Company Profile

Zhonghao Heiyuan Chemical Research and Design Institute Co., Ltd. (referred to as Carbon Black Institute) is a scientific research institute directly under the former Ministry of Chemical Industry. In 1965, it responded to the national third-line construction call and moved from Fushun, Liaoning to Zigong, Sichuan. In 1999, it was established with the national 242 scientific research institutes were transformed into technology-based enterprises. In 2015, a limited company was restructured and is now a wholly-owned subsidiary of Sinochem Holdings Co., Ltd.

Carbon Black Institute is a national high-tech enterprise integrating scientific research, design, production and service in China's carbon black industry. It has the National Carbon Black Material Engineering Technology Research Center, National Carbon Black Quality Inspection and Testing Center, Carbon Black Industry Technology Development Center, Standardization unit for carbon black and light-colored reinforcing materials, carbon black industry information and training center, Sichuan special carbon black preparation and application technology engineering research center, Sichuan enterprise technology center, industrial product quality control and technology evaluation laboratory, 10 national, provincial and ministerial innovation platforms including post-doctoral scientific research workstations; qualifications for chemical engineering design class A, engineering consulting class A, environmental engineering design class B, pressure piping design (GC1, GCD), pressure vessel design, etc.

Since the establishment of the Institute, the Carbon Black Institute has achieved more than 300 scientific and technological achievements, and won more than 60 national, provincial and ministerial scientific and technological awards. Among them, the "new process carbon black production technology" has won the National Science and Technology Progress Award three times; There are 3 pieces of technology; formulate/revise more than 90 national and industry standards; own well-known brands of "Heiyuan" and "CCBI". As the technology source of China's carbon black industry, the Carbon Black Institute has a technology coverage rate of over 80%, making outstanding contributions to the rise of China's carbon black industry and becoming the world's largest carbon black producer.

Grasp the new development stage, implement the new development concept, and integrate into the new development pattern. Guided by "Science First", the Institute of Carbon Black focuses on major national strategic needs, continuously strengthens independent innovation and core industrial technology upgrades, and builds an internationally advanced high-performance carbon material supplier and an integrated solution provider for innovative technology services, serving China Sinochem will create a world-class chemical enterprise, create a beautiful world of harmonious coexistence, and contribute the wisdom and strength of the Carbon Black Institute!
