According to reports, Guizhou Tire has always adhered to the concept of green development and continuously promoted energy conservation, emission reduction and environmental protection. In 2011, the first batch of tires produced by the company using nitrogen vulcanization technology was successfully launched. Last year, the first 5G fully connected factory in Guizhou Province built by Guizhou Tire was officially completed. The factory has realized the wireless industrial interconnection and workshop production scheduling of the whole process and the whole scene. In January 2021, Guizhou Tire won the title of "National Green Factory" issued by the Ministry of Industry and Information Technology.
