政策原文 >

Recently, the Provincial Development and Reform Commission, Zhejiang Energy Supervision Office and the Provincial Energy Bureau jointly issued the "Zhejiang Province Medium and Long-term Electricity Trading Rules (2022 Revised Edition)" (hereinafter referred to as the "Rules"), and the relevant content is now interpreted as follows.

First, the background and process of the introduction

In order to thoroughly implement the spirit of the "Several Opinions of the CPC Central Committee and the State Council on Further Deepening the Reform of the Electric Power System" (Zhongfa [2015] No. 9) and the "Comprehensive Pilot Program for the Reform of the Electric Power System in Zhejiang Province" (Zhejiang Zhengfa [2017] No. 39), in accordance with the Notice of the National Development and Reform Commission on Further Deepening the Market-oriented Reform of On-grid Tariffs for Coal-fired Power Generation (Fa Gai Price [2021] No. 1439) The Notice of the General Office of the National Development and Reform Commission on Matters Related to Organizing and Carrying out the Agency Electricity Purchase Work of Power Grid Enterprises (Fa Gai Ban Price [2021] No. 809) and the Notice of the National Development and Reform Commission and the National Energy Administration Issuing the Basic Rules for Medium- and Long-term Trading of > < Electricity (Fa Gai Energy Regulation [2020] No. 889) revised the "Zhejiang Province Medium and Long-term Electricity Trading Rules (2021 Revised Edition)" (Zhejiang Fa Gai Energy [2021] No. 427).

According to the requirements of national documents, "regions that carry out spot trading of electricity may, in light of actual conditions, formulate medium- and long-term trading rules for electricity connected with spot trading". During the revision process, the Provincial Development and Reform Commission and the Provincial Energy Bureau carried out in-depth research, held several special symposiums, combined with the

actual situation of the power industry in Zhejiang Province, solicited the opinions of relevant provincial departments, development and reform departments of districted cities and relevant market entities, and after several revisions and improvements, it was deliberated and approved by the 2022st Director's Office Meeting of the Provincial Energy Bureau in 31 and the 2022 Director's Office Meeting of the Provincial Development and Reform Commission, and issued by the Provincial Development and Reform Commission, Zhejiang Energy Regulatory Office and Provincial Energy Bureau.

Second, overall considerations

According to the requirements of Document No. 1439, combined with the actual situation of the development of the power industry in our province, in the process of drafting and revising the Rules, the following four principles were emphasized.

First, adhere to market pricing. According to the requirements of the National Development and Reform Price [2021] No. 1439 document, orderly liberalize the on-grid tariff for all coal-fired power generation, promote industrial and commercial users to enter the market, cancel the sales price of the industrial and commercial catalog, further improve the market price formation mechanism, adhere to the implementation of the "transaction price + transmission and distribution price + government existing funds and additional" price model to determine prices, and give play to the decisive role of the market in the allocation of power resources.

Second, adhere to the problem orientation. Revise as few irrelevant provisions as possible to reflect policy stability and continuity. At the same time, it fully implements the relevant provisions of the "Zhejiang Province Three-Year Action Plan for Promoting Green and Low-carbon Energy Development and Ensuring Supply and Price Stabilization" (Zhejiang Political Office Fa [2022] No. 60), focusing on revising the provisions of the 2021 version of the Rules involving electronic signing, the basis for setting the benchmark valley electricity ratio, the settlement order of market entity contracts, market transaction price limits, information disclosure and other aspects.

Third, adhere to safety first. Ensure the safe and stable operation of the power grid and the stable supply of power users in the process of comprehensively promoting the construction of the electricity market, and ensure the safety of production. Strengthen the ex post facto supervision of market access, trading contracts, and transaction prices to ensure standardization and order.

四是坚持开门办公。广泛征求意见，11月4日在省发改委官网向全社会公开征求意见，并召集市场主体共同参与讨论，累计收到各单位反馈意见121条，力求平衡各方利益诉求。

三、框架和主要内容

《规则》约20691字，共三个部分十章。

（一）总体要求。包括一到三章。第一章总则，阐述了《规则》制定的目的依据、适用范围、基本定义和实施主体等内容；第二章市场成员，主要对参与市场交易的各类市场主体的权责、准入与退出、市场注册管理、交易基本要求进行了规定；第三章交易相关价格，明确了市场交易价格的形成机制。

（二）组织实施。包括四到七章。第四章电力批发交易和第五章电力零售交易，主要规定了各类交易品种的交易时序、申报电量确定、交易出清、安全校核等交易执行方式。第六章合同签订与执行，确定了交易合同的签订和电量偏差处理执行办法；第七章计量与结算，明确了各市市场主体计量结算的基本原则。

（三）监督管理。包括八到十一章。第八章信息披露，界定了市场主体信息披露的范围和要求；第九章至十一章，主要针对市场干预、争议和违规处理等作了规定。
