengshen Tyre has taken this responsibility to devote itself to the exploration and application of green and recyclable materials, and has set up green and sustainable material stage targets to match those of international tyre giants. The proportion of sustainable materials in a single tyre has increased from 38% to more than 45%, reaching the target of more than 40% in the first phase of the world's giants, increasing the durability of tyres by 30% and reducing rolling resistance by 2.5%, maintaining high performance while minimizing carbon emissions during the life cycle of the tyre, and reducing the carbon footprint, in line with the national "dual-carbon" policy.

(ii) Synergistic innovations

In terms of technological synergy with PTG, Fengshen focuses on the transfer and integration of technologies around formulation, product and process simulation, skeleton material analysis, pattern design, product design technology, test method technology, digital technology, and process technology and equipment landing to achieve the goal of secondary innovation.

In terms of industry-academia-research, the formulation development project with Qingdao University of Science and Technology has completed the basic research content of the project through the efforts of both parties and basically reached the goals set at the beginning of the project, and the output of the project will be transformed and applied in the subsequent formulation development and design. The material research project in cooperation with Henan University has completed the optimisation of the scheme and performance evaluation, and achieved more satisfactory results, the next step is to carry out performance verification, as well as indoor verification and outdoor road test of the finished tyre. Cooperated with Beijing Rubber

Industry Design Institute to research the ²⁰²² giant engineering radial tyre project, to improve and solve the parts of giant tyre products such as performance enhancement and process improvement.

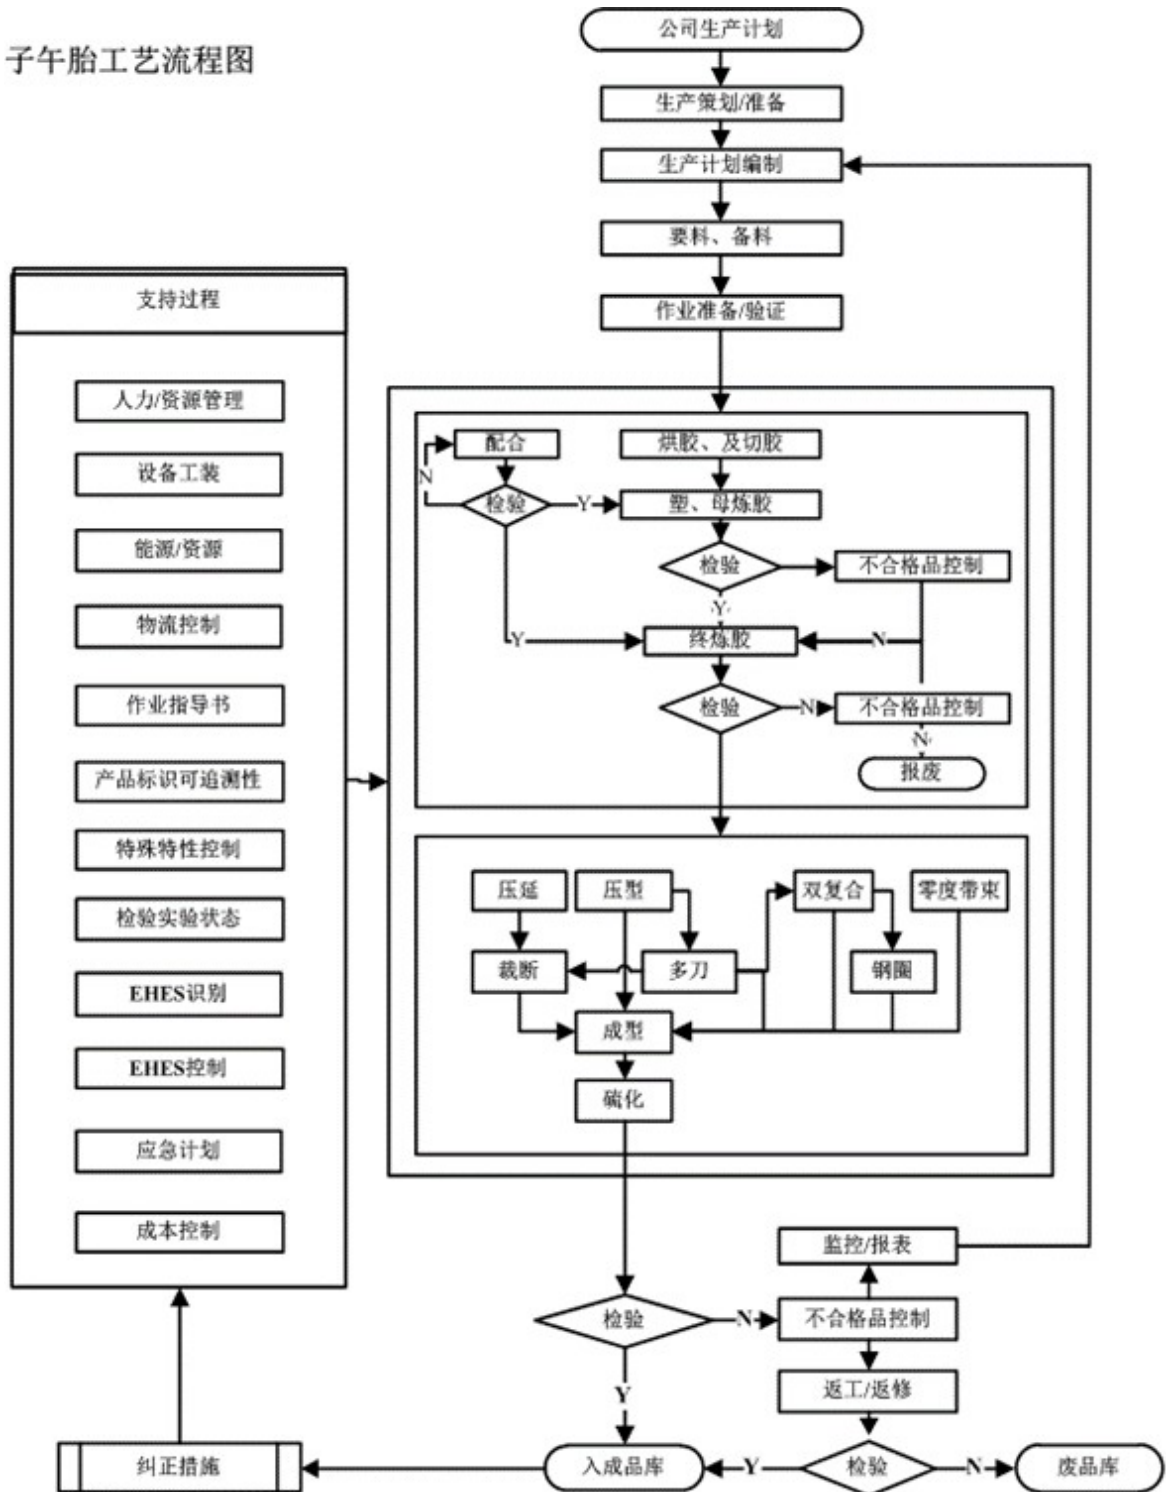

(iii) Patented intellectual property rights

In order to promote the technological progress of enterprises, realise the transformation and upgrading of enterprises, and fully protect the core technology and interests of the company, Fenghshen declared a total of 27 patents in 2022, of which there are 2 invention patents, 7 utility models and 18 appearance patents.

(2). Basic information on the Company's main business by sales channel							
	√Applicable sales channel	Not applicable	revenue	year (per cent)	Increase or decrease in operating income over previous year (%)		
Rubber and Plastic material goods	interchangeability	28	4,079,967,562.60	1,127,536,494.42	-15.45	4.04	0.54
	form a complete set			1,062,870,395.92			-53.68
	exit			2,566,790,559.94			31.11

During the reporting period, competition in the domestic replacement market was exceptionally fierce and revenue was basically flat. The ancillary market was affected by the decline in production and sales volume of domestic commercial vehicle host manufacturers as well as the optimisation and adjustment of the Company's market structure, resulting in a significant decline in revenue. In the export market, affected by the optimisation of global control measures and the decline in shipping costs, the Company actively expanded its overseas markets, resulting in significant revenue growth.

☐Applicable ☒Not Applicable

**VI. THE COMPANY'S
DISCUSSION AND ANALYSIS OF
FUTURE DEVELOPMENTS (i)**

Industry landscape and trends

☒Applicable ☐Not applicable

Domestic tyre industry in the world economic instability, downside risks intensify the situation, still facing enormous pressure, gradually showing the following trends: First, international trade friction will become the norm, "go out", the global layout strategy will become the industry's development trend; Second, in the "intelligent Second, in the context of the development of "smart manufacturing", the enterprise's production and manufacturing will face automation, information technology to intelligent, digital transformation; Third, with the Internet + deep into the lives of the public, the e-commerce platform has become the mainstream way of sales, the tyre industry sales channels as well as the sales model needs to accelerate the change to adapt to future development; Fourth, the major raw materials and energy prices fluctuate greatly; Fifth, the wave of reverse globalisation brought about by the global supply chain, and the global supply chain. The wave of anti-globalisation brought about by the global supply chain re-layout intensified.

(ii) Corporate development strategy

☒Applicable ☐Not applicable

Led by the concept of "Science First", the company aspires to be a global industrial tyre "quality" leader and a sustainable tyre manufacturing company with world-class influence, accelerates the construction of the five Fengshen We will accelerate the construction of the five Winds, namely World Winds, Science and Technology Winds, Digital Winds, Green Winds, and Humanity Winds, actively promote the "315" strategy, and implement the "6+X" key action plan, so as to push forward the company's high-quality and sustainable development.

(iii) Business plans

√Applicable Not applicable

1. Compact basic management, to achieve safety zero accident

Taking the landing of the FORUS system as an opportunity, upgrading the company's HSE management system; practicing social responsibility and actively introducing the ESG system; deepening the management practice of the "dual prevention mechanism + safety information platform"; improving the quality and efficiency of the management of high-risk accidents, the return of accidents/hidden dangers to risks, the risk abatement plan, and the risk study and early warning analysis. The company will improve the quality and efficiency of high-risk accident management, accident/hidden danger return to risk, risk abatement plan, risk research, judgement and early warning analysis, etc., so as to achieve that the risks of larger or above are within the acceptable range and under safety control; promote the improvement of the skills of the safety profession and the professional safety personnel through the means of training practice, mutual inspection by the experts and exchange of benchmarks; and continue to push forward the construction of the intelligent HSE project.

2. Increase market restructuring and promote sales business transformation

Continue to promote market restructuring. Actively respond to the long-term systematic pressure faced by the supporting market and solve the problem of poor profitability in the supporting market. Make use of the PM portfolio of the product market to seek new business growth, and carry out various business tasks such as supporting high-end models, supporting high-end products, and developing special tyre market on the basis of profit improvement. At the same time, we should focus on the development of the domestic host aftermarket and international top host supporting plant such as Daimler, VOLVO, SCANIA, and enter the world-class circle of friends.

Promote the transformation of sales model. In the domestic radial tyre repair market, continue to promote the sales layout of "9+1" regions & commercial agency, optimise the existing sales staff: turn some of the sales staff currently in charge of wholesalers into sales staff dedicated to visiting core retailers; guide the construction of the agent's full-time sales team of Fengshen; and promote the model of the commercial agency to achieve localisation of sales staff and better management of the core retailers' network. To realise the localisation of sales staff and better manage the core retailer network.

3. Strengthening core personnel management and implementing the talent development programme

Continuously carry out human resources reform, and work on improving organisational efficiency, perfecting talent management, improving incentive and constraint mechanisms, implementing accurate recruitment, strengthening training management, and implementing HR self-construction. Strengthening the functional construction of the Beijing headquarters, continuing to promote the introduction of high-level talents, and implementing the plan for the introduction of director-level (CXO) high-end talents and 50Plus professionals to meet the talent needs of the company's international development. We will continue to implement the "Eagle" Talent Plan,

and continue to arrange cross-base postings for key personnel, and continue to carry out on-the-job training to make the best use of their talents and support the company's business development.

Strengthen core personnel control. Combined with the company's turnover control objectives, through the combination of on-site management and indicator monitoring principles, according to the different levels of employees and demand for different objectives, classification, level by level to formulate measures to improve, focusing on improving the research and development of core talent and manufacturing system of the turnover control of new employees.

4. Strict risk prevention and control to achieve compliant operation

The Company earnestly implemented the requirements of the State Council SASAC on the construction of the rule of law and the implementation of the Measures for Compliance Management of Central Enterprises, and continued to promote the special work of the "Year of Strengthening Compliance Management". With the implementation of the compliance management checklist as the starting point, the Company strengthened the "three lines of defence" of compliance management. The Company also cooperated with external legal intermediaries to strengthen the prevention of compliance risks.

Strengthening the whole process of contract management before, during and after the contract, promoting the digital management of the contract, improving the quality of the whole process of contract management, and striving to reduce the number of new disputes and litigation cases. Keeping an eye on the handling of key cases, promoting the development of cases in the direction of favouring the company, and protecting the company's intellectual property rights in accordance with the law.

(iv) Possible risk exposure

√Applicable Not applicable

1. Risk of changes in the international political economy

In recent years, the international competitive environment has become increasingly complex, with the trend of anti-globalisation on the rise, and the global industrial chain and supply chain facing the risk of "chain breakage"; international trade frictions are on the rise, especially trade protectionism against China. During the reporting period, factors such as the escalation of foreign geopolitical conflicts represented by the Russian-Ukrainian war have intensified global inflation, and the world economic growth has faced serious challenges.

At the same time, the company's import and export business settlement currency is mainly the United States dollar, due to the volatile international macroeconomic situation, the United States dollar exchange rate fluctuations against the Renminbi obvious, the company's performance has a greater impact.

2. Raw material price fluctuation risk

Natural rubber is the main raw material for the Company's tyre manufacturing. As a commodity, the price of natural rubber is closely linked to trade policies, exchange rates and capital market conditions. In recent years by the influence of overseas commodity markets, natural rubber, steel prices fluctuated sharply, other chemical raw materials prices are also due to the national environmental policy and elimination of low-end overcapacity impact of the rising trend. As natural rubber, synthetic rubber, as well as carbon black, steel cord is the main raw materials for the production of tyres, accounting for a large proportion of production costs, so the substantial fluctuations in raw material prices will have a greater impact on the company's cost control and operating results. At the same time, energy prices are still running at a high level, which has a greater impact on the company's costs.

3. International trade barriers to enhance the risk

In recent years, with the United States, Europe and the United States of America on China's tyre exports launched anti-dumping investigation activities began, Brazil, India and other countries have gradually joined in, or to raise the threshold of access to limit China's tyre exports. 2021 May the U.S. Department of Commerce announced for the Southeast Asian countries involved in the region of the final ruling on the double anti-dumping duty rate of the product, disguised as an increase in China's tyre enterprises' export costs. The US Department of Commerce announced in May 2021 the final results of the double anti-duty rate on products related to Southeast Asia, in effect increasing the export cost of Chinese tyre enterprises.

Section IV. Corporate governance

I. Information note on corporate governance

☒Applicable ☐Not applicable

In strict accordance with the requirements of the Company Law, the Securities Law, the Guidelines for the Governance of Listed Companies and the documents on corporate governance issued by the China Securities Regulatory Commission and the Shanghai Stock Exchange, the Company has continuously improved its corporate governance structure, standardised the operation of the Company, strengthened its internal management and enhanced information disclosure, and has established a relatively perfect corporate governance structure and corporate governance system.

1. On shareholders and general meetings:

The Company has standardised the implementation of the convening, holding and proceedings of the general meeting of shareholders in accordance with the requirements of the "Normative Opinions on General Meetings of Shareholders of Listed Companies", the "Rules of Procedure for General Meetings of Shareholders" and the "Articles of Association of the Company". It has established a corporate governance structure capable of ensuring that all shareholders can fully exercise their legal, administrative regulations and legitimate rights, treating all shareholders equally and ensuring that shareholders can fully exercise their rights and protect their legitimate interests.

2. On controlling shareholders and listed companies:

The Company and the controlling shareholder are clearly distinguished in terms of assets, finance, organisations and business management, and each is independently accounted for and bears responsibilities and risks independently. The Board of Directors, Supervisory Committee and internal organisations of the Company operate independently. The controlling shareholder exercises its rights and undertakes obligations in strict accordance with the relevant provisions of the Company Law and the Articles of Association. The Company's connected transactions are fair and reasonable, and the pricing basis, conclusion of agreements and performance of connected transactions are disclosed in a timely and adequate manner.

3. On directors and boards of directors:

The Directors of the Company attend the meetings of the Board of Directors and the general meetings of the Company in accordance with the relevant laws and regulations and in a conscientious and responsible manner, exercising their rights and fulfilling their obligations faithfully, honestly and diligently. The Board of Directors of the Company has set up four specialised committees, namely Strategy Committee, Audit Committee, Nomination Committee and Remuneration and Evaluation Committee, and the specialised committees have been carrying out their work in earnest, giving full play to their professional functions, and operating in accordance with the provisions of the relevant rules of procedure and rules of procedure. The independent directors earnestly fulfilled their duties as independent directors, actively attended the relevant meetings, carefully considered the motions of the Board of Directors, and expressed relevant opinions on major issues and matters requiring prior approval or independent opinions from the independent directors as required, giving full play to the role of the independent directors, and providing an effective guarantee for the scientific decision-making of the Board of Directors.

4. On the Supervisor and the Supervisory Board:

In accordance with the Rules of Procedure of the Supervisory Committee, all Supervisors of the Company, in the spirit of being responsible to the shareholders, conscientiously fulfilled their duties and supervised daily connected transactions, connected transactions, the financial position of the Company, as well as the legality and compliance of the performance of duties by the Directors and senior management of the Company.

5. On information disclosure and transparency:

The Board of Directors of the Company has designated the secretary of the Board of Directors to be responsible for information disclosure, set up an investor relations management department with corresponding personnel to fulfil the obligation of information disclosure, receive visits and answer enquiries in accordance with the law, and designated China Securities Journal and Shanghai Securities News as the media of the Company's information disclosure, so as to disclose the relevant information of the Company in a true, accurate, complete and timely manner.

6. On daily regulatory and preventive work:

The Company has formulated the Registration and Filing System for Informants of Insider Information, the Working System for the Secretary of the Board of Directors, and the Accountability System for Material Errors in Disclosure of Information in the Annual Report. During the reporting period, the daily supervision work was carried out in a solid manner to ensure that the Company's operation and management were legal and compliant, the Company's assets were safe and intact, the disclosure of information was true and accurate, and there was no incident of using insider trading.

7. On connected transactions:

The Company insists on regulating the business of connected transactions in strict accordance with the Articles of Association, Rules of Procedure of the General Meeting of Shareholders, Rules of Procedure of the Board of Directors, Working System of Independent Directors, Measures for the Administration of Connected Transactions and other relevant regulations, and the independent directors and lawyers have issued testimonials to continuously improve the level of standardised operation of the Company.

8. On investor relations management:

During the reporting period, the Company maintained close daily communication with investors in a transparent, open and fair manner, kept abreast of market dynamics, analysed the focus of market concerns, organised and participated in a variety of forms of investor meetings, and continued to pass on timely information about the Company through a variety of channels such as SSE E Interactive, emails, hotlines and other channels, to enhance communication with investors and strengthen market confidence.

9. On the management of the registration of insiders:

The Company has formulated and improved the Registration and Filing System for Informants of Insider Information in strict accordance with the Company Law, Securities Law, Administrative Measures for Disclosure of Information by Listed Companies and other relevant regulations, and has done a good job in keeping the confidentiality and registration of insider information such as interim reports and periodic reports, and has strictly managed the use of information by the Company's external information users, so as to effectively maintain the principle of fairness in the disclosure of the Company's information.

II. Specific measures taken by the controlling shareholders and de facto controllers of the Company to ensure the independence of the Company's assets, personnel, finances, organisations and business, as well as the solutions adopted to affect the independence of the Company, the progress of work and the follow-up work plan

☒Applicable ☐Not applicable

The Company and the controlling shareholder are clearly distinguished in terms of assets, finance, organisations and business management, and each is independently accounted for and bears responsibilities and risks independently. The Board of Directors, Supervisory Committee and internal organisations of the Company operate independently. The controlling shareholder exercises its rights and undertakes obligations in strict accordance with the relevant provisions of the Company Law and the Articles of Association. The Company's connected transactions are fair and reasonable, and the pricing basis, conclusion of agreements and performance of connected transactions are disclosed in a timely and adequate manner.

The situation of controlling shareholders, de facto controllers and other units under their control engaging in the same or similar business as the Company, as well as the impact on the Company of competition in the same industry or significant changes in the situation of competition in the same industry, the measures taken to resolve the situation, the progress of the resolution, and the subsequent resolution plan

☒Applicable ☐Not applicable

On 14 February 2014, the Company disclosed the Announcement on the Implementation of Commitments by Shareholders of the Company (for details, please refer to Announcement No.: Pro 2014) (-006), Announcement on Further Clarification of Commitment Matters by Controlling Shareholders of the Company (Announcement No. Pro 2014-020) disclosed on 21 June 2014

On 6 June 2016, the Company disclosed the "Announcement on Purchase and Sale of Assets and Connected Transactions (Announcement No.: Lin 2016-048), intending to purchase 100% equity interests in Fengshen (Taiyuan) and 100% equity interests in Qingdao Huanghai Rubber Co. from Rubber Company in cash; purchase 10% equity interests in **Pirelli** Industrial S.r.l. from Pirelli in cash, and meanwhile to Purchase of 10% equity interest in Pirelli Industrial S.r.l. from Pirelli in cash, and sale of Jiao Feng Style S.r.l. to Pirelli in cash.

The transaction plan of 80% equity interest in God Tire Limited Liability Company and other subject assets, and completed the delivery on 22 October 2016 (Announcement No.: Pro 2016-066).

On 13 April 2017, the Company disclosed the "Proposed Purchase of Assets by Issuance of Shares and Raising of Matching Funds and Connected Transaction of Fengshen Shares" (Announcement No. Pro 2017-024), in which the Company proposed to carry out a major asset reorganisation to purchase equity interests in Guilin Benefo Tire Company Limited and other Subject Assets from the counterparties through the issuance of shares respectively. As the Asset Injection Agreement signed in advance by the parties to the transaction was entered into on 2017

It was automatically terminated on 31 December, and the Company convened an extraordinary general meeting on 22 January 2018 to consider the "Report on the Termination of the Material Asset Restructuring Matters and Withdrawal of Relevant Application Documents" and other matters, and the relevant motions were not passed. On 24 January 2018, the Company disclosed an interim announcement (Announcement No.: Pro 2018-013) that as the legal basis for the Transaction had ceased to exist, there were objectively significant impediments to the continuation of the Transaction.

On 16 March 2018, the Company disclosed the "Announcement of Fengshen Shares on the Signing of Equity Custody Agreement and Connected Transaction Matters (Announcement No.: Pro 2018-020), the Company accepted the entrustment to manage the equity interest of Guilin Benefo Tyre Company Limited, the other industrial tyre assets under the controlling shareholder Rubber Company.

On 4 December 2018, the Company disclosed the "Proposal on the Signing of Equity and Debt Transfer Agreement and Connected Transaction" and the "Proposal on the Signing of Equity Custody Agreement and Connected Transaction" (Announcement No.: Pro 2018-063). The Company and Qingdao Yellow Sea Rubber Group Limited Liability Company (hereinafter referred to as "Yellow Sea Group") entered into the Equity and Debt Transfer Agreement in respect of Qingdao Yellow Sea Rubber Company Limited (hereinafter referred to as "Yellow Sea Limited"), pursuant to which the Company transferred 100% equity interest in Yellow Sea Limited directly held by the Company, and 100% equity interest in Yellow Sea Limited as at 6 June 2018, to Qingdao Yellow Sea Rubber Company Limited. ("Huanghai Limited"), under which the Company transferred 100% equity interest in Huanghai Limited directly held by the Company and the equity interest in Huanghai Limited as at 30 June 2018

30 the Company's claim on Huanghai Limited was transferred to Huanghai Group. The Company also signed the Equity Trusteeship Agreement with Yellow Sea Group in respect of Yellow Sea Limited, whereby Yellow Sea Group entrusted the Company with the management of 100% equity interest in Yellow Sea Limited transferred by the Company (Announcement No.: Pro 2018-064). On 4 December 2018, the Company disclosed the "Proposal on the Signing of the <Equity Trusteeship Termination Agreement> and Related Transaction Matters", the It was agreed that the Company would enter into the Equity Trusteeship Termination Agreement with Rubber Company, the controlling shareholder, to terminate the trusteeship of 100% equity interest in Guilin Benefo Tire Company Limited (Announcement No.: Pro 2018-065).

The Company signed the Equity Escrow Agreement with PTG on 12 June 2018, 28 June 2019 and 24 July 2020 respectively, accepting the entrustment of 100% equity interest in its wholly-owned subsidiary, Toup Trading (Beijing) Company Limited (Announcement No.: Pro 2018-043, Pro 2019-047 and Pro 2020-038).

On 29 June 2020, the Twenty-eighth Meeting of the Seventh Session of the Board of Directors of the Company was held, at which the "Proposal on the Company's plan for the non-public issue of A shares in 2020", "Proposal on the connected transactions involved in the Company's non-public issue of A shares and other relevant proposals" and "Proposal on the signing by the Company of the "Conditionally Effective Non-public Issue of Subscription Agreements" and other relevant proposals were considered and passed. Relevant motions. The controlling shareholder of the Company has issued a commitment that it will submit to Fengshen Shares by 31 December 2021 to inject its industrial tyre assets into Fengshen.

The specific proposal of God's shares is detailed in the "Response to Feedback on Application Documents for Non-public Offering of A Shares (Revised Draft)" disclosed by the Company on 19 September 2020.

On 30 November 2020, the Company disclosed the Announcement on the Signing of Equity Escrow Agreement and Related Transaction Matters. The Company and its controlling shareholder, China National Chemical Rubber Corporation, entered into the Equity Escrow Agreement, under which the Company will be entrusted with the management of 52% equity interest in PTG (Announcement No. Pro 2020-070).

On 9 February 2021, the Company disclosed the "Prompt Announcement on Planning of Major Asset Reorganisation", announcing that the Company intended to purchase 38% equity interest in PTG held by High Grade (HK) Investment Management Limited ("HG") by way of cash payment. ("HG").

On 2 June 2021, the Company held the Thirty-fifth Meeting of the Seventh Session of the Board of Directors and considered and passed the "Proposal on the Specific Plan of the Company's Current Restructuring" and other proposals related to the restructuring matter, in which the Company proposed to purchase the 38% equity interest in PTG held by HG, which had been listed on the Beijing Property Rights Exchange and transferred by the Company through its wholly-owned subsidiary, Fengshen Hong Kong, by way of cash payment.

On 12 July 2021, the Company held the Thirty-sixth Meeting of the Seventh Session of the Board of Directors and considered and passed the Proposal on Termination of Major Asset Reorganisation of the Company. Considering that the controlling shareholder has already entrusted its 52% equity interest in PTG to the Company, the business synergy between the Company and PTG is currently progressing smoothly. The Company will actively study with the controlling shareholder to seek ways to completely resolve the competition in the same industry. In order to effectively safeguard the interests of the listed company and investors, the Company has decided to terminate the restructuring after prudent study.

On 31 December 2021, the Company disclosed the "Announcement on the Proposed Acquisition of 38% Equity Interests in PTG by Controlling Shareholders", Rubber Company has been An agreement was signed with HG on 30 December 2021 to acquire its 38% stake in PTG.

On 30 June 2022, the Company disclosed the "Announcement on the Completion of the Acquisition of 38% Equity Interests in PTG by the Controlling Shareholder", which transaction has been performed The Company has completed the filing procedures with the relevant ministries and commissions of the State, and on 28 June 2022, the formal delivery was completed.

On 3 August 2022, the Company held the ninth meeting of the eighth session of the Board of Directors and agreed that the Company would be entrusted with the management of 38% of the equity interest in PTG held by Rubber Company, and that the Company would be entrusted with the management of a total of 90% of the equity interest in PTG after the effective date of this agreement.

Section V. Environmental and social responsibility

I. Status of environmental information

Whether mechanisms related to environmental protection have been established	be
Invested in environmental protection during the reporting period (unit: RMB 10,000)	1,302.54

(i) a description of the environmental protection situation of the Company and its

**principal subsidiaries which are key emission units as announced by the
environmental protection authorities**

√Applicable ☐Not applicable

1. sewage information

√Applicable ☐Not applicable

Fengshen and its subsidiary Taiyuan Base belong to the key emission units announced by the ecological environment department, and the specific environmental protection situation is as follows:

(1) Main pollutants and

characteristic pollutants

wastewater: COD, ammonia

nitrogen, PH

Gum refining, moulding and vulcanisation exhaust:

particulate matter, non-methane hydrocarbons, odour

concentration Boiler exhaust: sulphur dioxide, nitrogen

oxides, smoke and dust

(2) Discharge

Method

Wastewater

discharge

method:

Jiaozuo base is divided into two plants, east and west, production and living wastewater through the company's water treatment system, in accordance with the "Rubber Products Industry Pollutant Emission Standards"(GB27632-2011) and "Comprehensive Wastewater Emission Standards"(GB8798-1996) treatment to meet the standards, the majority of the treated wastewater of the east plant for reuse, the rest is discharged into municipal sewage pipe network, through Jiaozuo City Kanda The rest is discharged into the municipal sewage network and centrally disposed by Jiaozuo Kangda Water Co. West plant wastewater is partly reused, and the rest is discharged into the municipal sewage network and disposed of centrally by Jiaozuo City Industrial Clustering Zone Zhongzhan District Wastewater Treatment Plant of Jiaozuo City Industrial Clustering Zone of Jiaozuo City (Jiaozuo) Water Service Co.

Taiyuan base has constructed a sewage network, steam condensate is all reused, production and domestic wastewater is treated by the company's water treatment system, in accordance with the "Pollutant Emission Standards for Rubber Products Industry"(GB27632-2011), after treatment to meet the standards, the production wastewater together with domestic sewage is connected to municipal pipeline network and enters the Qingxu County Wastewater Treatment Plant.

Emission methods for refining, moulding and vulcanising exhaust gases:

Rubber refining, moulding and vulcanisation exhaust gases are collected through air collecting hoods, treated by VOCs treatment facilities, and then led up to the standard emission. Boiler exhaust emission method:

There are 3 sets of 130t/h boilers in the power operation department of Jiaozuo Base East Plant (with 2 sets in reserve) corresponding to 3 sets of sulphur denitrification and dedusting facilities. The boiler exhaust gas will be discharged through the 150m chimney at high altitude after being processed to meet the standard according to the "Emission Standards for Air Pollutants from Coal-fired Power Plants" of Henan Province (DB41/1424-2017) after being processed to meet the standard by the desulphurisation, denitrification and dedusting facilities.

There are 3 gas boilers in Taiyuan Power Plant, respectively 2 sets of 35T and 1 set of 20T. The boilers are fuelled by gas and natural gas, and an on-line monitoring system of flue gas from overhead sources is installed at the chimney discharge port for real-time monitoring of various pollutants, which is discharged at high altitude through a 60 m chimney. The boiler exhaust gas carries out the special emission limit value of Standard 3 in Boiler Air Pollutant Emission Standard GB13271-2014.

During the reporting period, the Company's major pollutants and characteristic pollutants were all in compliance with the emission standards, and there were no cases of exceeding the emission standards.

2. Construction and operation of pollution prevention and control facilities

☒Applicable ☐Not applicable

(1) There is one set of sewage treatment system in the east and west of Jiaozuo base, with a treatment capacity of 12000t/d and 1920t/d. Production wastewater, domestic wastewater and domestic water of neighbouring residents are collected and disposed of by the sewage treatment station in the plant and used as circulating cooling water for the power plant and water for greening of the plant after in-depth treatment in the wastewater treatment facilities. On-line monitoring facilities are installed at the total outlet of the plant and networked with the

environmental protection department for real-time monitoring of pollutant discharge, and all pollutants are discharged in compliance with the standards.

Exhaust gases generated from the refining, moulding and vulcanisation processes in the east and west plants of Jiaozuo Base are treated with VOCs and discharged in compliance with the standards, and routine environmental monitoring is carried out on a quarterly basis in accordance with the requirements of the Emission Permit.

There are three 130t/h boilers in the power supply department of Jiaozuo base's east plant (two boilers in use and one in reserve), corresponding to three sets of desulphurisation, denitrification and dust removal facilities.

(2) Taiyuan base has a set of wastewater treatment system with a treatment capacity of 2400t/d. The waste gas generated from rubber refining, moulding and vulcanisation processes meets the emission standards after treatment with VOCs and is subject to quarterly routine environmental monitoring in accordance with the requirements of the sewage discharge permit; there are three gas boilers in the power plant, namely, two 35T and one 20T, equipped with two sets of low-NO_x combustion + FGR flue gas cycle denitrification system, one set of gas purification and desulphurisation system, and one set of SCR denitrification system. There are three gas boilers in the power plant, namely, two sets of 35T, one set of 20T, two sets of low-NO_x combustion + FGR flue gas cycle denitrification system, one set of gas purification and desulphurisation system and one set of SCR denitrification system.

During the reporting period, the Company's environmental protection facilities all operated normally and reliably without any abnormalities.

3. Environmental impact assessment of construction projects and other administrative licences for environmental protection

☐Applicable ☒Not Applicable

4. Emergency Response Plan for Environmental Emergencies

☒Applicable ☐Not applicable

- (1) The Jiaozuo base has formulated the Emergency Response Plan for Environmental Emergencies and completed the filing with the Ecological Environment Bureau of Jiaozuo City.
- (2) Taiyuan Base has formulated the Emergency Response Plan for Environmental Emergencies and completed the filing with the Qingxu County Bureau of Ecology and Environment.

5. Environmental self-monitoring programme

☒Applicable ☐Not applicable

Jiaozuo Base prepared a daily environmental monitoring programme for 2022 and commissioned Zhengzhou Tongbiao Environmental Testing Co., Ltd, a third-party environmental testing company, to carry out daily monitoring of the east plant area in accordance with the programme, and commissioned Henan Heyang Environmental Technology Co., Ltd, a third-party environmental testing company, to carry out daily monitoring of the west plant area in accordance with the programme, and the monitoring results were uploaded to the environmental information management system of the enterprises and institutions of Henan Province in accordance with the requirements.

The Taiyuan base prepared a daily environmental monitoring programme for 2022 and commissioned a third-party environmental testing company, Shanxi Yunplatform Sunscape Environmental Monitoring Company Limited, to carry out daily environmental testing in accordance with the monitoring programme.

6. Administrative penalties imposed on environmental issues during the reporting period

☐Applicable ☒Not Applicable

7. Other environmental information that should be made public

☒Applicable ☐Not applicable

The company's environmental protection information is disclosed on the corresponding environmental protection information disclosure website in accordance with the requirements of the relevant environmental protection authorities.

(ii) Description of environmental protection of companies other than priority emission units

☐Applicable ☒Not Applicable

(iii) Relevant information conducive to the protection of ecology, prevention of pollution and fulfilment of environmental responsibility

☒Applicable ☐Not applicable

Jiaozuo base west plant to create "rubber products industry A-level performance" enhancement project, through the installation of CO catalytic combustion equipment in the north side of the rubber refining workshop, the rubber refining workshop 6 sets of refiners for the second sealing, the carbon black unpacking warehouse for the second sealing, the vulcanisation workshop to install the side of the suction collector and the implementation of other sub-projects, the enterprise pollutant emissions will be further reduced. further decrease.

Jiaozuo base east plant refining centre carbon black unpacking warehouse using magnetic suction curtain for secondary closure, both to improve the collection efficiency of the site particles,

but also to increase the neatness of the site; increase the dust removal equipment, increase the efficiency of the particles, reduce the emissions of particles.

The company strictly follows the requirements of laws and regulations, adopts advanced treatment technology to treat wastewater and waste gas in depth, and promotes environmental management with FORUS management system, so as to achieve continuous and stable emission of all kinds of pollutants better than the national standards, and achieve good environmental and social benefits.

(iv) Measures taken to reduce its carbon emissions during the reporting period and their effects

Whether or not carbon reduction measures have been taken	be
Reduction of carbon dioxide equivalent emissions (in tonnes)	16,273
Types of carbon reduction measures (e.g. use of clean energy for electricity generation, use of carbon-reducing technologies in production processes, research and development of production facilities, etc.) (e) New products that contribute to carbon reduction, etc.)	In 2022, Fengshen Tyre will implement key energy-saving and low-carbon projects, technological upgrading and technical improvement. The total number of projects for waste heat utilisation and elimination of outdated equipment is 12. Post equipment, energy classification and utilisation, utility integration and other projects.

explicit explanation

√Applicable □Not applicable

The company takes green manufacturing as the goal, actively develops low-carbon economy, continuously carries out energy-saving and consumption reduction activities, applies the technology of resource and energy recycling and efficient use, and relies on the information management platform to accurately manage energy consumption, improve the efficiency of comprehensive use of resources and reduce resource and energy consumption, which effectively promotes the advancement of energy-saving and carbon-reduction work.

II. Status of work on social responsibility

(i) Whether a separate social responsibility report, sustainability report or ESG report is disclosed

Luggage that warms the way to school.
Of which: funds (\$ million)	0	
Depreciation of materials (\$ million)	1.03	Value of office supplies purchased for village committees by the village task force 0.122 million; donated epidemic prevention materials valued at 0.48 million yuan; consold The Government has provided assistance to the needy in the amount of RMB 0.23 million, and has provided university students with a gift of RMB 1,000,000. The value of the suitcases is \$0.02 million.
Number of beneficiaries (persons)	926	The company donated 84 disinfectant to the villages supported by the village teams. 200 kg, 4,600 medical surgical masks and other anti-epidemic materials were distributed to all the people in the village to protect their lives. Life Health.
Forms of assistance (e.g. industrial poverty alleviation, employment)	poverty reduction through employment	Job referrals for poverty-eradication and monitoring households helped to stabilise 3 persons.

(Poverty alleviation, education for poverty alleviation, etc.)		Employment.
----------------------------------------------------------------	--	-------------

explicit explanation

√Applicable □Not applicable

In order to consolidate the results of poverty eradication and prevent the return of poverty, the company's village task force has carried out centralised and regularised inspection activities to prevent the return of poverty, implemented the "six must be inspected and six upgraded" special action for consolidating and expanding the results of poverty eradication and preventing the return of poverty, weaved a dense protective net against the return of poverty, and built up a firm defensive line to prevent the return of poverty. Through policy support, 100 per cent of the labour force of poverty-stricken and monitored households in the villages in which they are stationed who have the ability and desire to work have been employed, eliminating the risk of returning to poverty and causing it.

The village task force focuses on promoting the strategy of rural revitalisation, writing research reports on rural revitalisation, planning and promoting the implementation of programmes, and leading and enhancing the self-development capacity of the village committees of the villages in which they are stationed. The team has assisted the village branch in promoting the creation of a "five-star" branch, with a clear goal of creating a star. We have carried out intensive improvement of the human environment and completed the greening project. Through the implementation of support measures, we have continuously improved the governance effectiveness of village committees, dug deep into income-generating projects, strengthened the collective economy, and led the masses to become rich together.

(i) Explanation of the Company's analysis of the reasons for and effects of changes in accounting policies and accounting estimates

☒Applicable ☐Not applicable

(1) Implementation of Accounting Standard Interpretation No. 15

The Ministry of Finance (MOF) issued the "Interpretation of Enterprise Accounting Standards No. 15" (Caijing [2021] No. 35 to

(hereinafter referred to as "Interpretation No. 15").

① Accounting for Trial Sales

Interpretation No. 15 prescribes the accounting treatment and presentation for the sale of products or by-products produced before a fixed asset reaches its intended state of use or in the course of research and development, and stipulates that the cost of fixed assets or research and development expenditures should not be reduced by the net amount of revenues from sales of trial runs after offsetting the costs incurred. This provision is effective from 1 January 2022 for the period from the beginning to the end of the earliest period for which the financial statements are presented.

Pilot sales occurring between 1 January 2022 should be adjusted retrospectively. The implementation of this provision did not have a material impact on the Company's financial position and results of operations.

② Judgement on loss-making contracts

Interpretation No. 15 clarifies that the "cost of performing the contract", which an enterprise takes into account in determining whether a contract constitutes a loss-making contract, shall be It also includes an apportionment of the incremental cost of performing the contract and other costs directly related to the performance of the contract. This provision is effective from 1 January 2022.

The Company shall implement this provision for contracts for which it has not yet fulfilled all obligations as of 1 January 2022, and the cumulative effect shall be adjusted to retained earnings and other related financial statement items at the beginning of the year in which the provision is implemented, but not to the comparative financial statement data of the previous period. The implementation of this provision did not have a significant impact on the Company's financial position and results of operations.

(2) Implementation of the Circular on Issues Related to the Application of the Provisions on Accounting for Rental Concessions Associated with the New Crown Pneumonia Epidemic

On 19 May 2022, the Ministry of Finance ("MOF") issued the "Notice on Issues Related to the Application of the Provisions on Accounting Treatment for Rental Concessions Related to the New Crown Pneumonia Epidemic" (Caihui [2022] No. 13), which once again adjusted the scope of application of the simplified approach to allow for rental concessions related to the new Crown pneumonia epidemic by cancelling the original "Concessions

for lease payments payable before 30 June 2022". The scope of application of the simplified method of granting rent concessions related to NCPP has been adjusted again, and the original "Concessions only for lease payments payable before 30 June 2022" **has been cancelled.**

in order to apply the limitations of the simplified approach. For concessions on lease payments payable after 30 June 2022 that are directly attributable to the New Crown Pneumonia Outbreak, lessees and lessors may continue to elect to apply the simplified method of accounting treatment regulated by the "Provisions on Accounting for Rental Concessions Associated with the New Crown Pneumonia Outbreak", with all other conditions of application remaining unchanged.

The Company has elected to adopt the simplified method of accounting for all eligible lease contracts before the scope of application adjustment, and to adopt the simplified method of accounting for all eligible similar lease contracts after the scope of application adjustment, and to make retrospective adjustments to the relevant lease contracts for which lease modifications had been adopted for accounting treatment prior to the issuance of the notice, without adjusting the data of the comparative financial statements of the previous period; and to make adjustments to the relevant rental concessions that had not been subject to accounting treatment in accordance with the notice and that had taken place between 1 January 2022 and the effective date of the notice. The related rental concessions that occurred between 1 January 2022 and the effective date of the Circular that were not subject to accounting treatment in accordance with the provisions of the Circular were adjusted in accordance with the Circular.

(3) Implementation of Accounting Standard Interpretation No. 16

The Ministry of Finance (MOF) issued ASBE Interpretation No. 16 on 30 November 2022 (Caixin [2022] No. 31 to (hereinafter referred to as "Interpretation No. 16").

① Accounting for the income tax effects of dividends related to financial instruments classified by the issuer as equity instruments

Interpretation No. 16 stipulates that for financial instruments classified as equity instruments by an enterprise, if the related dividend expenses are deductible before enterprise income tax in accordance with the relevant provisions of the tax policy, the income tax effect related to the dividends should be recognised when the dividends payable are recognised and the income tax effect of the dividends should be charged to the current profit or loss in a manner consistent with the accounting treatment adopted for the past transactions or events that resulted in distributable profits or owner's equity items (including other comprehensive income items).

This provision is effective from the date of its publication, and if the relevant dividend payable occurs between 1 January 2022 and the date of its implementation, the dividend payable will be paid in accordance with this provision.

Adjustments should be made in accordance with this provision; retroactive adjustments should be made if they occurred prior to 1 January 2022 and the related financial instruments had not been derecognised as at 1 January 2022. The implementation of this provision did not have a significant impact on the Company's financial position and results of operations.

② Accounting treatment of an enterprise's modification of cash-settled share-based payment to equity-settled share-based payment

Interpretation No. 16 clarifies that if an enterprise modifies the terms and conditions of a cash-settled share-based payment agreement to make it an equity-settled share-based payment, at the date of modification (whether it occurs within the waiting period or after the end of the waiting period), it shall measure the equity-settled share-based payment at the fair value of the equity instrument granted on the date of modification, record the services acquired in capital surplus, and derecognise the cash-settled share-based payment liabilities recognised at the date of modification, with the difference between the two being recognised in profit or loss.

This provision shall come into force on the date of its publication. The relevant transactions newly added between 1 January 2022 and the date of its implementation shall be adjusted in accordance with this provision;

Transactions that occurred prior to 1 January 2022 that have not been treated in accordance with this provision should be retrospectively adjusted to reflect the cumulative effect of

This provision adjusts retained earnings and other related items as of 1 January 2022 and does not adjust the comparative financial statements of prior periods. The implementation of this provision did not have a significant impact on the Company's financial position and results of operations.

(iii) Accounting for the non-applicability of the initial recognition exemption for deferred income taxes related to assets and liabilities arising from a single transaction

Interpretation No. 16 provides that for transactions that are not business combinations and do not affect either accounting profit or taxable income at the time of the transaction

(The exemption from initial recognition of deferred income tax liabilities and deferred income tax assets does not apply to individual transactions (including lease transactions in which the lessee initially recognises a lease liability on the commencement date of the lease term and credits it to the right-of-use asset, and those in which the lessee recognises a projected liability for the existence of an abandonment obligation for a fixed asset, etc. and credits it to the cost of the relevant asset, etc.) that result in the creation of an equivalent amount of taxable temporary differences and deductible temporary differences. Deferred tax liabilities and deferred tax assets should be recognised when the transaction occurs in accordance with the relevant provisions of "Accounting Standard for Business Enterprises (ASBE) No. 18 - Income Taxes" and other relevant regulations.

(4) Implementation of Finance [2022] No. 32

The Ministry of Finance issued the Circular on Strictly Implementing Enterprise Accounting Standards and Effectively Doing a Good Job in Enterprises' 2022 Annual Report on 6 December 2022, which stipulates that enterprises should follow Enterprise Accounting Standard No. 1 - Inventory (Caixin [2006] No. 3),

In accordance with the relevant provisions of Accounting Standard for Business Enterprises No. 4 - Fixed Assets (Caijing [2006] No. 3, hereinafter referred to as the standard for fixed assets), the cost of routine repairs of fixed assets that do not qualify as subsequent expenditures on capitalisation of fixed assets shall be charged to profit or loss of the current period or to the cost

of the relevant assets in accordance with the object to be benefited at the time of incurring the cost of the fixed assets. Routine repair costs of fixed assets related to the production and processing of inventories are handled in accordance with the principle of inventory cost determination, while routine repair costs of fixed assets incurred by administrative departments, sales organisations dedicated to enterprises, etc. are charged to administrative expenses or selling expenses in accordance with their functional classification. The Company records the cost of routine repairs of fixed assets related to the production and processing of inventories as manufacturing expenses and no longer records them as administrative expenses.

All shareholders of Fengshen Tyre

Co:

Xinhuihui Shi Zi [2023] No.
ZA11475

I. Audit opinion

We have audited the financial statements of Fengshen Tire Company Limited (hereinafter referred to as Fengshen), which comprise the consolidated and parent company balance sheets as at 31 December 2022, the consolidated and parent company income statements, the consolidated and parent company statements of cash flows, and the consolidated and parent company statements of changes in equity for the year 2022, and the related notes to the financial statements.

In our opinion, the accompanying financial statements present fairly, in all material respects, the consolidated and parent company financial position of Fengshen as of 31 December 2022 and the consolidated and parent company results of operations and cash flows for the year ended 31 December 2022 in conformity with EITF.

II. Basis for forming an audit opinion

We conducted our audit in accordance with the provisions of the Chinese Standards on Auditing for Certified Public Accountants. Our responsibilities under those standards are further described in the section of the audit report entitled "Responsibilities of Certified Public Accountants for the Audit of Financial Statements". In accordance with the Code of Ethics for Certified Public Accountants in China, we are independent of Fengshen and have fulfilled our other responsibilities in respect of professional ethics. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

iii. key audit issues

Key audit matters are those matters that, in our professional judgement, are of most significance to the audit of the current financial statements. These matters are addressed in the context of the audit of the financial statements as a whole and the formation of an audit opinion, and we do not express an opinion on these matters individually. We have identified the following matters as key audit matters to be communicated in the audit report.

Key audit matters	How the matter was addressed in the audit
(i) Revenue recognition	70 / 352
In FY2022, the revenue from sales of tyres of Fengshen Shares amounted to RMB4,757,197,450.28, accounting for 95.37% of the total operating revenue, which is one of the major sources of revenue and key performance indicators of Fengshen Shares	The audit procedures we performed for revenue recognition from tyre sales consisted primarily of: (1) Understood, assessed and

	<p>(3) Perform period-over-period and month-over-month revenue and gross margins</p> <p>The Company also conducts comparative analyses of the industry, analyses changes in relevant financial indicators and reviews the reasonableness of changes in revenue;</p> <p>(4) Select revenue recognition samples and perform detail tests to verify sales orders, delivery records, shipping documents, customs declarations, bills of lading, sales invoices, payback records, and bookkeeping vouchers, etc.; and for export revenues, obtain customs export data to assess the authenticity and completeness of revenue recognition;</p> <p>(5) In conjunction with the audit of accounts receivable, key customers were selected to correspond with the current year's sales in order to assess the truthfulness and accuracy of revenue recognition;</p> <p>(6) A cut-off test is performed on income before and after the balance sheet date to assess whether income is charged to the appropriate accounting period;</p> <p>(7) Examine the adequacy and appropriateness of the presentation and disclosure of information relating to revenue recognition in the financial statements.</p> <p>When.</p>
(ii) Provision for decline in value of inventories	

<p>As shown in Note VII.9, as at 31 December 2022, the balance of inventories of Fengshen Shares was RMB1,142,871,658.38, and the amount of provision for decline in value of inventories was RMB25,818,536.23, which had a high carrying value, and the impact of the provision for decline in value of inventories on the financial statements was more significant, and the main raw materials of the products of Fengshen Shares were rubber and rubber products, and the price of rubber bulk commodities The prices of rubber commodities continue to fluctuate significantly, and there is a greater possibility of price decreases in the products of Fengshen Shares, and therefore we have made the provision for provision for decline in value of inventories a key audit matter.</p>	<p>The audit procedures we performed on the provision for inventory write-downs consisted primarily of:</p> <p>(1) Understood and tested internal controls related to the estimation of net realisable value of inventories and assessed the reasonableness of their design and the effectiveness of their implementation;</p> <p>(2) We monitor the inventory of Windsor Corporation and check the quantity and condition of the inventory and the age of the products;</p> <p>(3) Obtained a schedule of inventory impairment and reviewed the estimated selling price, selling expenses and related taxes used in the estimation of the net realisable value of inventories. Among other things, for the estimated selling price, we compared it to the most recent actual selling price;</p> <p>(4) Obtaining a breakdown of inventory decreases and recalculating them</p> <p>Inventory impairment results.</p>
---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------

IV. Other information

The management of Fengshen (hereinafter referred to as "management") is responsible for other information. Other information includes the information covered in Fengshen's Annual Report 2022, but excludes the financial statements and our audit report.

Our audit opinion on the financial statements does not cover other information, and we do not express any form of assurance conclusion on other information.

In conjunction with our audit of the financial statements, it is our responsibility to read the other information and, in doing so, to consider whether the other information is materially inconsistent with, or appears to be materially misstated in relation to, the financial statements or the information we have learnt in the course of our audit.

Based on the work we have performed, if we determine that other information is materially misstated, we should report that fact. In this regard, we have nothing to report.

V. Management and governance responsibilities for the financial statements

Management is responsible for the preparation of financial statements that present fairly, in accordance with enterprise accounting standards, and for designing, implementing and maintaining internal control necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing Fengshen's ability to continue as a going concern and disclosing matters related to going concern (where applicable) and applying the going concern assumption, unless liquidation is planned, operations are terminated or there is no realistic alternative. Governance is responsible for overseeing the financial reporting process for Windsor.

VI. Responsibilities of certified public accountants for the audit of financial statements

Our objective is to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an audit report that includes an audit opinion. Reasonable assurance is a high level of assurance, but it does not guarantee that an audit performed in accordance with auditing standards will always detect a material misstatement when it exists. Misstatements may result from fraud or error and are generally considered to be material if they could reasonably be expected, individually or in the aggregate, to affect the economic decisions of users of financial statements based on the financial statements.

In performing the audit in accordance with auditing standards, we use professional judgement and maintain professional scepticism. We also perform the following:

- (1) Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures to address those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for the audit opinion. The risk of not detecting a material misstatement due to fraud is higher than the risk of not detecting a material misstatement due to error, as fraud may involve **c o l l u s i o n** , forgery, intentional omissions, misrepresentation or overriding internal controls.
- (2) Understand internal controls relevant to the audit in order to design appropriate audit procedures.
- (3) Evaluate the appropriateness of accounting policies selected and the reasonableness of accounting estimates and related disclosures made by management.
- (4) Conclude on the appropriateness of management's use of the going concern assumption. At the same time, based on the audit evidence obtained, we conclude whether there is a material uncertainty about the existence of matters or circumstances that may give rise to significant doubt about Fengshen's ability to continue as a going concern. If we conclude that a material uncertainty exists, auditing standards require us to draw the attention of the users of the statements to the relevant disclosures in the financial statements in our audit report; if the disclosures are not adequate, we should issue a non-qualified opinion. Our conclusions are based on the information available as at the date of the audit report. However, future events or circumstances may cause Fengshen to be unable to continue as a going concern.
- (5) Evaluate the overall presentation (including disclosures), structure and content of the financial statements and whether the financial statements present fairly the underlying transactions and events.
- (6) Obtain sufficient and appropriate audit evidence about the financial information of the entities or business activities in Windsor to express an audit opinion on the financial statements. We are responsible for directing, supervising and performing the Group's audits and accept full responsibility for the audit opinion.

We communicate with governance on matters such as the scope, timing and significant findings of the planned audit, including communicating internal control deficiencies of concern identified in our audit.

We also provide a statement to governance that we have complied with ethical requirements related to independence and communicate with governance all relationships and other matters that could reasonably be perceived to affect our independence, as well as related precautions, if

applicable.

From the matters communicated to governance, we determined which matters were most significant to the audit of the current financial statements and, therefore, constituted key audit matters. We describe these matters in our audit report except where public disclosure of the matters is prohibited by law or regulation or, in rare instances, we determine that a matter should not be communicated in the audit report if it is reasonably anticipated that the negative consequences of communicating the matter in the audit report would outweigh the benefits to the public interest.

III. Basic company information

1. Company Profile

√Applicable □Not applicable

(hereinafter referred to as "the Company" or "Fengshen"), formerly known as Henan Tyre Company Limited, is a joint venture between Henan Tyre Group Limited Company, China Shenma Group Limited Company, Yugang (Henan) Development Company Limited, Jiaozuo City Investment Company, Jiaozuo City Zinc Factory, Jiangshan City Zinc Factory and Henan Tyre Group Limited Company. Approved by Henan Provincial People's Government, Henan Tyre Group Co., Ltd. jointly with China Shenma Group Co., Ltd., Yugang (Henan) Development Co., Ltd., Jiaozuo Investment Company, Jiaozuo Zinc Factory, Jiangyin Innovative Valve Valve Factory (renamed as Jiangyin Innovative Valve Valve Co., Ltd.) and Fengqiu Auxiliaries Factory of Henan Province were jointly established as a joint-stock limited company, which was approved by the Document No.49 of the Henan Provincial People's Government. The company was registered and established on 1 December 1998 in Henan Province Administration for Industry and Commerce.

The initial registered capital is RMB 180 million. The parent company of the Company is China National Chemical Rubber Corporation (formerly known as China National Chemical Rubber Corporation).

(the company, on 17 January 2013, the whole company was restructured and changed to China National Chemical Rubber Corporation)

Approved by the China Securities Regulatory Commission (hereinafter referred to as the "CSRC") under Circular No. 119 of the Securities and Futures Commission [2003], the Company launched a public offering of 75 million RMB ordinary shares (A) on 29 September 2003, which was listed on the Shanghai Stock Exchange on 21 October 2003 under stock code 600469, and the registered capital was increased to RMB255 million after the offering. After the issue, the registered capital increased to RMB255 million.

In June 2005, the Company was determined by the CSRC to be a pilot company for the equity distribution reform. At the resolution of the Third Sixth Meeting of the Board of Directors of the Company held on 5 July 2005, the seven non-circulating shareholders of the Company unanimously agreed to pay part of their respective shareholdings to the outstanding shareholders on a pro rata basis in consideration of their right to the circulation of the non-circulating shares, i.e., shareholders of the outstanding shares whose names appeared in the register of members as at the date of registration of shareholdings for the implementation of the Scheme would receive 4.2 shares for every 10 outstanding shares held by them. For every 10 outstanding shares held, 4.2 shares will be paid by the non-circulating shareholders; upon completion of the payment, the non-circulating shares held by the non-circulating shareholders of the Company will be granted the right to be listed and circulated. The non-circulating shareholders have made commitments on the restrictions on the circulation of their shares. on 29 July 2005, the equity distribution reform plan was approved by the State-owned Assets Supervision and Administration Commission of the State Council.

At the Extraordinary General Meeting of the Company held on 8 August 2005, the resolution on the shareholding reform programme of the Company was considered and approved. Implementation of the Programme
The share registration date of the Company was 12 August 2005, and the total share capital of the Company remained at 255 million shares after the completion of the share subdivision. After the completion of the share subdivision, the total share capital of the Company remained at 255 million shares.

On 25 June 2007, the Company received State-owned Assets Supervision and Administration Commission of the State Council's State-owned Assets Property Rights [2007] No. 545 "Reply to the Approval on Issues Relating to the Transfer of State-owned Shares of Fengshen Tire Company Limited", agreeing that the controlling shareholder of the Company, Henan Tire Group Company Limited, would transfer 100 million state-owned legal person shares of the Company to China Haohua Chemical (Group) Company Limited. 2007

On 11 October, 100 million shares held by Henan Tire Group Co., Ltd. were transferred to China Haohua Chemical (Group) Co.

After the completion of this transfer of state-owned shares, the total share capital of the Company remained at 255 million shares, of which China Haohua Chemical (Group) Corporation and Henan Tire Group Co. After the completion of this transfer of state-owned shares, the total share capital of the Company remained at 255 million shares, of which China Haohua Chemical (Group) Corporation and Henan Tire Group Co., Ltd. held 100 million shares and 33,866,810 shares, respectively. 30 May 2008, the Company's application for the non-public offering of shares was approved by the China Securities Regulatory Commission. 27 June 2008, the China Securities Regulatory Commission issued the Approval Reply No. [2008] 861 on Approval of the Non-public Offering of Shares by Windshen Tire Co. On 27 June 2008, China Securities Regulatory Commission (CSRC) issued CSRC Permit [2008] No. 861 "Approval of the Approval of the Non-public Offering of Shares by Fengshen Tire Company Limited", approving the Company's non-public offering of not more than 12,000,000 shares.

The registered capital increased to 37,494.2148 million shares after the non-public offering of 11,994.2148 million shares to seven specific parties, including the head office of the Company.

Ltd. holds 33,540,200 shares, Jiangsu Xingda Steel Cord Co.

Ltd. holds 10 million shares, Hubei Fuxing Science and Technology Co.

Ltd. holds 8.5 million shares, Lonking (Fujian) Bridge Box Co.

On 21 December 2009, China Haohua Chemical (Group) Corporation and China National Chemical & Rubber Corporation signed the Agreement on Transfer of State-owned Equity, under which China Haohua Chemical (Group) Corporation transferred 159,642,148 ~~shares~~ 42.58% of the total share capital of the Company) to China National Chemical & Rubber Corporation without compensation. On 7 January 2010, the State-owned Assets Supervision and Administration Commission of the State Council approved the aforesaid equity transfer by way of document SASAC [2010] No. 3. On 7 January 2010, the State-owned Assets Supervision and Administration Commission of the State Council approved the above equity transfer with the document of State-owned Property Rights [2010] 3.

(Ltd. held 59,642,148 shares of Fengshen, which were restricted shares and were not yet eligible for transfer, and the two parties entered into an agreement in 2010 to transfer the shares.

The Supplementary Agreement on the Transfer of State-owned Equity was signed on 31 August 2009, agreeing that the shares transferred to China National Chemical & Rubber Corporation would be set at a fixed price.

On 20 September 2010, the transfer and registration confirmation procedures for this gratuitous transfer of shareholdings were all completed. The shares held by China National Chemical & Rubber Corporation in the Company amounted to 100,000,000 shares, accounting for 26.67 per cent of the total share capital of the Company, making it the largest shareholder of the Company.

China Haohua Chemical (Group) holds 59,642,148 shares of the Company, accounting for 15.91% of the total share capital of the Company, and is the second largest shareholder of the Company.

On 16 May 2013, ChemChina Rubber Corporation entered into an agreement with China Haohua Chemical Group Corporation (the predecessor of "ChemChina") to establish a joint venture between ChemChina Rubber Corporation and China Haohua Chemical Group Corporation.

China Haohua Chemical (Group) Corporation, the former second largest shareholder of Fengshen shares; on 29 June 2012, the whole company was restructured and changed into a joint stock limited company) entered into the "Supplementary Agreement on Transfer of State-owned Equity Interests (II)", which stipulated that China Haohua Chemical Group Corporation would transfer the remaining 59,642,148 shares of Fengshen shares held by China Haohua Chemical Group Corporation to China Chemical Rubber Company Limited for no consideration. On 8 June 2013, the China Securities Regulatory Commission approved the waiver of the obligation to make a tender offer in respect of this gratuitous transfer of shares, and the registration procedures for the transfer of the aforesaid shares were completed on 5 July. As a result, the number of shares held by China National Chemical & Rubber Corporation in Fengshen increased from 100,000,000 shares to 159,642,148 shares, and the shareholding ratio increased from 26.67% to 42.58%. China Haohua Chemical Group Corporation no longer held the Company's shares, and the parent company of the Company remained as China National Chemical & Rubber Corporation, with no change in the actual controller.

In May 2016, according to the "Proposed Profit Distribution of the Company for the Year 2015", which was considered and approved by the 2015 Annual General Meeting of the Company, the 5 shares for every 10 shares to all shareholders based on the total share capital of 374,942,148 shares at the end of 2015, implemented on 29 June 2016

The share capital of the Company is RMB562,413,222.

On 29 June 2020, the Twenty-eighth Meeting of the Seventh Session of the Board of Directors of the Company considered and approved the relevant documents for the non-public offering of A shares.

On 20 October 2020, Fengshen received the "Approval for the Non-public Offering of Shares by Fengshen Tire Company Limited (Securities Regulatory Permit [2020] No. 2585)" from China Securities Regulatory Commission (CSRC), approving the Company's non-public offering of not more than 168,723,966 new shares. The new shares to be issued in 2020 were registered with China Securities Depository & Clearing Company Limited, Shanghai Branch on 12 November 2020 and the share registration procedures were completed. The new shares issued in 2020 were registered at the Shanghai Branch of China Securities Depository and Clearing Corporation on 12 November 2020, and after the issuance, China National Chemical & Rubber Corporation held 419,435,536 shares of the Company, accounting for 57.37% of the total share capital of the Company.

On 30 January 2023, the Company cancelled a total of 1,686,313 previously repurchased shares with China Securities Depository & Clearing Co.

After the cancellation, the total number of shares of the Company changed from 731,137,184 shares to 729,450,871 shares, of which the total number of limited share capital is 168,723,962 shares, accounting for 23.13% of the total share capital, and 562,413,222 shares, accounting for 76.87% of the total share capital.

The registered capital of the Company is RMB72,945.0871 million, and the unified social credit code of the business licence of the enterprise legal person is 914100007126348530, the registered place and

office is No. 48, Jiao Dongnan Road, Jiaozuo City, Henan Province, and the legal representative is Wang Jianjun.

The company belongs to the tyre manufacturing enterprises, belongs to the rubber manufacturing industry, the scope of business is: the company's production of tyres and related technology export business; the company's production of raw and auxiliary materials, machinery and equipment, spare parts, instruments and related technology import business; to carry out foreign cooperative production, processing, processing, sample processing, assembly and compensation trade business. Tyre production and sales; tyre production with the sale of raw and auxiliary materials; automotive and construction machinery spare parts sales.

The company's main products: all-steel radial tyres, bias tyres and so on.

These financial statements were approved for reporting by the Company's Board of Directors on 28 April 2023

2. Scope of consolidated financial statements

√/Applicable Not applicable

For details of changes in the scope of consolidation during the reporting period, please refer to "VIII. Changes in the Scope of Consolidation" in this note. For details of the Company's subsidiaries, please refer to "IX. Interests in other entities" in this note.

IV. Basis of preparation of the financial statements

1. Basis of preparation

本财务报表按照财政部颁布的《企业会计准则——基本准则》和各项具体会计准则、企业会计准则应用指南、企业会计准则解释及其他相关规定（以下合称“企业会计准则”），以及中国证券监督管理委员会《公开发行证券的公司信息披露编报规则第15号——财务报告的一般规定》的相关规定编制。

2. going concern

☒Applicable ☐Not applicable

The financial statements have been prepared on a going concern basis and there are no matters or circumstances that may cast significant doubt on the Company's ability to continue as a going concern for a period of 12 months from the end of the reporting period.

V. SIGNIFICANT**ACCOUNTING POLICIES****AND ACCOUNTING****ESTIMATES** Specific

accounting policies and

accounting estimate tips:

☒Applicable ☐Not applicable

The following disclosures have covered specific accounting policies and accounting estimates that the Company has formulated based on actual production and operating characteristics.

1. Statement of compliance with enterprise accounting standards

These financial statements comply with the requirements of the Enterprise Accounting Standards issued by the Ministry of Finance, and give a true and complete account of the Company's December 2022 financial statements. Consolidated and Parent Company Financial Condition at 31st and Consolidated and Parent Company Results of Operations and Cash Flows for Fiscal Year 2022.

2. accounting period

The Company's fiscal year begins on 1 January and ends on 31 December of the calendar year.

3. business cycle

☒Applicable ☐Not applicable

The Company's operating cycle is 12 months.

4. local currency

The Company's bookkeeping currency is RMB.

5. Accounting treatment of business combinations under common control and non-common control

☒Applicable ☐Not applicable

Business combinations under the same control: Assets and liabilities acquired by the combining parties in a business combination (including goodwill resulting from the acquisition of the consolidated party by the ultimate controlling party) are measured on the basis of the carrying value of the assets and liabilities of the consolidated party in the consolidated financial statements of the ultimate controlling party at the date of the combination. The difference between the book value of net assets acquired in the merger and the book value of the merger

consideration paid (or the total nominal value of the shares issued) is adjusted to the equity premium in capital surplus, and the retained earnings is adjusted to the extent that the equity premium in capital surplus is not sufficient to eliminate the difference.

Business combinations not under common control: The cost of the combination is the fair value of assets given, liabilities incurred or assumed, and equity securities issued by the purchaser at the date of purchase in order to obtain control of the acquiree. The difference between the cost of combination and the fair value of the acquiree's identifiable net assets acquired in the combination is recognised as goodwill; the difference between the cost of combination and the fair value of the acquiree's identifiable net assets acquired in the combination is recognised in profit or loss. Each of the identifiable assets, liabilities and contingent liabilities of the acquiree acquired in a combination that meets the conditions for recognition is measured at fair value at the date of purchase.

Directly related costs incurred for a business combination are charged to profit or loss as incurred; transaction costs for the issuance of equity or debt securities for the purpose of the business combination are included in the initial recognition amount of the equity or debt securities.

6. Methodology for the preparation of consolidated financial statements

✓Applicable

☐Not

applicable 1.

Scope of

consolidation

The scope of consolidation for the consolidated financial statements is determined on the basis of control, which includes the Company and all of its subsidiaries. Control means that the Company has power over the investee, enjoys variable returns through participation in the investee's related activities, and has the ability to use its power over the investee to affect the amount of its returns.

2. Consolidation process

The Company considers the entire enterprise group as one accounting entity and prepares consolidated financial statements in accordance with uniform accounting policies to reflect the financial position, results of operations and cash flows of the enterprise group as a whole. The effects of internal transactions between the Company and its subsidiaries and between subsidiaries are eliminated. If an internal transaction indicates that an impairment loss on the related asset has been incurred, the full amount of such loss is recognised. If the accounting policies and accounting periods adopted by subsidiaries are not consistent with those of the Company, necessary adjustments are made to the consolidated financial statements in accordance with the Company's accounting policies and accounting periods when preparing the consolidated financial statements.

The share of minority shareholders in the subsidiary's ownership interest, net profit or loss for the period and comprehensive income for the period are shown separately in the consolidated balance sheet under the item of ownership interest, in the consolidated income statement under the item of net profit and in the consolidated income statement under the item of total comprehensive income, respectively. The balance resulting from the excess of the minority shareholders' share of a subsidiary's loss for the period over the minority shareholders' share of the subsidiary's equity at the beginning of the period is eliminated to reduce the minority's equity.

(1) Increase in subsidiaries or operations

During the reporting period, if a subsidiary or business is added as a result of a business combination under the same control, the results of operations and cash flows from the beginning to the end of the period in which the subsidiary or business is combined are included in the consolidated financial statements, and adjustments are also made to the opening balance of the consolidated financial statements and the related items in the comparative statements, and the consolidated reporting entity is deemed to have existed from the point at which the party ultimately controlling the subsidiary or business began to control the subsidiary or business.

If an investee under the same control is able to exercise control over the investee as a result

of additional investment, etc., equity investments held prior to the acquisition of control over the consolidated entity are eliminated from the beginning of the comparative period by reducing the opening retained earnings or current profit or loss of the comparative period, respectively, if the equity investment was held before the acquisition of the control over the consolidated entity, from the later of the date of acquisition of the original equity interest and the date on which the consolidating entity and the consolidated entity are under the same control to the date of the consolidation.

During the reporting period, the addition of subsidiaries or businesses as a result of a business combination not under the same control is included in the consolidated financial statements from the date of purchase on the basis of the fair value of each identifiable asset, liability and contingent liability determined at the date of purchase.

If the Company is able to exercise control over an investee that is not under the same control due to additional investment, the equity in the investee held prior to the date of purchase is remeasured at the fair value of the equity in the investee at the date of purchase, and the difference between the fair value and its carrying amount is included in investment income for the current period. Other comprehensive income that can be reclassified to profit or loss and other changes in equity under the equity method in respect of the equity interest in the acquiree held prior to the date of purchase are transferred to investment income for the period in which the purchase is made.

(2) Disposal of subsidiaries

① General treatment

When control over an investee is lost due to the disposal of a portion of the equity investment or for other reasons, the remaining equity investment after disposal is remeasured at its fair value at the date of loss of control. The difference between the sum of the consideration received for the disposal and the fair value of the remaining equity interest, less the sum of the share of the original subsidiary's net assets continuously measured from the date of purchase or consolidation based on the original shareholding ratio and goodwill, is included in investment income in the period in which control is lost. Subsequent reclassification of equity investments in former subsidiaries

Other comprehensive income and other changes in owners' equity under the equity method of accounting are transferred to investment income in the current period when control is lost.

② Step-by-step disposal of subsidiaries

If the equity investment in a subsidiary is disposed of in stages through multiple transactions until the loss of control, the terms, conditions, and economic effects of each transaction for the disposal of the equity investment in the subsidiary meet one or more of the following conditions, which generally indicates that the multiple transactions are a package deal:

- i. These transactions are entered into simultaneously or with consideration of the effects of each other;
- ii. It is the totality of these transactions that will lead to a complete business result;
- iii. The occurrence of one transaction is dependent on the occurrence of at least one other transaction;
- iv. A transaction is uneconomical when viewed in isolation, but economical when considered in conjunction with other transactions.

If each transaction is a package transaction, each transaction is accounted for as a disposal of a subsidiary and loss of control; the difference between the disposal price and the share of the net assets of the subsidiary corresponding to the investment disposed of in each disposal prior to the loss of control is recognised in the consolidated financial statements as other comprehensive income, and is transferred to profit or loss for the period in which the loss of control occurs when the loss of control occurs.

If each transaction is not a package deal, prior to the loss of control, it is accounted for as a partial disposal of an equity investment in a subsidiary without the loss of control, and upon the loss of control, it is accounted for as a disposal of a subsidiary under the general treatment of disposal of subsidiaries.

(3) Purchase of minority interests in subsidiaries

The difference between the newly acquired long-term equity investment as a result of the purchase of a minority interest and the share of the subsidiary's net assets calculated on the basis of the newly acquired shareholding on an ongoing basis from the date of purchase or the date of consolidation is adjusted to the equity premium in capital surplus in the consolidated balance sheet, and the retained earnings are adjusted to the extent that equity premium in capital surplus is not sufficient to offset the difference.

(4) Partial disposal of equity investments in subsidiaries without loss of control

The difference between the disposal price and the corresponding share of the disposal long-term equity investment in the net assets of the subsidiary calculated on a continuous basis from the date of purchase or the date of consolidation is adjusted to the equity premium in capital surplus in the consolidated balance sheet, and if the equity premium in capital surplus is not sufficient to be eliminated, it is adjusted to retained earnings.

7. Classification of joint venture arrangements and accounting treatment of joint operations

√Applicable Not applicable

Joint venture arrangements are classified as joint operations and joint ventures.

A joint operation is a joint arrangement in which the parties to the arrangement are entitled to the assets and are liable for the liabilities associated with the arrangement. The Company recognises the following items relating to the share of interest in joint operations:

- (1) Recognition of assets held individually by the Company and of assets held jointly in proportion to the Company's share;
- (2) Recognition of liabilities borne individually by the Company and recognition of liabilities borne jointly in the Company's share;
- (3) Recognise revenue from the sale of the Company's share of common operating output;
- (4) Revenue from joint operations arising from the sale of output is recognised at the Company's share;
- (5) Expenses incurred separately are recognised, and expenses incurred in

joint operations are recognised in proportion to the Company's share. The Company's investments in joint ventures are accounted for using the equity method, as described in Note 21, "Long-term equity investments".

8. Criteria for determining cash and cash equivalents

Cash equivalents are investments held by an enterprise that have a short maturity (generally maturing within three months from the date of purchase), are highly liquid, are readily convertible to known amounts of cash and are subject to an insignificant risk of changes in value.

9. Foreign currency operations and translation of foreign currency statements

✓Applicable

□ Not applicable

1. Foreign currency operations

Foreign currency operations are recorded in RMB using the spot exchange rate or an approximate exchange rate at the date of the transaction as the conversion rate to translate foreign currency amounts into RMB. The balances of foreign currency monetary items at the balance sheet date are translated at the spot exchange rate at the balance sheet date, and the resulting exchange differences are included in profit or loss for the current period, except for exchange differences arising from special borrowings in foreign currencies relating to the acquisition and construction of assets eligible for capitalisation, which are dealt with in accordance with the principle of capitalisation of borrowing costs.

2. Translation of foreign currency financial statements

Assets and liabilities in the balance sheet are translated at the spot rate of exchange prevailing at the date of the balance sheet; items of owners' equity are translated at the spot rate of exchange prevailing at the time of their occurrence, except for the item "undistributed profits". Income and expense items in the income statement are translated using the spot rate of exchange at the date of the transaction or an approximate rate.

On disposal of a foreign operation, the difference in translation of the financial statements of the foreign currency related to that foreign operation is transferred from the owner's equity line to profit or loss in the period of disposal.

10. financial instrument

✓Applicable □Not applicable

1. Classification of financial instruments

Based on the Company's business model for managing financial assets and the contractual cash flow characteristics of financial assets, financial assets are classified on initial recognition as follows: financial assets at amortised cost, financial assets at fair value through other comprehensive income and financial assets at fair value through profit or loss.

The Company classifies financial assets at amortised cost that meet both of the following conditions and are not designated as at fair value through profit or loss:

- The business model is geared towards collecting contractual cash flows;
- Contractual cash flows represent only payments of principal and interest based on the amount of principal outstanding.

The Company classifies financial assets that meet both of the following conditions and are

not designated as at fair value through profit or loss as financial assets at fair value through other comprehensive income (debt instruments):

- The business model aims both to collect the contractual cash flows and to sell the financial asset;
- Contractual cash flows represent only payments of principal and interest based on the amount of principal outstanding.

For investments in non-trading equity instruments, the Company may irrevocably designate them as financial assets at fair value through other comprehensive income (equity instruments) on initial recognition. This designation is made on an individual investment basis and the underlying investment meets the definition of an equity instrument from the issuer's perspective.

Except for the above financial assets measured at amortised cost and at fair value through other comprehensive income, the Company classifies all remaining financial assets as financial assets at fair value through profit or loss. At initial recognition, the Company may irrevocably designate financial assets that would otherwise be classified as financial assets at amortised cost or at fair value through other comprehensive income as financial assets at fair value through profit or loss if the accounting mismatch can be eliminated or significantly reduced.

Financial liabilities are classified on initial recognition as: financial liabilities at fair value through profit or loss and financial liabilities at amortised cost.

Financial liabilities that meet one of the following conditions can be designated as financial liabilities at fair value through profit or loss at initial measurement:

- 1) The designation eliminates or significantly reduces accounting mismatches.
- 2) The management and performance of a portfolio of financial liabilities or a portfolio of financial assets and financial liabilities are managed and evaluated on a fair value basis in accordance with the enterprise's risk management or investment strategy as set out in a formal written document and reported on this basis within the enterprise to key management personnel.
- 3) The financial liability contains embedded derivatives that are subject to separate spin-off.

2. Basis of recognition and measurement of financial instruments

(1) Financial assets measured at amortised cost

Financial assets carried at amortised cost, including notes receivable, accounts receivable, other receivables, long-term receivables and debt investments, are initially measured at fair value, with the related transaction costs included in the amount initially recognised; accounts receivable that do not contain a significant financing component and those for which the Company has decided to disregard a financing component of no more than one year are initially measured at the contractual transaction price.

Interest calculated using the effective interest method during the holding period is recognised in profit or loss. Upon recovery or disposal, the difference between the price obtained and the carrying amount of the financial asset is recognised in profit or loss.

(2) Financial assets at fair value through other comprehensive income (debt instruments)

Financial assets (debt instruments) at fair value through other comprehensive income, including receivables financing and other debt investments, are initially measured at fair value, with the related transaction costs included in the initial recognition amount. The financial assets are subsequently measured at fair value, and changes in fair value are included in other comprehensive income, except for interest calculated using the effective interest rate method, impairment losses or gains and exchange gains or losses.

On derecognition, the cumulative gain or loss previously included in other comprehensive income is transferred out of other comprehensive income and recognised in profit or loss for the period.

(3) Financial assets at fair value through other comprehensive income (equity instruments)

Financial assets (equity instruments) at fair value through other comprehensive income, including investments in other equity instruments, are initially measured at fair value, with the related transaction costs included in the initial recognition amount. The financial assets are subsequently measured at fair value, with changes in fair value recognised in other comprehensive income. Dividends received are recognised in profit or loss.

On derecognition, the cumulative gain or loss previously included in other comprehensive

income is transferred from other comprehensive income to retained earnings.

(4) Financial assets at fair value through profit or loss

Financial assets at fair value through profit or loss include trading financial assets, derivative financial assets and other non-current financial assets, etc., which are initially measured at fair value, and the related transaction costs are recognised in profit or loss. The financial assets are subsequently measured at fair value, with changes in fair value recognised in profit or loss for the current period.

(5) Financial liabilities at fair value through profit or loss

Financial liabilities at fair value through profit or loss include financial liabilities held for trading and derivative financial liabilities, etc., which are initially measured at fair value, and the related transaction costs are recognised in profit or loss. The financial liabilities are subsequently measured at fair value, with changes in fair value recognised in profit or loss.

On derecognition, the difference between its carrying amount and the consideration paid is recognised in profit or loss.

(6) Financial liabilities measured at amortised cost

Financial liabilities measured at amortised cost, including short-term loans, notes payable, accounts payable, other payables, long-term loans, bonds payable and long-term payables, are initially measured at fair value, with related transaction costs included in the initial recognition amount.

Interest calculated using the effective interest method during the holding period is recognised in profit or loss.

On derecognition, the difference between the consideration paid and the carrying amount of the financial liability is recognised in profit or loss.

3. Derecognition of financial assets and transfer of financial assets

The Company derecognises a financial asset when one of the following conditions is met:

- The contractual right to receive cash flows from a financial asset is terminated;
- The financial asset has been transferred and substantially all the risks and rewards of ownership of the financial asset have been transferred to the transferor;
- Financial assets have been transferred, although the Company has neither transferred nor retained substantially all the risks and rewards of ownership of the financial assets, but has not retained control over the financial assets.

When a transfer of a financial asset occurs, the financial asset is not derecognised if substantially all the risks and rewards of ownership of the financial asset are retained.

In determining whether a transfer of financial assets meets the above conditions for derecognition of financial assets, the principle of substance over form is applied. The Company distinguishes between a transfer of financial assets as a whole and a transfer of financial assets in part. The transfer of financial assets as a whole meets the conditions for derecognition.

If the conditions are met, the difference between the following two amounts is recognised in profit or loss for the period:

- (1) Carrying value of financial assets transferred;
- (2) The sum of the consideration received as a result of the transfer and the cumulative amount of changes in fair value that would have been recognised directly in owners' equity (in cases where the financial assets transferred are financial assets (debt instruments) at fair value through other comprehensive income).

If a partial transfer of a financial asset satisfies the conditions for derecognition, the carrying amount of the transferred financial asset as a whole is apportioned between the derecognised portion and the non-derecognised portion in accordance with their respective relative fair values, and the difference between the two amounts listed below is recognised in profit or loss for the current period:

- (1) The carrying value of the derecognition component;
- (2) Consideration for the derecognition portion, together with the amount corresponding to the derecognition portion of the cumulative changes in fair value that would have been recognised directly in equity (the financial assets involved in the transfer are financial assets at fair value through other comprehensive income) (debt instruments)).

If the transfer of a financial asset does not satisfy the conditions for derecognition, the financial asset continues to be recognised and the consideration received is recognised as a financial liability.

4. Derecognition of financial liabilities

A financial liability or a portion of a financial liability is derecognised when the present obligation of the financial liability has been discharged in whole or in part. If the Company enters into an agreement with a creditor to replace an existing financial liability by assuming a new financial liability and the contractual terms of the new financial liability are substantially different from those of the existing financial liability, the Company derecognises the existing financial liability and recognises the new financial liability at the same time.

A material modification of all or part of the contractual terms of an existing financial liability derecognises the existing financial liability or a portion of it and recognises the modified terms as a new financial liability.

When a financial liability is derecognised in whole or in part, the difference between the carrying amount of the financial liability derecognised and the consideration paid (including non-cash assets transferred or new financial liabilities assumed) is recognised in profit or loss.

If the Company repurchases a portion of a financial liability, the carrying amount of the financial liability as a whole is allocated between the continuing and derecognised portions based on their relative fair values at the date of repurchase. The difference between the carrying amount allocated to the derecognised portion and the consideration paid, including the non-cash assets transferred or new financial liabilities assumed, is recognised in profit or loss.

5. Methods of determining the fair value of financial assets and financial liabilities

The fair value of financial instruments for which an active market exists is determined using quoted prices in an active market. For financial instruments for which no active market exists, valuation techniques are used to determine fair value. At the time of valuation, the Company selects inputs that are consistent with the characteristics of the asset or liability that would be considered by a market participant in a transaction for the underlying asset or liability, using valuation techniques that are appropriate in the circumstances and are supported by sufficient available data and other information, and gives preference to the use of relevant observable inputs. Unobservable inputs are used only if the relevant observable inputs are not available or practicable to obtain.

6. Test methods and accounting treatment for impairment of financial assets

The Company estimates expected credit losses on financial assets measured at amortised cost and financial assets at fair value through other comprehensive income (debt instruments), either individually or in combination, taking into account all reasonable and supportable information, including forward-looking information. The measurement of expected credit losses depends on whether a significant increase in credit risk has occurred since the initial recognition of the financial assets.

If the credit risk of a financial instrument has increased significantly since initial recognition, the Company measures the allowance for losses at an amount equal to the expected credit losses over the entire life of the financial instrument; if the credit risk of a financial instrument has not increased significantly since initial recognition, the Company measures the allowance for losses at an amount equal to the expected credit losses over the next 12 months. The resulting increase or reversal of the allowance for losses is recognised as an impairment loss or gain in profit or loss.

Generally, the Company considers that the credit risk of a financial instrument has increased significantly when it is past due for more than 30 days, unless there is conclusive evidence that the credit risk of the financial instrument has not increased significantly since the initial recognition.

If the credit risk of a financial instrument is low at the balance sheet date, the Company

considers that the credit risk of the financial instrument has not increased significantly since initial recognition.

If there is objective evidence that a financial asset is impaired for credit purposes, the Company makes a provision for impairment of the financial asset on an individual basis.

The methodology for determining credit losses for each class of financial assets is set out below:

(1) For notes receivable, accounts receivable financing and accounts receivable arising from daily operations, such as sales of goods and provision of services, the Company measures the allowance for losses at an amount equal to the expected credit losses over the entire period of existence, regardless of whether there is a significant financing component. In addition to assessing credit risk individually, they are classified into different portfolios based on their credit risk characteristics:

sports event	Basis for determining the portfolio
banker's acceptance	Acceptors are banks with low credit risk
commercial promissory note	Classification according to the credit risk of the acceptor
Accounts receivable portfolio	Sales of units within the scope of consolidation
Accounts receivable portfolio	Sales to other customers

(2) Other receivables

The Company measures impairment losses based on whether there has been a significant increase in the credit risk of other receivables since the initial recognition of the receivables, using an amount equal to the expected credit losses within the next 12 months, or over the entire duration of the receivables. Except for other receivables that are individually assessed for credit risk, they are classified into different portfolios based on their credit risk characteristics:

sports event	Basis for determining the portfolio
Other accounts receivable portfolio	Transactions with units within the scope of consolidation
Other accounts receivable portfolio	Receivables other than those in the above portfolio

15. inventory (of material)

☒Applicable ☐Not applicable

1. Classification and cost of inventories

Inventories are categorised as: raw materials, goods in stock, products in process, low value consumables, etc.

2. Method of valuation of inventories issued

Inventories are valued on a weighted average basis when issued.

3. Basis for determining the net realisable value of different categories of inventories

In the normal course of production and operation, the net realisable value of inventories of goods directly used for sale, such as finished goods, commodities in stock and materials for sale, is determined by the estimated selling price of the inventories, less the estimated selling expenses and related taxes; inventories of materials that need to be processed are determined by the estimated selling price of the finished goods produced in the normal course of production and operation, less the estimated expenses to be incurred until the completion of the work.

The net realizable value is determined as the amount after cost, estimated selling expenses and related taxes; the net realizable value of inventories held for the purpose of executing a sales contract or a labour contract is calculated on the basis of the contract price; if the quantity of inventories held is more than the quantity ordered under the sales contract, the net realizable value of the excess inventory is calculated on the basis of the general selling price. Provision for inventory write-downs is made at the end of the period on the basis of individual inventory items; however, provision for inventory write-downs is made on the basis of inventory categories for inventories with large quantities and low unit prices; and provision for inventory write-downs is made on a consolidated basis for inventories that are related to a product line that is manufactured and marketed in the same region, have the same or similar end-use or purpose, and are difficult to measure separately from other items.

4. The inventory system for inventories is based on the perpetual inventory system.

5. Methods of amortisation of low value consumables and packing materials

- (1) The 50/50 amortisation method is used for low value consumables;
- (2) Packaging is done using the one-time resale method.

16. Contractual assets

(1). Methods and criteria for recognition of contract assets

☒Applicable ☐Not applicable

The Company presents contract assets or contract liabilities in the balance sheet based on the relationship between the fulfilment of performance obligations and payments from customers. The right to receive consideration for goods or services that the Company has transferred to the customer (and which is dependent on factors other than the passage of time) is shown as a contract asset. Contract assets and contract liabilities under the same contract are presented on a net basis. The Company's owned, unconditional

(The right to receive consideration from customers (depending only on the passage of time) is shown separately as a receivable.

(2). Method of determining and accounting for expected credit losses on contract assets

☒Applicable ☐Not applicable

For details of the method of determining expected credit losses on contract assets and the accounting treatment, please refer to "V. 10.6, Test methods for impairment of financial assets and accounting treatment" in this note.

17. Assets held for sale

√Applicable Not applicable

The Company classifies non-current assets or disposal groups as held for sale if they simultaneously meet the following conditions:

(1) In accordance with the practice for the sale of such assets or disposal groups in similar transactions, immediate sale is possible in the current situation;

(2) It is highly probable that a sale will occur, i.e., the Company has resolved on a plan of sale and obtained a firm commitment to purchase, and the sale is expected to be completed within one year. Where the relevant regulations require the approval of the Company's relevant authority or regulator before the sale can take place, such approval has been obtained.

If the carrying amount of a non-current asset (excluding financial assets, deferred tax assets and assets arising from employee compensation) or a disposal group classified as held for sale is greater than its fair value less costs to sell, the carrying amount is written down to its fair value less costs to sell, and the amount of the write-down is recognised as an impairment loss on the asset, which is recognised in profit or loss, and a provision for impairment of the asset held for sale is made at the same time.

18. debenture investment

(1). Method of determining and accounting for expected credit losses on debt investments

☐Applicable ☒Not Applicable

19. Other debt investments

(1). Method of determining and accounting for expected credit losses on other debt investments

☐Applicable ☒Not Applicable

20. Long-term receivables

(1). Method of determining and accounting for expected credit losses on long-term receivables

☐Applicable ☒Not Applicable

21. Long-term equity investments

☒Applicable ☐Not applicable

1. Criteria for determining joint control and significant influence

Joint control is control that is shared over an arrangement in accordance with the relevant agreement, and the relevant activities of the arrangement must be agreed upon by the participants sharing control before decisions can be made. Where the Company, together with other joint venturers, exercises joint control over an investee and has rights to the net assets of the investee, the investee is a joint venture of the Company.

Significant influence means having the power to participate in decision-making with respect to the financial and operating decisions of an enterprise, but not being able to control, or jointly control with other parties, the formulation of those policies. Where the Company is able to exercise significant influence over an investee, the investee is an associate of the Company.

2. Determination of initial investment cost

(1) Long-term equity investments resulting from business combinations

Business combinations under the same control: If the company pays cash, transfers non-cash assets or assumes liabilities and issues equity securities as consideration for the combination, the initial investment cost of a long-term equity investment is determined at the date of the combination on the basis of the company's share of the book value of the equity in the net assets of the party to be combined in the consolidated financial statements of the party that will ultimately control the company. If the investee unit under the same control can be controlled due to additional investment or other reasons, the initial investment cost of the long-term equity investment is determined at the date of consolidation based on the share of the book value of the net assets of the consolidated party in the consolidated financial statements of the party ultimately controlling the consolidated party after the consolidation. The difference between the initial investment cost of the long-term equity investment at the date of consolidation and the sum of the book value of the long-term equity investment before reaching consolidation plus the book

value of the new consideration paid for the further acquisition of shares at the date of consolidation is adjusted for equity premium, and if equity premium is not sufficient to be eliminated, it is eliminated against retained earnings.

Business combinations not under common control: The Company uses the cost of the combination determined at the date of purchase as the initial investment cost of a long-term equity investment. If the Company is able to exercise control over an investee that is not under the same control due to additional investment, the initial investment cost is the sum of the book value of the original equity investment plus the cost of the additional investment, which is accounted for under the cost method.

(2) Long-term equity investments acquired otherwise

Long-term equity investments acquired with cash payments are recognised at initial investment cost based on the actual purchase price paid.

Long-term equity investments acquired through the issuance of equity securities are initially recognised at the fair value of the equity securities issued.

Under the premise that non-monetary asset exchanges have commercial substance and the fair value of the exchanged assets or the exchanged assets can be measured reliably, the initial investment cost of long-term equity investments received in non-monetary asset exchanges shall be determined by the fair value of the exchanged assets and the relevant taxes and fees payable, unless there is conclusive evidence that the fair value of the exchanged assets is more reliable; non-monetary asset exchanges that do not satisfy the above premise shall be determined by the book value of the exchanged assets and the relevant taxes and fees payable as the initial investment cost of the exchanged long-term equity investments. For non-monetary asset exchanges that do not meet the above prerequisites, the carrying value of the exchanged assets and related taxes payable are used as the initial investment cost of the long-term equity investment exchanged.

The initial investment cost of long-term equity investments acquired through debt restructuring is determined on the basis of fair value.

3. Subsequent measurement and profit or loss recognition methods

(1) Long-term equity investments accounted for under the cost method

The Company's long-term equity investments in subsidiaries are accounted for using the cost method unless the investment qualifies as held for sale. Except for cash dividends or profits declared but not yet paid, which are included in the price or consideration actually paid when the investment is acquired, the Company recognises current investment income based on its entitlement to cash dividends or profits declared by the investee.

(2) Long-term equity investments accounted for under the equity method

Long-term equity investments in associates and joint ventures are accounted for using the equity method. The difference between the initial investment cost and the share of the fair value of the identifiable net assets of the investee at the time of investment is not adjusted to the initial investment cost of the long-term equity investment; the difference between the initial investment cost and the share of the fair value of the identifiable net assets of the investee at the time of investment is recognised in profit or loss for the current period, and at the same time, the cost of the long-term equity investment is adjusted.

The Company recognises investment income and other comprehensive income in accordance with its share of net profit or loss and other comprehensive income of the investee, respectively, and adjusts the carrying value of the long-term equity investment; the carrying value of the long-term equity investment is reduced accordingly by the portion of profit or cash dividends declared by the investee; and other changes in the equity of the investee other than net profit or loss, other comprehensive income and profit distribution ("other changes in equity") are adjusted and included in owners' equity. For other changes in equity of the investee other than net profit or loss, other comprehensive income and profit distribution ("other changes in equity"), the carrying value of the long-term equity investment shall be adjusted and credited to equity.

In recognising the share of net profit or loss, other comprehensive income and other

changes in owners' equity of an investee, the fair value of the identifiable net assets of the investee at the time of acquisition of the investment is used as the basis for recognising the share of net profit or loss, other comprehensive income and other changes in owners' equity of the investee, after adjustments are made to the net profit or loss of the investee and other changes in owners' equity of the investee, in accordance with the Company's accounting policies and the accounting periods in which such adjustments are made.

Unrealised internal transaction gains or losses incurred between the Company and its associates or joint ventures are eliminated to the extent that they are attributable to the Company in proportion to its entitlement, and investment income is recognised on this basis, unless the assets invested or sold constitute a business. Unrealised losses on internal transactions with investees are recognised in full if they are attributable to impairment losses on assets.

The company's share of net losses incurred by a joint venture or associate, other than its obligation to assume additional losses, is limited to the extent that the carrying amount of the long-term equity investment and other long-term interests that in substance constitute a net investment in the joint venture or associate are written down to zero. If the joint venture or associate subsequently achieves net profit, the company resumes recognition of the gain-sharing amount after the gain-sharing amount compensates for the unrecognised loss-sharing amount.

(3) Disposal of long-term equity investments

On disposal of long-term equity investments, the difference between the carrying amount and the actual acquisition price is recognised in profit or loss for the period.

If a long-term equity investment accounted for under the equity method is partially disposed of and the remaining equity interest is still accounted for under the equity method, other comprehensive income recognised under the original equity method is carried forward on a proportionate basis using the same basis as that used for the direct disposal of the relevant assets or liabilities by the investee, and other changes in equity are carried forward on a proportionate basis to the current period's profit or loss.

If the common control or significant influence over the investee is lost due to the disposal of an equity investment, other comprehensive income recognised in respect of the original equity investment as a result of the adoption of the equity method of accounting is adopted in the termination of the adoption of the equity method of accounting in the same way as the direct disposal of the relevant assets by the investee.

or liabilities are accounted for on the same basis, and all other changes in equity are transferred to profit or loss when the equity method of accounting is discontinued.

If control over an investee is lost due to the disposal of a portion of the equity investment, the remaining equity interest shall be accounted for under the equity method if it is capable of exercising joint control or significant influence over the investee at the time of preparation of the individual financial statements and the remaining equity interest shall be adjusted as if it were accounted for under the equity method from the time of its acquisition; other comprehensive income recognised prior to the acquisition of control over the investee shall be carried forward on a pro rata basis on the same basis as that of the direct For other comprehensive income recognised prior to the acquisition of control of the investee unit, the same basis as the direct disposal of the relevant assets or liabilities of the investee unit is used for the proportionate carry forward, and other changes in equity recognised as a result of the adoption of the equity method of accounting are proportionately carried forward to the profit or loss of the current period; if the remaining equity interest does not enable the Company to exercise joint control or significant influence over the investee unit, the remaining equity interest is recognised as a financial asset, with the difference between the fair value and the carrying value on the date of the loss of control being recognised in the current period's profit or loss; for other comprehensive income recognised and other changes in equity recognised before the acquisition of control of the investee unit For other comprehensive income and other changes in equity recognised prior to the acquisition of control over the investee, all of them are carried forward.

If the disposal of equity investments in subsidiaries through multiple transactions until the loss of control is a package transaction, each transaction is accounted for as a disposal of equity investments in subsidiaries and the loss of control; the difference between the disposal price and the carrying value of long-term equity investments corresponding to the equity interests disposed of in each disposal prior to the loss of control is recognised in the individual financial statements as other comprehensive income and transferred to profit or loss for the period of the loss of control when the loss of control occurs. The difference between the disposal price and the carrying value of the long-term equity investment before the loss of control is recognised as other comprehensive income in the individual financial statements and transferred to profit or loss for the period in which the control is lost. If the transaction is not a package deal, each transaction is accounted for separately.

**22. Not
applicable to
investment
properties**

**23. Fixed
Assets (1).**

Conditions for recognition

✓Applicable ☐Not applicable

Fixed assets are tangible assets that are held for use in the production of goods, the provision of services, rental or management and have a useful life of more than one fiscal year. Fixed assets are recognised when the following conditions are simultaneously met:

- (1) It is probable that the economic benefits associated with the fixed asset will flow to the enterprise;
- (2) The cost of the fixed asset can be measured reliably.

(2). Depreciation method

✓Applicable ☐Not applicable

form	Depreciation method	Depreciable life (years)	salvage rate	Annual depreciation rate
Houses and buildings	life-cycle averaging (LCA)	25-40	5	2.38-3.80
machinery and equipment	life-cycle averaging (LCA)	5-30	5	3.17-19.00
Transport equipment	life-cycle averaging (LCA)	5-10	5	9.50-19.00
electronic equipment	life-cycle averaging (LCA)	5-10	5	9.50-19.00

Depreciation of fixed assets is provided on a classified basis using the average annual depreciation method, with depreciation rates determined on the basis of the category of fixed assets, their estimated useful lives and estimated net salvage value. For fixed assets for which provision for impairment has been made, depreciation is determined in future periods on the basis of the carrying amount net of provision for impairment and on the basis of the remaining useful life. If each component of a fixed asset has a different useful life or provides economic benefits to the enterprise in different ways, different depreciation rates or methods are selected and depreciation is provided separately.

(3). Basis of recognition, valuation and depreciation of fixed assets under finance leases

☐Applicable ✓Not Applicable

24. construction in progress

✓Applicable ☐Not applicable

Construction-in-progress projects are recognised as fixed assets on the basis of the necessary expenditures incurred before the asset is constructed and brought to its intended state of use. If the fixed assets under construction have reached the intended state of use, but the final accounts have not yet been finalised, the fixed assets shall be transferred to the fixed assets at the estimated value according to the project budget, construction cost or actual cost of the project from the date of reaching the intended state of use, and depreciation of fixed assets shall be provided in accordance with the Company's depreciation policy for fixed assets, and the provisional value shall be adjusted according to the actual cost after the final accounts have been finalised, but the amount of depreciation originally provided for shall not be adjusted. Adjustment of the depreciation originally provided for.

25. borrowing cost

✓Applicable ☐Not applicable

1. Principles for recognition of capitalisation of borrowing costs

Borrowing costs incurred by the Company that are directly attributable to the acquisition, construction or production of assets eligible for capitalisation are capitalised and included in the cost of the relevant assets; other borrowing costs are recognised as an expense when incurred, based on the amount incurred, and are included in profit or loss for the current period.

Assets eligible for capitalisation are fixed assets, investment properties and inventories that require a significant period of time to complete before they reach their intended use or saleable condition, such as construction or production activities.

2. Period in which borrowing costs are capitalised

Capitalisation period means the period from the point at which capitalisation of borrowing costs commences to the point at which capitalisation ceases, excluding the period during which capitalisation of borrowing costs is suspended.

Capitalisation of borrowing costs begins when the following conditions are simultaneously met:

- (1) Expenditure on assets has been incurred and expenditure on assets includes expenditure incurred in the form of cash payments, transfer of non-cash assets or assumption of interest-bearing liabilities for the purpose of acquiring or producing assets that qualify for capitalisation;
- (2) Borrowing costs have been incurred;
- (3) Acquisition or production activities necessary to bring the asset to its intended use or marketable condition have begun.

Capitalisation of borrowing costs ceases when the acquisition or production of assets eligible for capitalisation reaches their intended use or saleable condition.

3. Period of suspension of capitalisation

Capitalisation of borrowing costs is suspended when there is an abnormal interruption in the acquisition or production of assets eligible for capitalisation for more than three consecutive months; borrowing costs continue to be capitalised if the interruption is necessary for the acquisition or production of assets eligible for capitalisation to reach their intended useable or saleable condition. Borrowing costs incurred during the interruption period are recognised in profit or loss for the current period until the construction or production of the asset recommences and the borrowing costs continue to be capitalised.

4. Calculation of the capitalisation rate and amount of capitalisation of borrowing costs

For specialised borrowings for the purpose of purchasing, constructing or producing assets eligible for capitalisation, the amount of borrowing costs capitalised is determined by the actual borrowing costs incurred during the period of the specialised borrowings, less the amount of interest income earned on the unused borrowed funds deposited in the bank or the amount of investment income earned on the temporary investment.

For general borrowings taken up for the acquisition or production of assets eligible for capitalisation, the amount of borrowing costs to be capitalised for general borrowings is calculated on the basis of the weighted average number of asset expenditures in excess of the portion of cumulative asset expenditures in excess of the specialised borrowings multiplied by the capitalisation rate of the general borrowings taken up. The capitalisation rate is determined on the basis of the weighted average effective interest rate on general borrowings.

Exchange differences arising from the principal of and interest on foreign-currency specialised borrowings are capitalised in the period in which they are capitalised and included in the cost of the assets eligible for capitalisation. Exchange differences arising from the principal and interest on foreign-currency borrowings other than specialised foreign-currency borrowings are included in profit or loss for the period.

26. biological asset

☐Applicable ☒Not applicable

27. oil and gas assets

☐Applicable ☒Not applicable

28. usufructuary assets

☒Applicable ☐Not applicable

On the commencement date of the lease term, the Company recognises right-of-use assets for leases other than short-term leases and leases of low-value assets. Right-of-use assets are initially measured at cost. This cost includes:

- (i) The amount of the initial measurement of the lease liability;
- ② Amount of lease payments made on or before the commencement date of the lease term for which a lease incentive exists, net of the amount related to the lease incentive that has been taken;
- (iii) Initial direct costs incurred by the Company;
- ④ Costs that the Company expects to incur to dismantle and remove the leased assets, to restore the site where the leased assets are located, or to return the leased assets to the condition agreed upon in the terms of the leases, excluding costs that are attributable to the production of inventories.

The Company subsequently depreciates right-of-use assets on a straight-line basis. Depreciation is provided over the remaining useful life of the leased asset if ownership of the leased asset can be reasonably determined at the end of the lease term; otherwise, the leased asset is depreciated over the shorter of the lease term or the remaining useful life of the leased asset.

The Company determines whether right-of-use assets are impaired in accordance with the principles described in "V.30. Impairment of Long-Lived Assets" in this note and accounts for identified impairment losses.

29. intangible asset

(1). Valuation method, useful life, impairment testing

☒Applicable ☐Not applicable

(i) Method of valuation of intangible assets

(1) Intangible assets are initially measured at cost when acquired by the Company;

The cost of an acquired intangible asset consists of the purchase price, related taxes and other expenses directly attributable to bringing the asset to its intended use. If the purchase price of an intangible asset is deferred beyond normal credit terms and is essentially of a financing nature, the cost of the intangible asset is determined on the basis of the present value of the purchase price. When a debt restructuring involves the acquisition of an intangible asset used by the debtor to offset a debt, the fair value of the intangible asset is used as the basis for determining its carrying value, and the difference between the carrying value of the restructured debt and the fair value of the intangible asset used to offset the debt is recognised in profit or loss for the current period.

Under the premise that non-monetary asset exchanges have commercial substance and the fair value of the exchanged assets or the exchanged assets can be measured reliably, the intangible assets exchanged in non-monetary asset exchanges are recorded at the fair value of the exchanged assets unless there is conclusive **e v i d e n c e** that the fair value of the exchanged assets is more reliable; for non-monetary asset exchanges that do not satisfy the above premise, the carrying value of the exchanged assets and related taxes and fees shall be recognised as the cost of the exchanged assets. For non-monetary asset exchanges that do not meet the above criteria, the carrying value of the exchanged assets and the related taxes payable are recognised as the cost of the intangible assets exchanged, and no gain or loss is recognised.

(2) Follow-up measurement

Intangible assets are analysed at the time of acquisition to determine their useful lives.

Intangible assets with finite useful lives are amortised on a straight-line basis over the period of time over which they will bring economic benefits to the enterprise; if the period over which the intangible asset will bring economic benefits to the enterprise cannot be foreseen, it is considered to be an intangible asset with an indefinite useful life and is not amortised.

(ii) Estimated useful lives of intangible assets with finite useful lives

spor ts eve nt	Expected service life
land use right	Warrant marking period
patented technology	benefit period
trademark right	benefit period
hardware	benefit period
Non-patented technology	benefit period

The useful lives and amortisation methods of intangible assets with finite useful lives are reviewed at the end of each year. As a result of the review, the useful lives and amortisation methods of intangible assets at the end of the current year are not different from those previously estimated.

(iii) Basis of judgement for intangible assets with indefinite useful lives and procedures for reviewing their useful lives

Intangible assets with indefinite useful lives are considered to be intangible assets with indefinite useful lives if the Company is unable to foresee the period over which the intangible asset will bring economic benefits to the enterprise. As of the balance sheet date, the Company has no intangible assets with indefinite useful lives.

(2). Accounting policy for internal research and development expenditure

✓Applicable □Not applicable

(i) Specific criteria for classifying research and development phases

Expenditure on in-house research and development projects is categorised into research phase expenditure and development phase expenditure.

Research stage: The stage of original and planned investigation and research activities to acquire and understand new scientific or technological knowledge, etc.

Development phase: The phase of activity in which research results or other knowledge are applied to a programme or design to produce new or substantially improved materials, devices, products, etc., prior to commercial production or use.

(ii) Specific conditions for capitalisation of development phase expenditure

Expenditure in the development phase of an internal research and development project is recognised as an intangible asset when the following conditions are simultaneously met:

- (1) It is technically feasible to complete the intangible asset so that it can be used or sold;
 - (2) There is an intention to complete the intangible asset and use or sell it;
 - (3) The manner in which an intangible asset generates economic benefits, including the ability to demonstrate the existence of a market for the product produced using the intangible asset or the existence of a market for the intangible asset itself, and the ability to demonstrate the usefulness of the intangible asset if it is to be used internally;
 - (4) have sufficient technical, financial and other resource support to complete the development of the intangible asset and the ability to use or sell the intangible asset;
 - (5) Expenditure attributable to the development phase of the intangible asset can be measured reliably.
- Expenditure in the development phase that does not fulfil the conditions listed above is charged to profit or loss when incurred. Research expenditures are charged to profit or loss when incurred.

30. Impairment of long-lived assets

✓/Applicable Not applicable

Long-term equity investments, investment properties measured using the cost model, property, plant and equipment, construction in progress, right-of-use assets, intangible assets with finite useful lives, oil and gas assets and other long-lived assets are assessed for impairment if there is any indication that they are impaired at the balance sheet date.

Impairment test. If the results of an impairment test indicate that the recoverable amount of an asset is less than its carrying amount, a provision for impairment is made and an impairment loss is recognised for the difference. The recoverable amount is the higher of the asset's fair value less costs of disposal and the present value of the asset's estimated future cash flows. Provision for asset impairment is calculated and recognised on an individual asset basis. If it is difficult to estimate the recoverable amount of an individual asset, the recoverable amount of the asset group is determined using the asset group to which the asset belongs. An asset group is the smallest group of assets that can generate cash inflows independently.

Goodwill arising from business combinations, intangible assets with an indefinite useful life, and intangible assets that have not yet reached a useable condition are tested for impairment at least annually at the end of each year, irrespective of whether or not there is any indication of impairment.

The Company performs a goodwill impairment test in which the carrying value of goodwill arising from a business combination is allocated to the relevant asset group in a reasonable manner from the date of purchase; if it is difficult to allocate the goodwill to the relevant asset group, the goodwill is allocated to the relevant combination of asset groups. The relevant asset group or combination of asset groups is the asset group or combination of asset groups that can benefit from the synergies of the business combination.

During the impairment test of the relevant asset group or combination of asset groups containing goodwill, if there is an indication of impairment for the asset group or combination of asset groups related to goodwill, the asset group or combination of asset groups that does not contain goodwill is first tested for impairment, the recoverable amount is calculated and compared with the relevant carrying amount, and the corresponding impairment loss is recognised. The impairment test is then performed on the asset group or combination of asset groups containing goodwill by comparing the carrying value with the recoverable amount. If the recoverable amount is lower than the carrying value, the amount of the impairment loss is first set off against the carrying value of goodwill apportioned to the asset group or combination of asset groups, and then set off against the carrying value of the other assets in the asset group or combination of asset groups in accordance with the weighting of the carrying value of the other assets in the asset group or combination of assets other than goodwill, and then set off against the carrying value of the other assets on a pro rata basis. The carrying value of other assets is proportionally offset according to the proportion of the carrying value of each asset other than goodwill in the asset group or portfolio. Once recognised, the above impairment losses will not be reversed in subsequent accounting periods.

31. Long-term amortised expenses

✓Applicable Not applicable

Long-term amortised expenses are expenses that have been incurred but are to be borne by the current and future periods and are spread over a period of more than one year.

32. Contractual liabilities

(1). Method of recognition of contract liabilities

☒Applicable ☐Not applicable

The Company presents contract assets or contract liabilities in the balance sheet based on the relationship between the fulfilment of performance obligations and payments from customers. The Company's obligation to transfer goods or provide services to customers for consideration received or receivable from customers is presented as a contract liability. Contract assets and contract liabilities under the same contract are presented on a net basis.

33. remuneration of employees

(1). Accounting treatment of short-term remuneration

☒Applicable ☐Not applicable

The Company recognises short-term compensation actually incurred as a liability in the accounting period in which the employee provides services to the Company and recognises it in profit or loss or in the cost of the related asset.

The Company contributes social insurance premiums and housing fund for employees, as well as the trade union fund and employee education fund in accordance with the regulations, and calculates and determines the corresponding amount of employee remuneration in accordance with the prescribed accrual basis and accrual rate during the accounting period in which the employees render services to the Company.

Employee benefit expenses incurred by the Company are recognised in profit or loss or in the cost of the related assets on the basis of the actual amount incurred when they are incurred, of which non-monetary benefits are measured at fair value.

(2). Accounting treatment of post-employment benefits

√Applicable Not applicable

(1) Setting up a withdrawal plan

The Company pays basic pension insurance and unemployment insurance for its employees in accordance with relevant local government regulations. During the accounting period in which the employees provide services to the Company, the amount payable is calculated on the basis of the locally stipulated contribution base and ratio, and is recognised as a liability and charged to profit or loss or the cost of the relevant asset.

In addition to basic pension insurance, the Company has established an enterprise pension contribution system in accordance with the relevant policies of the national enterprise pension system (Supplementary pension insurance)/Enterprise pension plan. The Company contributes a certain percentage of the employees' gross salaries to the local social insurance institutions/annuity plans, and the corresponding expenditures are charged to current profit or loss or the cost of related assets.

(2) Setting up a benefit plan

The Company attributes the benefit obligations arising from the defined benefit plans to the period in which the employees render services based on a formula determined by the projected accumulated benefit unit method and is included in profit or loss or in the cost of the related assets for the current period.

The deficit or surplus resulting from the present value of the defined benefit plan obligation less the fair value of the defined benefit plan assets is recognised as a net defined benefit plan liability or net asset. If the defined benefit plan has a surplus, the Company measures the net defined benefit plan asset at the lower of the surplus of the defined benefit plan or the asset ceiling. All defined benefit plan obligations, including those that are expected to be paid within twelve months after the end of the annual reporting period in which the employees render services, are discounted based on market yields at the balance sheet date on treasury bonds or high-quality corporate bonds in active markets that match the maturity and currency of the defined benefit plan obligations.

The service costs incurred for the defined benefit plan and the net interest on the net liability or net asset of the defined benefit plan are recognised in profit or loss or in the cost of the related assets; the changes arising from the remeasurement of the net liability or net asset of the defined benefit plan are recognised in other comprehensive income and are not reversed to profit or loss in the subsequent accounting periods, and the portion previously recognised in other comprehensive income is fully transferred to unappropriated earnings within equity on the termination of the original defined benefit plan. (c) Unappropriated earnings. Upon settlement of a defined benefit plan, a settlement gain or loss is recognised based on the difference between the present value of the defined benefit plan obligation and the settlement price determined at the settlement date.

(3). Accounting for termination benefits

☒Applicable ☐Not applicable

The Company recognises employee compensation liabilities arising from termination benefits in profit or loss when it is unable to unilaterally withdraw the termination benefits provided as a result of a plan to terminate employment or a proposal for redundancy or when it recognises the earlier of the costs or expenses related to a restructuring that involves the payment of termination benefits.

(4). Accounting treatment of other long-term employee benefits

☐Applicable ☒Not Applicable

34. leasehold liability

☒Applicable ☐Not applicable

For details, see "42. Leases (3). Methods of Determining Leases and Accounting for Leases under the New Leasing Standards".

35. projected liability

☒Applicable ☐Not applicable

(i) Criteria for recognition of projected liabilities

The Company recognises estimated liabilities when obligations related to contingencies such as lawsuits, debt guarantees, loss contracts and restructuring matters simultaneously meet the following conditions:

- (1) The obligation is a present obligation assumed by the Company;
- (2) It is probable that the fulfilment of this obligation will result in an outflow of economic benefits to the Company;
- (3) The amount of the obligation can be measured reliably.

(ii) Measurement of various types of projected liabilities

The Company's projected liabilities are measured initially on the basis of the best estimate of the expenditure required to fulfil the related present obligation. In determining the best estimate, the Company considers a combination of factors such as the risks and uncertainties associated with the contingency and the time value of money. Where the effect of the time value of money is material, the best estimate is determined by discounting the related future cash outflows.

The best estimates are dealt with separately below:

Where there is a continuous range (or interval) of expenditure requirements and the likelihood of each outcome within that range is equal, the best estimate is determined by averaging the middle of the range, i.e., the upper and lower limits.

Where there is no continuous range (or interval) of expenditure requirements, or where there is a continuous range but the likelihood of the various outcomes within the range is not the same, the best estimate is determined on the basis of the most probable amount to be incurred if the contingency relates to a single item, or on the basis of a range of possible outcomes and associated probabilities if the contingency relates to a number of items.

Where the Company expects to be reimbursed, in whole or in part, by a third party for the expenditures required to settle a projected liability, the amount of the reimbursement is recognised separately as an asset when it is virtually certain that the reimbursement will be received, and the amount of reimbursement recognised does not exceed the carrying amount of the projected liability.

36. share-based payment

✓Applicable Not applicable

The Company's share-based payments are transactions in which equity instruments are granted or liabilities determined on the basis of equity instruments are assumed in order to obtain services from employees or other parties. The Company's share-based payments are classified as equity-settled and **c a s h - s e t t l e d**.

(i) Equity-settled share-based payments and equity instruments

Equity-settled share-based payments in exchange for services rendered by employees are measured at the fair value of the equity instruments granted to the employees. Where the Company makes share-based payments in restricted shares, employees contribute to the subscription of shares, which may not be listed, circulated or transferred until the unlocking conditions have been fulfilled and unlocked; if the unlocking conditions set out in the final share incentive plan are not fulfilled, the Company repurchases the shares at a pre-agreed price. When

the Company obtains payment from employees for subscription of restricted shares, it recognises share capital and share premium in accordance with the subscription amount obtained, and at the same time recognises a liability for the full amount of the repurchase obligation and recognises treasury shares. At each balance sheet date during the waiting period, the Company makes its best estimate of the number of feasible equity instruments based on the latest available subsequent information, and based on this estimate, the Company recognises the services acquired during the period in the relevant cost or expense at the fair value on the date of grant, and increases the capital surplus accordingly. No further adjustments are made to the related costs or expenses recognised and to total owners' equity after the date of exercisability. However, if the rights are exercisable immediately after the grant, the related costs or expenses are recognised at fair value on the date of grant, with a corresponding increase in equity premium.

No cost or expense is recognised for share-based payments that are not ultimately exercised, unless the conditions for exercise are market or non-viable conditions, in which case the right is deemed to be exercisable as long as the non-market conditions of all the conditions for exercisability are satisfied, irrespective of whether or not the market or non-viable conditions are satisfied.

If the terms of an equity-settled share-based payment are modified, acquired services are recognised at least as if the terms had not been modified. In addition, any modification that increases the fair value of the equity instrument granted, or a change in favour of the employee at the date of modification, is recognised as an increase in services acquired.

If equity-settled share-based payments are cancelled, they are treated as accelerated exercise on the date of cancellation, with the unrecognised amount recognised immediately. If the employee or other party is able to elect to satisfy the non-viability condition but fails to do so within the waiting period, it is treated as a cancellation of equity-settled share-based payment. However, if a new equity instrument is granted and it is determined at the date of grant of the new equity instrument that the new equity instrument granted is intended to replace the cancelled equity instrument, the replacement equity instrument granted is treated in the same manner as if the modification of the terms and conditions of the original equity instrument had been treated.

(ii) Cash-settled share-based payments and equity instruments

Cash-settled share-based payments are measured at the fair value of liabilities assumed by the Company that are determined by calculations based on shares or other equity instruments. If the option is exercisable immediately after grant, the fair value of the liability assumed is recognised as a cost or expense at the date of grant, with a corresponding increase in the liability; if the option is exercisable only upon completion of services within the waiting period or upon fulfilment of the specified performance conditions, the best estimate of the feasibility of the option is used during the waiting period as the basis for recognising the services acquired in the current period as the relevant cost or expense, with a corresponding increase in the liability, based on the fair value of the liability assumed. The fair value of the liability is remeasured at each balance sheet date prior to settlement of the related liability and at the date of settlement, with changes recognised in profit or loss for the period.

37. Preference shares, perpetual bonds and other financial instruments

☐Applicable ☒Not applicable

38. incomes

(1). Accounting policies used for revenue recognition and measurement

☒Applicable ☐Not applicable

The Company recognises revenue when it has fulfilled its performance obligations under a contract, i.e. when the customer obtains control of the related goods or services. Acquiring control of the underlying good or service means being able to dominate the use of the good or service and derive substantially all of the economic benefits therefrom.

Where a contract contains two or more performance obligations, the Company apportions the transaction price to each individual performance obligation at the inception date of the contract based on the relative proportion of the individual selling price of the goods or services promised under each individual performance obligation. The Company measures revenue based on the transaction price allocated to each individual performance obligation.

The transaction price is the amount of consideration to which the Company expects to be entitled as a result of the transfer of goods or services to the customer, excluding amounts collected on behalf of third parties and amounts expected to be refunded to the customer. The Company determines the transaction price in accordance with the terms of the contract and in conjunction with its past customary practices. In determining the transaction price, the Company

takes into account the impact of variable consideration, the existence of significant financing components in the contract, non-cash consideration, and consideration payable to the customer. The Company determines the transaction price that includes variable consideration at an amount that does not exceed the amount by which it is highly probable that the cumulative revenue recognised will not materially reverse when the related uncertainty is removed. Where there is a significant financing element in a contract, the Company determines the transaction price based on the amount payable in cash that is assumed to be paid by the customer at the time the customer obtains control of the goods or services, and amortises the difference between that transaction price and the contractual consideration over the term of the contract using the effective interest method.

If one of the following conditions is met, the performance obligation is fulfilled within a certain period of time; otherwise, the performance obligation is fulfilled at a certain point in time:

- The customer acquires and consumes the economic benefits of the Company's performance at the same time as the Company's performance.
- The customer is able to control the goods under construction in the course of the Company's performance.
- Commodities produced in the course of the Company's performance are irreplaceable

and the Company is entitled to receive payment for the portion of performance that has been completed to date, cumulatively, throughout the term of the contract.

For performance obligations that are to be fulfilled within a certain period of time, the Company recognises revenue in accordance with the progress of performance over that period of time, unless the progress of performance is not reasonably determinable. The Company determines the progress of performance using either the output method or the input method, taking into account the nature of the goods or services. When the progress of performance is not reasonably determinable, the Company recognises revenue based on the amount of costs incurred until the progress of performance is reasonably determinable, provided that the costs incurred are expected to be reimbursed.

For performance obligations that are satisfied at a point in time, the Company recognises revenue at the point at which the customer obtains control of the related goods or services. In determining whether a customer has obtained control of goods or services, the Company considers the following indications:

- The Company has a present right to receive payment for such goods or services, i.e. the customer has a present obligation to pay for such goods or services.
- The Company has transferred legal ownership of the goods to the Customer, i.e. the Customer has legal ownership of the goods.
- The Company has physically transferred the goods to the customer, i.e. the customer has taken physical possession of the goods.
- The Company has transferred the principal risks and rewards of ownership of the commodity to the customer, i.e. the customer has acquired the principal risks and rewards of ownership of the commodity.
- The customer has accepted the goods or services, etc.

2. Specific revenue recognition policies

- (1) Domestic sales: according to the customer's order products have been sent out, the customer acceptance;
- (2) Export: Arrival of goods at the port and completion of customs formalities.

(2). Differences in accounting policies for revenue recognition due to the use of different operating models for the same type of business

☐Applicable ☒Not Applicable

39. contract cost

☒Applicable ☐Not applicable

Contract costs include contract performance costs and contract acquisition costs.

Costs incurred by the Company for the performance of a contract that do not fall within the scope of regulation of relevant standards such as inventories, property, plant and equipment or intangible assets are recognised as an asset as contract performance costs when the following conditions are met:

- The cost is directly related to a current or anticipated contract.
- This cost increases the resources available to the Company to meet its performance obligations in the future.
- The cost is expected to be recovered.

Incremental costs incurred by the Company to acquire a contract that are expected to be recovered are recognised as an asset as contract acquisition costs. Assets related to contract costs are amortised using the same basis as revenue recognition for goods or services to which the asset relates; however, the

If the amortisation period of contract acquisition costs does not exceed one year, the Company recognises the costs in profit or loss when incurred.

If the carrying amount of an asset related to the cost of a contract is greater than the difference between the following two items, the Company makes a provision for impairment of the excess and recognises an asset impairment loss:

1. The residual consideration expected to be obtained as a result of the transfer of goods or services related to the asset;
2. The estimated costs to be incurred for the transfer of the relevant goods or services.

If there is a subsequent change in the factors that impaired the asset in a previous period that causes the aforementioned difference to be greater than the carrying amount of the asset, the Company reverses the provision for impairment and recognises it in profit or loss for the current period, provided that the carrying amount of the asset after the reversal does not exceed the carrying amount that would have been determined as at the date of the reversal assuming that no provision for impairment had been made.

40. government grant

✓Applicable

☐Not

Applicable

1. Type

Government grants, which are monetary or non-monetary assets acquired by the Company from the government at no cost, are classified as asset-related government grants and revenue-related government grants.

Asset-related government grants are government grants obtained by the Company for the purpose of acquiring, constructing or otherwise forming long-term assets. Government grants related to revenue are government grants other than those related to assets.

The Company's specific criteria for classifying government grants as asset-related are:

The Company classifies grants from relevant government departments as asset-related government grants when there is clear evidence that the grants are provided for the formation of long-term assets.

The Company's specific criteria for classifying government grants as revenue-related are government grants other than those related to assets.

The Company classifies government grants as revenue-related if the government documents do not specify the recipients of the grants. 2. Point of recognition

Government grants are recognised and measured at the actual amount on hand when the funds are actually received. Grants are recognised and measured at the amount receivable only if there is conclusive evidence that the grant is disbursed on the basis of a fixed fixed rate and if there is conclusive evidence that the relevant conditions of the financial support policy can be met and that the financial support is expected to be received.

3. Accounting treatment

Government grants related to assets are either offset against the carrying amount of the related assets or recognised as deferred income. If deferred revenue is recognised, it is charged to current profit or loss in a reasonable and systematic manner over the useful life of the related assets (if it is related to the Company's ordinary activities, it is included in other revenues; if it is not related to the Company's ordinary activities, it is included in non-operating income);

Government grants related to income that are used to compensate the Company for costs or losses incurred in future periods are recognised as deferred income and are credited or charged to profit or loss in the period in which the related costs or losses are recognised (to other income if they are related to the Company's ordinary activities; to non-operating income if they are not related to the Company's ordinary activities); those used to compensate the Company for costs or losses incurred are directly credited or charged to profit or loss in the period in which they are recognised; and those used to compensate the Company for costs or losses incurred are directly credited or charged to profit or loss in the period in which they are recognised. For the purpose of compensating the Company for the costs or losses incurred, the costs or losses are recognised directly in profit or loss for the current period (other income if they are related to the Company's daily activities; non-operating income if they are not related to the Company's daily activities) or offset against the relevant costs or losses.

41. Deferred income tax assets/deferred income tax liabilities

✓Applicable ☐Not applicable

Deferred tax assets are recognised for deductible temporary differences to the extent that it is probable that future taxable income will be available against which the deductible temporary differences can be utilised. For deductible losses and tax credits that can be carried forward to future years, a corresponding deferred tax asset is recognised to the extent that it is probable that future taxable income will be available against which the deductible losses and tax credits can be utilised.

Deferred tax liabilities are recognised for taxable temporary differences, except in special cases.

The special situations in which deferred tax assets or deferred tax liabilities are not recognised include: the initial recognition of goodwill; and transactions or events, other than business combinations, that affect neither the accounting profit nor taxable income (or deductible losses) at the time of occurrence.

When there is a legal right to settle on a net basis and there is an intention to settle on a net basis or to acquire assets and settle liabilities simultaneously, current income tax assets and current income tax liabilities are presented on a net basis after offsetting.

When there is a legal right to settle current income tax assets and current income tax liabilities on a net basis and the deferred income tax assets and deferred income tax liabilities relate to income taxes levied by the same tax administration on the same taxable entity or on different taxable entities, but in each future period in which significant deferred income tax assets and liabilities reverse, the taxable entities involved intend to settle the assets and liabilities on a net basis.

Deferred tax assets and deferred tax liabilities are offset when current income tax assets and liabilities are settled or when assets are acquired and liabilities are settled simultaneously.

42. tenancy

(1). Accounting for operating leases

√Applicable Not applicable

For details, see (3) Methods of determining and accounting for leases under the new leasing standards.

(2). Accounting for finance leases

√Applicable Not applicable

For details, see (3) Methods of determining and accounting for leases under the new leasing standards.

(3). Methods of determining leases under the new leasing standards and accounting treatment

√Applicable □Not applicable

A lease is a contract in which the lessor cedes the right to use an asset to the lessee for a specified period of time in return for consideration. At the inception date of a contract, the Company assesses whether the contract is a lease or contains a lease. A contract is a lease or contains a lease if one of the parties to the contract cedes the right to control the use of one or more identified assets for a specified period of time in exchange for consideration.

If a contract contains multiple individual leases, the Company splits the contract and accounts for each individual lease separately. If a contract contains both lease and non-lease components, the lessee and lessor split the lease and non-lease components.

For rent reductions, such as rent abatements and deferred payments, agreed upon in connection with existing leases that are directly triggered by the New Crown Pneumonia outbreak, the Company applies a simplified approach to all lease options and does not assess whether a lease change has occurred or reevaluate the classification of the lease if the following conditions are also met:

- The lease consideration after the concession is reduced or substantially unchanged from the pre-concession period, where the lease consideration is either undiscounted or discounted at the pre-concession discount rate;

- A combination of qualitative and quantitative factors determined that there were no material changes in the other terms and conditions of the lease. 1. The Company as lessee

(1) usufructuary assets

On the commencement date of the lease term, the Company recognises right-of-use assets for leases other than short-term leases and leases of low-value assets. Right-of-use assets are initially measured at cost. This cost includes:

The amount of the initial measurement of the lease liability;

Lease payments made on or before the commencement date of the lease term for which a

lease incentive exists, net of the amount relating to the lease incentive already taken;

Initial direct costs incurred by the Company;

Costs that the Company expects to incur to dismantle and remove a leased asset, to rehabilitate the site on which the leased asset is located, or to restore the leased asset to the condition agreed upon in the terms of the lease, excluding costs attributable to the production of inventory.

The Company subsequently depreciates right-of-use assets on a straight-line basis. Depreciation is provided over the remaining useful life of the leased asset if ownership of the leased asset can be reasonably determined at the end of the lease term; otherwise, the leased asset is depreciated over the shorter of the lease term or the remaining useful life of the leased asset.

The Company determines whether right-of-use assets are impaired in accordance with the principles described in "V.30. Impairment of Long-Lived Assets" in this note and accounts for identified impairment losses.

(2) leasehold liability

On the commencement date of the lease term, the Company recognises a lease liability for leases other than short-term leases and leases of low-value assets. Lease liabilities are initially measured at the present value of the outstanding lease payments. Lease payments include:

Fixed payments (including substantially fixed payments), net of lease incentive-related amounts where lease incentives exist; variable lease payments dependent on an index or ratio;

Payments expected to be made based on the residual value of the guarantee provided by the company;

The exercise price of a purchase option, provided that the company is reasonably certain that it will exercise the option;

Payments required to exercise the option to terminate the lease, provided the lease term reflects that the Company will exercise the option to terminate the lease.

The Company uses the interest rate embedded in the lease as the discount rate; however, if the interest rate embedded in the lease cannot be reasonably determined, the Company's incremental borrowing rate is used as the discount rate.

The Company calculates interest expense on lease liabilities at a fixed periodic rate for each period of the lease term and records it in profit or loss or in the cost of the related asset.

Variable lease payments that are not included in the measurement of the lease liability are charged to current profit or loss or to the cost of the related asset when they are actually incurred.

If any of the following circumstances occur after the commencement date of the lease term, the Company re-measures the lease liability and adjusts the corresponding right-of-use asset. If the carrying amount of the right-of-use asset has been reduced to zero but the lease liability still needs to be further reduced, the difference is recognised in profit or loss for the current period:

- When there is a change in the valuation of the purchase option, lease renewal option or termination option, or when the actual exercise of the foregoing options is inconsistent with the original valuation, the Company re-measures the lease liability based on the present value of the lease payments after the change and the revised discount rate;
- When there is a change in the substantive fixed payments, a change in the amount expected to be payable for the residual value of the guarantee, or a change in the index or rate used to determine the lease payments, the Company remeasures the lease liability based on the present value of the lease payments after the change and the original discount rate. However, if the change in the lease payments results from a change in the floating rate, the present value is calculated using the revised discount rate.

(3) Short-term leases and leases of low-value assets

The Company has elected not to recognise right-of-use assets and lease liabilities for short-

term leases and leases of low-value assets and to recognize the related lease payments in profit or loss or in the cost of the related assets on a straight-line basis over the lease term in each period. Short-term leases are leases with a term of 12 months or less at the inception date of the lease term and do not include an option to purchase. Low-value asset leases are leases that have a lower value when the individual leased asset is a brand-new asset. If the Company subleases or expects to sublease a leased asset, the original lease is not a low-value asset lease.

(4) Change of Lease

The Company accounts for a lease modification as a separate lease if the lease modification occurs and the following conditions are also met: the lease modification expands the scope of the lease by increasing the right to use one or more leased assets;

The increased consideration is comparable to the separate price of the expanded portion of the lease adjusted for the circumstances of that contract.

Where a lease modification is not accounted for as a separate lease, at the effective date of the lease modification, the Company reapportions the consideration of the modified contract, re-determines the lease term and re-measures the lease liability based on the present value of the modified lease payments and a revised discount rate.

If a lease modification results in a reduction in the scope of the lease or a shortening of the lease term, the Company reduces the carrying value of the right-of-use asset accordingly and recognises the gain or loss associated with a partial termination or complete termination of the lease in profit or loss for the current period. If other lease modifications result in a remeasurement of the lease liability, the Company adjusts the carrying value of the right-of-use asset accordingly.

(5) Rental concessions associated with the new Crown Pneumonia outbreak

For the simplified method of rent abatement related to the New Crown Pneumonia outbreak, the Company does not assess whether a lease modification has occurred, continues to calculate the interest expense on the lease liability and recognises it in profit or loss at a discount rate consistent with that used prior to the abatement, and continues to depreciate the right-of-use asset at a rate consistent with that used prior to the abatement. In the event of a lease modification, the Company treats the lease modification as a variable lease payment, and when the original lease payment obligation is cancelled by entering into a lease modification agreement or other agreement, the Company reduces the cost or expense of the related asset by the amount of the undiscounted amount or the discount rate prior to the modification, and adjusts the lease liability accordingly; in the event of a deferred lease payment, the Company reduces the lease **l i a b i l i t y** recognised in prior periods when the lease payment is actually made.

For short-term leases and leases of low-value assets, the Company continues to record the original contractual rentals in the cost or expense of the related assets in a manner consistent with that used prior to the abatement. In the event of a rent abatement, the Company recognises the abated rent as a variable lease payment and reduces the related cost of the asset or expense during the period of abatement. In the event of a deferred rent payment, the Company recognises the rent payable as an **a c c o u n t** payable in the period in which the rent is originally payable, and reduces the payable recognised in prior periods when the rent is actually paid.

2. The Company as lessor

At the inception date of a lease, the Company classifies leases as finance leases and operating leases. A finance lease is a lease that transfers substantially all of the risks and rewards associated with ownership of the leased asset, regardless of whether ownership is ultimately transferred. Operating leases are leases other than finance leases. When the Company acts as a sublease lessor, it classifies the sublease based on the right-of-use asset arising from the original lease.

(1) Accounting for operating leases

Lease receipts under operating leases are recognised as rental income on a straight-line basis in each period during the lease term. The Company capitalises the initial direct costs incurred in relation to operating leases and apportions them over the lease term to current profit

or loss on the same basis as rental income is recognised. Variable lease payments that are not included in lease receipts are charged to current profit or loss when they are actually incurred. When an operating lease is changed, the Company accounts for it as a new lease from the effective date of the change, and the lease receipts received in advance or receivable relating to the lease before the change are regarded as receipts under the new lease.

(2) Accounting for finance leases

At the inception date of a lease, the Company recognises a finance lease receivable for a finance lease and derecognises the finance lease asset. When the Company initially measures a finance lease receivable, the net investment in the lease is taken as the recorded value of the finance lease receivable. The net investment in the lease is the sum of the unguaranteed residual value and the present value of the lease receipts not yet received at the commencement date of the lease term discounted at the interest rate embedded in the lease.

The Company calculates and recognises interest income at a fixed periodic rate for each period during the lease term. Derecognition and impairment of finance lease receivables are accounted for in accordance with "III. (J) Financial instruments" in this note.

Variable lease payments that are not included in the measurement of the net investment in leases are recognised in profit or loss when they are actually incurred.

If there is a change in a finance lease and both of the following conditions are met, the Company accounts for the change as a separate lease:

- The change expands the scope of the lease by adding the right to use one or more of the leased assets;
- The increased consideration is comparable to the separate price of the expanded portion of the lease adjusted for the circumstances of that contract.

If a modification of a finance lease is not accounted for as a separate lease, the Company treats the modified lease under the following circumstances, respectively:

- If the change is effective on the commencement date of the lease and the lease would have been classified as an operating lease, the Company accounts for the lease as a new lease from the effective date of the lease change and uses the net investment in the lease prior to the effective date of the lease change as the carrying value of the leased asset;
- If the change would have been effective on the commencement date of the lease and the lease would have been classified as a finance lease, the Company would have followed this note "III, (x) Financial instruments are accounted for under the policy on modification or renegotiation of contracts.

(3) Rental concessions associated with the new Crown Pneumonia outbreak

- For operating leases that use the simplified method of rent abatement related to the New Crown Pneumonia outbreak, the Company continues to recognise the original contractual rent as lease revenue in a manner consistent with the method used prior to the abatement; where rent abatement occurs, the Company treats the abatement as a variable lease payment, which is offset against lease revenue during the period of the abatement; and where there is a deferral of rental receipts, the Company recognises the rental receivable as a receivable in the period of the original receipt, which is offset against receivable when it is the receivable recognised in the previous period when it is actually received.

- For finance leases that use the simplified method of rent abatement related to the New Crown Pneumonia outbreak, the Company continues to calculate interest at a discount rate consistent with that used before the abatement and recognises it as lease income. In the event of a rent abatement, the Company treats the abated rent as a variable lease payment, and when the right to receive the original rent is waived by entering into an abatement agreement, etc., the originally recognised lease income is reduced by the amount of the undiscounted amount or the discount rate prior to the abatement, and the portion of the shortfall is credited to investment income, while adjusting the amount of the finance lease receivable accordingly; in the event of a delay in the collection of the rent, the Company reduces the amount of the finance lease receivable recognised in prior periods at the time of actual receipt. (ii) In the event of deferred rentals, the Company will reduce the finance lease receivables recognised in prior periods when they are actually received.

3. Sale and leaseback transactions

The Company assesses whether the transfer of assets in sale and leaseback transactions is a sale in accordance with the principles described in "V.38 Revenue" in this note.

(1) as lessee

If the transfer of an asset in a sale and leaseback transaction is a sale, the Company, as the lessee, measures the right-of-use asset resulting from the sale and leaseback at the portion of

the original asset's carrying value that relates to the right-of-use acquired by leasing it back and recognises the related gain or loss only on the right transferred to the lessor; if the transfer of an asset in a sale and leaseback transaction is not a sale, the Company, as the lessee, continues to recognise the transferred asset and at the same time recognises a financial liability equal to the revenue from the transfer. The Company, as the lessee, continues to recognise the transferred asset and at the same time recognises a financial liability equal to the transfer proceeds. For details of accounting treatment of financial liabilities, please refer to "V. 10.

Appliances".

(2) lessor

If the transfer of an asset in a sale and leaseback transaction is a sale, the Company, as lessor, accounts for the purchase of the asset and accounts for the lease of the asset in accordance with the policy of "2. The Company as Lessor" mentioned above; if the transfer of an asset in a sale and leaseback transaction is not a sale, the Company, as lessor, does not recognise the transferred asset, but The Company, as the lessor, does not recognise the transferred assets, but recognises a financial asset equal to the transfer proceeds. For accounting treatment of financial assets, please refer to "V.10. Financial instruments" in this note.

43. Other significant accounting policies and accounting estimates

✓Applicable

☐ Not

applicable (i)

Discontinue

d operations

A discontinued operation is a separately distinguishable component that meets one of the following conditions and that has been disposed of by the Company or classified by the Company as held for sale:

- (1) The component represents a separate principal business or a separate principal operating area;
- (2) The component is part of an associated plan for the proposed disposal of a separate major business or a separate major operating area;
- (3) The component is a subsidiary acquired exclusively for resale.

(ii) Hedge

accounting

1. Classification of hedging

(1) A fair value hedge is a hedge of the exposure to changes in the fair value of a recognised asset or liability, a firm commitment that has not yet been recognised, or a component of one of these items.

(2) Cash flow hedges, which are hedges of exposures to changes in cash flows.

(3) Hedge of net investment in foreign operations is a hedge of the foreign exchange risk exposure of net investment in foreign operations.

2. Designation of hedging relationship and determination of hedge effectiveness

At the inception of a hedging relationship, the Company has a formal designation of the hedging relationship and prepares formal written documentation of the hedging relationship, risk management objectives and hedging strategy. This documentation sets out the nature of the hedging instrument and its quantity, the nature of the hedged item and its quantity, the nature of the hedged risk, the type of hedge, and the Company's assessment of the effectiveness of the hedging instrument. Hedge effectiveness is the extent to which changes in the fair value or cash flows of the hedging instrument are able to offset changes in the fair value or cash flows of the hedged item arising from the hedged risk. The Company evaluates hedge effectiveness on an ongoing basis to determine whether the hedge is highly effective over the accounting period in which the hedging relationship is designated.

The Company considers a hedge to be highly effective when it simultaneously meets the following conditions:

(1) An economic relationship exists between the hedged item and the hedging instrument. This economic relationship causes the value of the hedging instrument and the hedged item to move in opposite directions as a result of being exposed to the same hedged risk.

(2) The effect of credit risk does not dominate the change in value arising from the economic relationship between the hedged item and the hedging instrument.

(3) The use of an appropriate hedge ratio, which is equal to the ratio of the number of hedged items actually hedged by the enterprise to the actual number of hedging instruments hedging them, does not reflect an imbalance in the relative weights of the hedged items and hedging instruments, which can lead to ineffective hedging and may produce accounting results that are inconsistent with the objectives of hedge accounting.

3. Hedge accounting treatment

(1) fair value hedge

Changes in the fair value of hedging derivatives are recognised in profit or loss for the period. Changes in the fair value of the hedged item attributable to the hedged risk are recognised in

profit or loss for the period, with an adjustment to the carrying amount of the hedged item.

For fair value hedges relating to financial instruments measured at amortised cost, adjustments to the carrying amount of the hedged item are amortised to profit or loss over the period remaining between the adjustment date and the maturity date. Amortisation under the effective interest rate method may commence immediately after the adjustment to the carrying value and no later than the termination of the hedged item in response to changes in fair value arising from the hedged risk.

If the hedged item is derecognised, the unamortised fair value is recognised in profit or loss for the period.

If the hedged item is a firm commitment that has not yet been recognised, the cumulative change in the fair value of the firm commitment attributable to the hedged risk is recognised as an asset or a liability, and the related gain or loss is recognised in profit or loss. Changes in the fair value of the hedging instrument are also recognised in profit or loss.

(2) cash flow hedge

The portion of the gain or loss on a hedging instrument that is an effective hedge is recognised directly in other comprehensive income, and the portion that is an ineffective hedge is recognised in profit or loss for the period.

If the hedged transaction affects current profit or loss, such as when the hedged financial income or financial expense is recognised or the expected sale occurs, the amount recognised in other comprehensive income is transferred to current profit or loss. If the hedged item is a non-financial asset or a non-financial liability

cost of the non-financial asset or non-financial liability, the amount previously recognised in other comprehensive income is reversed out to the amount initially recognised for the non-financial asset or non-financial liability (or the amount previously recognised in other comprehensive income is reversed out to profit or loss in the same period in which the non-financial asset or non-financial liability affects profit or loss)

If the forecast transaction or firm commitment is not expected to occur, the cumulative gain or loss on the hedging instrument previously included in shareholders' equity is reversed and included in profit or loss for the period. If the hedging instrument expires, is sold, contractually terminated or exercised (but not replaced or rolled over), or the designation of the hedging relationship is revoked, the amount previously included in other comprehensive income is not reversed until the anticipated transaction or firm commitment affects current profit or loss.

(3) Hedges of net investment in foreign operations

Hedges of a net investment in a foreign operation, including hedges of monetary items that are part of the net investment, are treated similarly to cash flow hedges. The portion of the gain or loss on the hedging instrument that is determined to be an effective hedge is included in other comprehensive income, while the portion of the hedge that is ineffective is recognised in profit or loss for the period. Upon disposal of a foreign operation, any cumulative gain or loss included in shareholders' equity is reversed and recognised in profit or loss for the period.

(iii) Repurchase of the Company's shares

Consideration and transaction costs paid by the company for the repurchase of its own equity instruments are recorded in the treasury stock item, which reduces shareholders' equity. Except for share-based payments, the issuance (including refinancing), repurchase, sale or cancellation of own equity instruments is treated as a change in equity.

(1) Implementation of Accounting Standard Interpretation No. 15

The Ministry of Finance (MOF) issued the "Interpretation of Enterprise Accounting Standards No. 15" (Caijing [2021] No. 35 to

(hereinafter referred to as "Interpretation No. 15").

① Accounting for Trial Sales

Interpretation No. 15 prescribes the accounting treatment and presentation for the sale of products or by-products produced before a fixed asset reaches its intended state of use or in the course of research and development, and stipulates that the cost of fixed assets or research and development expenditures should not be reduced by the net amount of revenues from sales of trial runs after offsetting the costs incurred. This provision is effective from 1 January 2022 for the period from the beginning to the end of the earliest period for which the financial statements are presented.

Pilot sales occurring between 1 January 2022 should be adjusted retrospectively. The implementation of this provision did not have a material impact on the Company's financial position and results of operations.

② Judgement on loss-making contracts

Interpretation No. 15 clarifies that the "cost of performing the contract", which an enterprise takes into account in determining whether a contract constitutes a loss-making contract, shall be

It also includes an apportionment of the incremental cost of performing the contract and other costs directly related to the performance of the contract. This provision is effective from 1 January 2022.

The Company shall implement this provision for contracts for which it has not yet fulfilled all obligations as of 1 January 2022, and the cumulative effect shall be adjusted to retained earnings and other related financial statement items at the beginning of the year in which the provision is implemented, but not to the comparative financial statement data of the previous period. The implementation of this provision did not have a significant impact on the Company's financial position and results of operations.

(2) Implementation of the Circular on Issues Related to the Application of the Provisions on Accounting for Rental Concessions Associated with the New Crown Pneumonia Epidemic

On 19 May 2022, the Ministry of Finance ("MOF") issued the "Notice on Issues Related to the Application of the Provisions on Accounting Treatment of Rental Concessions Related to the New Crown Pneumonia Epidemic" (Caihui [2022] No. 13), which once again adjusted the scope of application of the simplified approach to allow for rental concessions related to the new Crown pneumonia epidemic by cancelling the original **"Concessions for lease payments payable before 30 June 2022"** and **"Concessions for lease payments payable before 30 June 2022"**. The scope of application of the simplified method of granting rent concessions relating to NCPP has been adjusted again, and the original **"Concessions only for lease payments payable before 30 June 2022"** **has been cancelled.**

in order to apply the limitations of the simplified approach. For concessions on lease payments payable after 30 June 2022 that are directly attributable to the New Crown Pneumonia Outbreak, lessees and lessors may continue to elect to account for them using the simplified method governed by the "Provisions on Accounting for Rental Concessions Associated with the New Crown Pneumonia Outbreak", with all other conditions of application remaining unchanged.

The Company has elected to adopt the simplified method of accounting for all eligible lease contracts before the scope of application adjustment, and to adopt the simplified method of accounting for all eligible similar lease contracts after the scope of application adjustment, and to make retrospective adjustments to the relevant lease contracts for which lease modifications had been adopted for accounting treatment prior to the issuance of the notice, without adjusting the data of the comparative financial statements of the previous period; and to make adjustments to the relevant rental concessions that had not been subject to accounting treatment in accordance with the notice and that had taken place between 1 January 2022 and the effective date of the notice. The related rental concessions that occurred between 1 January 2022 and the effective date of the Circular that were not subject to accounting treatment in accordance with the provisions of the Circular were adjusted in accordance with the Circular.

(3) Implementation of Accounting Standard Interpretation No. 16

The Ministry of Finance (MOF) issued ASBE Interpretation No. 16 on 30 November 2022 (Caixin [2022] No. 31 to (hereinafter referred to as **"Interpretation No. 16"**)).

① Accounting for the income tax effects of dividends related to financial instruments classified by the issuer as equity instruments

Interpretation No. 16 stipulates that for financial instruments classified as equity instruments by an enterprise, if the related dividend expenses are deductible before enterprise income tax in accordance with the relevant provisions of the tax policy, the income tax effect related to the dividends should be recognised when the dividends payable are recognised and the income tax effect of the dividends should be charged to the current profit or loss in the same

manner as the accounting treatment adopted for the past transactions or events that resulted in profit available for distribution or the owner's equity items (including other comprehensive income items).

This provision is effective from the date of its publication, and if the relevant dividend payable occurs between 1 January 2022 and the date of its implementation, the dividend payable will be paid in accordance with this provision.

Adjustments should be made in accordance with this provision; retroactive adjustments should be made if they occurred prior to 1 January 2022 and the related financial instruments had not been derecognised as at 1 January 2022. The implementation of this provision did not have a significant impact on the Company's financial position and results of operations.

② Accounting treatment of an enterprise's modification of cash-settled share-based payment to equity-settled share-based payment

Interpretation No. 16 clarifies that if an enterprise modifies the terms and conditions of a cash-settled share-based payment agreement to make it an equity-settled share-based payment, at the date of modification (whether it occurs within the waiting period or after the end of the waiting period), it shall measure the equity-settled share-based payment at the fair value of the equity instrument granted on the date of modification, record the services acquired in capital surplus, and derecognise the cash-settled share-based payment liabilities recognised at the date of modification, with the difference between the two being recognised in profit or loss.

This provision shall come into force on the date of its publication, and relevant transactions newly added between 1 January 2022 and the date of its implementation shall be adjusted in accordance with this provision;

Transactions that occurred prior to 1 January 2022 that have not been treated in accordance with this provision should be retrospectively adjusted to reflect the cumulative effect of

This provision adjusts retained earnings and other related items as of 1 January 2022 and does not adjust the comparative financial statements of prior periods. The implementation of this provision did not have a significant impact on the Company's financial position and results of operations.

(iii) Accounting for the non-applicability of the initial recognition exemption for deferred income taxes related to assets and liabilities arising from a single transaction

Interpretation No. 16 provides that for transactions that are not business combinations and do not affect either accounting profit or taxable income at the time of the transaction

(The exemption from initial recognition of deferred income tax liabilities and deferred income tax assets does not apply to individual transactions (including lease transactions in which the lessee initially recognises a lease liability on the commencement date of the lease term and credits it to the right-of-use asset, and those in which the lessee recognises a projected liability for the existence of an abandonment obligation for a fixed asset, etc. and credits it to the cost of the relevant asset, etc.) that result in the creation of an equivalent amount of taxable temporary differences and deductible temporary differences. Deferred tax liabilities and deferred tax assets should be recognised when the transaction occurs in accordance with the relevant provisions of "Accounting Standard for Business Enterprises (ASBE) No. 18 - Income Taxes" and other relevant regulations.

(4) Implementation of Finance [2022] No. 32

The Ministry of Finance (MOF) issued on 6 December 2022 the "Strict Implementation of Accounting Standards for Enterprises and Effective Preparation of Enterprises' Annual Report for 2022".

The Circular stipulates that enterprises should follow the "Accounting Standard for Business Enterprises No. 1 - Inventories" (Caijing [2006] No. 3),

In accordance with the relevant provisions of Accounting Standard for Business Enterprises No. 4 - Fixed Assets (Caijing [2006] No. 3, hereinafter referred to as Fixed Assets Standard), routine repair costs of fixed assets that do not qualify for subsequent expenditure on capitalisation of fixed assets shall be charged to the current profit or loss or to the cost of the relevant assets according to the target beneficiary at the time of incurring. Routine repair costs of fixed assets related to the production and processing of inventories are handled in accordance with the principle of inventory cost determination, while routine repair costs of fixed assets incurred by administrative departments, sales organisations dedicated to enterprises, etc. are charged to administrative expenses or selling expenses in accordance with their functional classification. The Company records the cost of routine repairs of fixed assets related to the production and processing of inventories as manufacturing expenses and no longer records them as administrative expenses.

The Company implemented the requirements from 1 January 2022 onwards. Of these, the changes in presentation of the affected accounts in 2022 are as follows:

sports event	pre-change	after change	Adjust ments
inventory (of material)		2,034,696.94	2,034,696.94
Main operating costs		29,653,697.41	29,653,697.41
overheads	31,688,394.35		-31,688,394.35

According to the requirements of the Circular, if an enterprise adjusts its accounting treatment methods due to the implementation of enterprise accounting standards, interpretations of enterprise accounting standards, accounting treatment regulations and other relevant regulations issued by the Ministry of Finance, it should follow the relevant regulations on the convergence of the old and the new, as well as the guidelines on accounting policies, changes in accounting estimates and correction of errors. Where an enterprise adjusts its accounting treatment methods as a result of comparing the application cases for the implementation of enterprise accounting standards issued by the Ministry of Finance and the implementation questions and answers, the information on the comparable periods of the financial statements shall be adjusted in accordance with the relevant provisions of the guidelines on accounting policies, changes in accounting estimates, and correction of errors and the related disclosures shall be made in the notes to the financial statements. Due to the long period of time over which the event occurred, the difficulty in obtaining the relevant information required for prior period estimates, and the impracticality of adjusting the number of effects in the comparable period, the

Company has adopted the future applicable method of treatment. The change in accounting policy did not have a significant impact on the financial position and results of operations.

55. Capital surplus

☐Applicable ☐Not applicable

Unit: Yuan Currency: RMB

sports event	Opening balance	Increase during the period	Decrease during the period	Closing balance
Capital premium (shares) (capital premium)	2,300,997,820.86			2,300,997,820.86
Other capital surplus	15,855,169.17	213,521,868.68		229,377,037.85
add up the total	2,316,852,990.03	213,521,868.68		2,530,374,858.71

Other explanations, including increases, decreases and changes during the period, and explanations of the reasons for the changes:

The change in the Company's other capital surplus during the period was due to the first-time implementation of inflationary accounting standards by a subsidiary of the Company's foreign affiliate, among other reasons.

X. Risks related to financial instruments

☒Applicable ☐Not applicable

The Company is exposed to a variety of financial risks in the course of its operations: credit risk, market risk and liquidity risk. The Board of Directors of the Company is fully responsible and ultimately accountable for the determination of risk management objectives and policies, and the Board has delegated authority to each of the Company's functions to design and implement procedures that will ensure the effective implementation of risk management objectives and policies. The Board of Directors reviews the effectiveness of the implemented procedures and the reasonableness of the risk management objectives and policies through reports submitted by the heads of the respective functions. The Company's internal auditors also audit the risk management policies and procedures and report their findings to the Audit Committee.

The overall objective of the Company's risk management is to develop risk management policies that minimise risk without unduly affecting the Company's competitiveness and resilience.

1. Credit risk

Credit risk is the risk that one party to a financial instrument will fail to honour its obligations, causing the other party to incur a financial loss. The Company is primarily exposed to customer credit risk resulting from credit sales. Prior to entering into new contracts, the Company evaluates the credit risk of new customers, including external credit ratings and, in some cases, bank creditworthiness certificates (when this information is available) The Company sets a credit limit for each customer, which is the maximum amount for which no additional approval is required. The Company ensures that the Company's overall credit risk is within manageable limits through quarterly monitoring of credit ratings of existing customers and monthly review of accounts receivable ageing analysis. In monitoring the credit risk of customers, customers are grouped according to their credit characteristics. Customers rated as "**high risk**" are placed on a restricted customer list and may only be sold on credit in future periods with additional approval, otherwise they must be asked to pay in advance.

2. Liquidity risk

Liquidity risk is the risk that a business will experience a shortage of funds in meeting its obligations that are settled by delivery of cash or other financial assets. The Company's policy is to ensure that it has sufficient cash to meet its obligations as they fall due. Liquidity risk is centrally controlled by the Company's treasury department. The treasury department ensures that the Company has sufficient funds to service its obligations under all reasonably forecast

scenarios by monitoring cash balances, readily realisable marketable securities and rolling forecasts of cash flows over the next 12 months.

The undiscounted contractual cash flows of each of the Company's financial liabilities are presented below by maturity date:

s port s even t	Closing balance

add up the total	1,453,916,702.88	1,478,061,858.41	2,931,978,561.29

3. Market risk

Market risk for financial instruments is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market prices, including exchange rate risk, interest rate risk and other price risks.

Ⅰ Interest rate risk

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates. The Company's exposure to interest rate risk arises primarily from bank borrowings. The Company may employ interest rate swaps to achieve the desired interest rate structure. Although this policy does not completely insulate the Company from the risk of paying interest rates in excess of prevailing market rates, nor does it completely eliminate the cash flow risk associated with fluctuations in interest payments, management believes that the policy achieves a reasonable balance between these risks.

Ⅱ Exchange rate risk

Exchange rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in foreign exchange rates. To the extent possible, the Company matches foreign currency revenues with foreign currency expenses to mitigate exchange rate risk. In addition, the Company may enter into forward exchange contracts or currency swap contracts to hedge exchange rate risk.

The Company's exposure to exchange rate risk mainly arises from financial assets and financial liabilities denominated in foreign currencies, and the amounts of foreign-currency financial assets and foreign-currency financial liabilities translated into RMB are set out below:

sport	Balance at the end of the year
-------	--------------------------------------

Other accounts payable	226,724.35	13,111,511.55			13,338,235.90

3. Other price risks

Other price risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market prices other than those arising from exchange rate risk and interest rate risk.

The Company's other price risk arises primarily from investments in various types of equity instruments and is subject to the risk of changes in the price of equity instruments.

sports event	Closing balance	Prior year-end balance
Investments in other equity instruments	2,660,000.00	3,230,000.00
add up the total	2,660,000.00	3,230,000.00

XI. Fair value disclosures

1. Closing fair value of assets and liabilities measured at fair value

√Applicable □Not applicable

Unit: Yuan Currency: RMB

sports event	Fair value at end of period			
	Level 1 fairness Value measurement	Level 2 fairness Value measurement	Level 3 fair value Value measurement	add up the total
I. Ongoing fair value measurement		179,735.2		

2. Designation of the financial statements at fair value through profit or loss Financial assets at fair value through profit or loss				
(1) Investments in debt instruments				
(2) Investments in equity instruments				
(ii) Other debt investments				
(iii) Other equity instruments investors	2,660,000.00			2,660,000.00
(iv) Investment property				
1. Land use for rental purposes authority				
2. Rented buildings				
3. After holding and preparing for appreciation Transferred land use rights				
(v) Biological assets				
1. Expendable biological assets				
2. Productive biological assets				
Receivables financing			298,776,868.19	298,776,868.19
Continuously measured at fair value total assets	2,660,000.00		298,776,868.19	301,436,868.19
(vi) Financial liabilities on trading debt				
1. At fair value through profit or loss financial liability				
Of which: Issued transactional debentures				
Derivative financial liabilities				
the rest				
2. Designated as at fair value through profit or loss				

(FVTPL). Financial liabilities for profit or loss				
Continuously measured at fair value Total liabilities				
II. Non-continuing fair value Value measurement				
(i) Assets held for sale				
Non-continuing at fair value Total assets in volume				
Non-continuing at fair value Total liabilities for volume				

The inputs used in the fair value measurements are divided into three levels:

Level 1 inputs are unadjusted quoted prices in active markets for identical assets or liabilities that are available at the measurement date. Level 2 inputs are inputs other than level 1 inputs that are observable for the underlying asset or liability, either directly or indirectly. Level 3 inputs are unobservable inputs for the underlying asset or liability.

The level within which a fair value measurement result belongs is determined by the lowest level within which the inputs that are significant to the fair value measurement as a whole belong.

2. Basis for determining the market value of continuing and discontinued Level 1 fair value measurements

√Applicable Not applicable

Publicly quoted prices in active markets for the financial assets at the end of the period.

3. Continuing and discontinued Level 2 fair value measurements, qualitative and quantitative information on valuation techniques used and significant parameters

□Applicable √Not applicable

4. Continuing and discontinued Level 3 fair value measurements, qualitative and quantitative information on valuation techniques used and significant parameters

√Applicable □Not applicable

The Company's Level 3 fair value measurement item is receivables financing. The receivables financing represents promissory notes held by the Company, which are measured at carrying value as a reasonable estimate of fair value due to the short remaining term of the notes. The Company calculates the expected credit loss on the receivables financing at the balance sheet date and records the amount of the expected loss in credit impairment loss and other comprehensive income.

5. Ongoing Level 3 fair value measurements, information on reconciliations between opening and closing book values and sensitivity analysis of unobservable parameters
