production line and lays a solid foundation for the start of volume production in May.

Jinyu (Vietnam) Tire is the first overseas production base of the Jinyu Tire Group. It was planned and constructed with digitisation at its heart, connecting demand from customers with its R&D and production. In Jinyu's words, the new plant features "Industrial Intelligent Equipment, Operation Excellence Management System, Intelligent Production Management System, Automatic Control System, Safety Control System, CRM system, achieving scientific decision-making and continuous improvements, pursuing the quality commitment of 'Time proves Quality'."

Jinyu adds that the establishment of its Vietnam project "will optimise Jinyu Tire Group's global supply chain and give a solid base for the group's globalisation strategy." The new facility will enable the supply of its value products and service to more customers all over the world, including the local Vietnam market, Jinyu concludes.
