

# [Park News] General Rubber (Thailand) has a grand opening, and will achieve an annual production capacity of 6 million sets of semi-steel and 1 million sets of all-steel

2020-01-10 17:40

At the beginning of 2020, the Thai-Chinese Rayong Industrial Park ushered in the first grand opening company in 2020 - General Rubber (Thailand) Co., Ltd., which is also the first happy event in China's rubber industry in 2020. The General Rubber (Thailand) project is the first overseas production base invested by Jiangsu General Motors Co., Ltd., and it is also the fifth Chinese tire company that has completed and put into production in Thailand. This not only indicates that GM has achieved a new leap forward and a new starting point, but also indicates that in the new year, the pace of "going global" of Chinese tire companies will not stop.

The GM (Thailand) project was established in October 2018. The project covers an area of 526,400 square meters, with a total investment of 300 million US dollars in the first phase; the construction permit was obtained in January 2019, and the BOI was approved in April. After completion, it will have an annual production capacity of 1 million all-steel radial tires and 6 million semi-steel radial tires. The factory will increase more than 1,500 jobs, increase foreign exchange by about 300 million US dollars, and will drive the local economy and further promote the development of local auto parts and supporting industries in Thailand.

with industry and win-win for all parties". The layout of GM shares in Thailand is another practical result of the concept of "win-win for all parties" of the Hongdou Group.

The opening of GM (Thailand) is still a concrete manifestation of the implementation of the "six modernizations" of Hongdou Group - intelligence, green, service, high-end, internationalization, and standardization. Facing the turmoil of global economy, trade and market competition, General Motors assessed the situation, made active plans, and chose to build its first overseas production base in Thailand. This is not only a response to the country's "going global" strategy and actively grasping the development opportunities of the "Belt and Road", but also laying a solid foundation for the group's international development. It is not only a new leap forward, but also a new journey and starting point for GM. He hoped that GM could achieve win-win cooperation with all parties, work hard to build a new "Belt and Road" model project, and repay all parties with real development.

Gu Cui, chairman of Jiangsu General Technology Co., Ltd., said frankly in his speech that "China and Thailand are a family" and the friendship between the two countries has a long history. We are full of expectations for this hot land. Thailand is not only the automobile manufacturing center in Southeast Asia, but also has sufficient natural rubber resources and a complete upstream and downstream industrial chain, which provides a reliable guarantee for our future development. Rayong Industrial Park, as the only Chinese state-level overseas trade park in Thailand, provides superior location advantages, transportation advantages, complete infrastructure and considerate services. GM (Thailand) will always focus on "mutual benefit, win-win and harmonious development", promote industrial upgrading with intelligent manufacturing, protect the ecological environment with green factory construction, and conduct extensive consultation, joint construction and in-depth cooperation on the basis of compliant operations.

Gu Cui, Chairman of Jiangsu General Technology Co., Ltd.

Counselor Li Chunlin of the Chinese Embassy in Thailand pointed out at the ceremony that the high-quality development of the "Belt and Road" cannot be separated from the support of the government and the dedication of enterprises. The opening of the Thailand project of General Motors has attracted great attention from the Thai government. We would like to thank the Thai government for its help and support. At the same time, we also hope that General Motors can become a model for the construction of the "Belt and Road" industry and contribute to the promotion of local economic development in Thailand.

Former Thai Deputy Prime Minister Pini also delivered a speech on the opening of GM Thailand, and highly affirmed the construction of GM Thailand. He said that China and Thailand are a family, which will last forever. He hopes that General Motors Thailand will accelerate its development and contribute to the construction of the "Belt and Road" and the friendship between Thailand and China.

More

former deputy prime minister of thailand pini

Deng Yali, president of the China Rubber Industry Association, said that in recent years, with the complex and changeable international economic and trade situation and the structural adjustment of the domestic industry, China's rubber industry has also entered a transition period from winning speed and quantity to improving quality and efficiency, and is moving from a big rubber country to a rubber power. The opening of General Rubber (Thailand) Co., Ltd. is not only a milestone event in the development history of General Motors, but also a great joyous event for China's rubber industry. It marks an important step for General Motors to improve its international development level and optimize its industrial layout.

Looking back on the construction process of the Thailand project, from the establishment of the project in October 2018 to the completion of the first tire off the production line on December 28. In just 11 months, the General Motors Thailand project team worked together to overcome difficulties and completed the factory's infrastructure construction.

More

In the future, GM's first overseas production base located in the Thailand-China Rayong Industrial Park will focus on "mutual benefit and harmonious development", driven by technological innovation, intelligent manufacturing to promote industrial upgrading, and green factory construction to protect the ecological environment. On the basis of compliance management, joint consultation, joint construction and in-depth cooperation will accelerate the release of high-quality production capacity. Provide more cost-effective products and services for global consumers, and strive for the early realization of tens of billions of universal products!
