TF0006 – Safeguard measures on certain steel products

To whom it may concern,

We are a manufacturer of die cutting tools for food & general goods labels and pharmaceutical products made in the UK.

The steel we use is wholly sourced from Europe as our tools require a high-quality spring steel that is just not produced to the correct standard in the UK.

A 25% percent tariff on our steel from Europe would be massively detrimental to our costs not to mention everything else UK manufacturers have to deal with right now.

Regards

Steven Holfeld
